

29/12/21, 12:41 - Razvan Voicu: @Company Employee 12
Hello, I check Lighthouse, but for me SRM are moving. Can you maybe refresh browser/clear cookies

29/12/21, 12:42 - Razvan Voicu: Or is there a problem with a specific SRM?

29/12/21, 12:42 - Razvan Voicu: SRM= EXYZ

29/12/21, 12:44 - Company Employee 18: Raizan the srm 2 don't show the movement and the error on lighthouse

29/12/21, 12:46 - Mihai Soceanu: IMG-20211229-WA0002.jpg (file allegato)

29/12/21, 12:46 - Mihai Soceanu: IMG-20211229-WA0003.jpg (file allegato)

29/12/21, 12:46 - Company Employee 18: But now I see on lighthouse it working good

29/12/21, 12:46 - Mihai Soceanu: IMG-20211229-WA0004.jpg (file allegato)

29/12/21, 12:46 - Mihai Soceanu: i see srm 2 moving

29/12/21, 12:46 - Razvan Voicu: IMG-20211229-WA0005.jpg (file allegato)

29/12/21, 12:46 - Company Employee 18: Yes now it working

29/12/21, 12:46 - Company Employee 18: You have did something?

29/12/21, 12:46 - Razvan Voicu: IMG-20211229-WA0006.jpg (file allegato)

29/12/21, 12:46 - Razvan Voicu: same for me

29/12/21, 12:46 - Razvan Voicu: Just opened lighthouse

29/12/21, 12:47 - Razvan Voicu: and look

29/12/21, 12:47 - Razvan Voicu: nothing else

29/12/21, 12:48 - Company Employee 18: Ok perfect thx for the help

If the problem come back we call the service SSI

29/12/21, 12:48 - Company Employee 18: Have a nice day

29/12/21, 12:49 - Razvan Voicu: Our lh specialist says that we should always clean browser

29/12/21, 12:49 - Razvan Voicu: maybe it's a visual error

29/12/21, 12:49 - Razvan Voicu: Not much we can do, only just restart LH

29/12/21, 12:49 - Razvan Voicu: But it was probably just an error on your browser

29/12/21, 12:51 - Company Employee 18: Ok thx we try and we see if the problem come back

29/12/21, 12:52 - Razvan Voicu: thank you

29/12/21, 12:52 - Company Employee 18: You're are welcome

30/12/21, 10:37 - Stefano Dall'Asta, Lavoro: Hi fyi mobile terminals cannot connect to the server and all forklift drivers are blocked. We think Is the same problem of tuesday. We already called the help desk.

30/12/21, 13:38 - Nicola Bernardi: Can you check the SRM01? On lighthouse i can see that is on "home" position but the crane is in correct functional state

30/12/21, 13:41 - Nicola Bernardi: <Media omessi>

04/01/22, 08:45 - Support Technician 25: Ciao a tutti. Pentanova made a slight modification regarding the Lighthouse Notification for "PLC Offline" of a trolley. Can you somehow force that error to see if the modification is working fine?

04/01/22, 09:03 - Nicola Bernardi: What do you mean by forcing?

04/01/22, 09:07 - Support Technician 25: Provoke the error ("provocare?")

04/01/22, 09:07 - Support Technician 25: or "sfidare/cimentare"?

04/01/22, 09:09 - Nicola Bernardi: I know that, but what do you mean for provoke the error? How do I do for this?

04/01/22, 09:09 - Nicola Bernardi: 🤔

04/01/22, 09:10 - Support Technician 25: No idea. Unplug the PLC of a Trolley in an uncritical loop area?

04/01/22, 09:36 - Nicola Bernardi: Now I don't have more time for try this 😞

04/01/22, 09:37 - Support Technician 25: Ok, no prob. 😊

04/01/22, 09:37 - Nicola Bernardi: @Support Technician 25 you can see lighthouse?

04/01/22, 09:39 - Nicola Bernardi: I have the same problem with srm01 on lighthouse (now is in error) but I can't see this on lighthouse

04/01/22, 09:45 - Support Technician 25: Fine Positioning Error?

04/01/22, 09:46 - Support Technician 25: IMG-20220104-WA0000.jpg (file allegato)

04/01/22, 09:46 - Support Technician 25: and manually reduced kinematic value (lifting)

04/01/22, 09:52 - Nicola Bernardi: Now work 🙌🤔

05/01/22, 09:14 - Support Technician 25: IMG-20220105-WA0003.jpg (file allegato)

Everything alright onsite? 😬

05/01/22, 09:17 - Nicola Bernardi: Yes this is for you, for provoke the error for EMS 🤔

05/01/22, 09:17 - Mihai Soceanu: wooow

05/01/22, 09:17 - Mihai Soceanu: and i wanted to say pls don't give work to do :)))) (joking)

05/01/22, 09:19 - Nicola Bernardi: 🤔🤔

05/01/22, 09:22 - Support Technician 25: I think you tested every error message we have in Lighthouse 😊

05/01/22, 09:29 - Nicola Bernardi: 😊

05/01/22, 09:38 - Mihai Soceanu: SRM8 you need to reset manual handling

05/01/22, 09:38 - Nicola Bernardi: Yes 1 minute

05/01/22, 09:38 - Nicola Bernardi: 🙌

05/01/22, 09:39 - Mihai Soceanu: i just checked a bit :)

05/01/22, 09:39 - Mihai Soceanu: when you have time, i know you know the system now :)

05/01/22, 09:41 - Nicola Bernardi: I reset the srm08

05/01/22, 09:41 - Nicola Bernardi: Can you check?

05/01/22, 09:42 - Mihai Soceanu: it works

05/01/22, 09:42 - Mihai Soceanu: nice nice

05/01/22, 09:42 - Mihai Soceanu: :)

05/01/22, 09:42 - Mihai Soceanu: IMG-20220105-WA0005.jpg (file allegato)

05/01/22, 09:42 - Mihai Soceanu: and also 281 point pls check

05/01/22, 09:42 - Mihai Soceanu: :)

05/01/22, 09:43 - Benedetta Zini: Yes

05/01/22, 09:44 - Mihai Soceanu: the rest seems ok

05/01/22, 09:44 - Mihai Soceanu: :)

05/01/22, 09:44 - Nicola Bernardi: 🙌

05/01/22, 09:48 - Benedetta Zini: 281 okay 🙌

05/01/22, 09:49 - Mihai Soceanu: perfect :)

05/01/22, 09:50 - Mihai Soceanu: i knew you will handle all by yourself, i did not wanted to feel useless 😊 (joking)

05/01/22, 09:50 - Mihai Soceanu: great handling btw after all was down :)

05/01/22, 09:52 - Nicola Bernardi: 🙌😊

05/01/22, 20:35 - Giacomo Trivieri, Lavoro: @Support Technician 6 hi mihai i think that MFS Is sutthed down for a while. Are you working on It?

05/01/22, 20:36 - Giacomo Trivieri, Lavoro: IMG-20220107-WA0000.jpg (file allegato)

05/01/22, 20:40 - Giacomo Trivieri, Lavoro: @Support Technician 6 many "occupation without transport order" are appeared on LH. What Is happening?

05/01/22, 21:54 - Giacomo Trivieri, Lavoro: Good evening all of you. I have opened a ticket regarding the current situation of the warehouse (all pellets are blocked on the conveyors).if tomorrow someone of you could check and solve the situation should be very appreciate. In going home right now.

05/01/22, 21:55 - Giacomo Trivieri, Lavoro: IMG-20220107-WA0001.jpg (file allegato)

05/01/22, 22:01 - Federico Gatti, Personale: Questo messaggio è stato eliminato.

05/01/22, 22:02 - Federico Gatti, Personale: matteo sent me these photos that I attach. Seems to be a data network problem.

05/01/22, 22:03 - Federico Gatti, Personale: IMG-20220107-WA0003.jpg (file allegato)

05/01/22, 22:03 - Federico Gatti, Personale: IMG-20220107-WA0004.jpg (file allegato)

05/01/22, 22:13 - Mihai Soceanu: Hi, system is back on track

05/01/22, 22:39 - Federico Gatti, Personale: Thank you Mihai

07/01/22, 12:04 - Benedetta Zini: IMG-20220107-WA0008.jpg (file allegato)

Hi all! We have a problem with infeed line of SRM07... We have tried many times to refresh and reset LUS without success. We don't understand why in delegate to there is "wait for routing lock MFS...."

07/01/22, 12:05 - Benedetta Zini: IMG-20220107-WA0009.jpg (file allegato)

12/01/22, 18:50 - Milo Barozzi: 📞 Dear All, sorry to wrote on this chat, but I sent an email to support and also wrote personally to Flaviu and Razvan, because we are quite convinced that the tries/adjustment you did on the fly for fixing the spontaneous TPO issue (which is still not working) created even more big

issues to transport function in auto-allocation mode! 

12/01/22, 18:51 - Milo Barozzi: IMG-20220112-WA0002.jpg (file allegato)
The issue is the following: when executing a TPO in manual allocation mode: pick up one LU, you can pick up another one or exit for printing shipping labels. If you now exit, you got the following error message and rf terminal needs to be rebooted because is not moving from that dialog at all

12/01/22, 18:51 - Milo Barozzi: please, fix it as fast as possible because in this way we cannot move wholeLUS in the warehouse and if we can't, preparation for tomorrow will be delayed (and tomorrow is a huge volume shipping day)!!

12/01/22, 18:51 - Milo Barozzi: 

12/01/22, 18:51 - Milo Barozzi: Awaiting for your kind reply

12/01/22, 19:43 - Razvan Voicu: For what LU do you get the error above?

12/01/22, 19:46 - Stefano Dall'Asta, Lavoro: Hi razvan, i dont have the Lus id. But i can Say for every LU that has to go from a stock location to a buffer location

12/01/22, 19:47 - Stefano Dall'Asta, Lavoro: For example from S10 to s97

12/01/22, 20:04 - Razvan Voicu: Could you give me an example?

12/01/22, 20:04 - Razvan Voicu: I tried a couple of spontaneouses from S10, but none of hem go to 97

12/01/22, 20:10 - Stefano Dall'Asta, Lavoro: The problem Is with manual

12/01/22, 20:11 - Razvan Voicu: can you ask for an example?

12/01/22, 20:20 - Razvan Voicu: Ok, so can we point what are the problems now?

12/01/22, 20:20 - Razvan Voicu: Slow mobile? User getting kicked out?

12/01/22, 20:21 - Milo Barozzi: This one is enemy number one blocking us

12/01/22, 20:21 - Milo Barozzi: Spontaneous is not working but it's nothing compared to that

12/01/22, 20:21 - Stefano Dall'Asta, Lavoro: Users get kicked out After he print the label

12/01/22, 20:22 - Razvan Voicu: Ok can you give us an example for the printing so I can check particularly?

12/01/22, 20:22 - Razvan Voicu: Or tell me on what terminal this appeared

12/01/22, 20:24 - Milo Barozzi: We're not anymore issue, I'm sorry but I cannot help you. But if you try any LU having a OG tpo you'll get that error

12/01/22, 20:26 - Razvan Voicu: Do we stick to the restart plan?

12/01/22, 20:28 - Razvan Voicu: Can you pelase add darius to this group

+Support Technician 23

12/01/22, 20:28 - Razvan Voicu: whoever is group admin

12/01/22, 20:31 - Razvan Voicu: If we stick to the restart plan, please let us now, because we have to set some parameters ahead of time

12/01/22, 20:37 - Milo Barozzi ha aggiunto ~Darius Huț.

12/01/22, 20:37 - Mihai Soceanu: I set the parameter

12/01/22, 20:41 - Support Technician 23: can we proceed with the restart in 10 min ?

12/01/22, 20:42 - Mihai Soceanu: all ordes for AGV are done

12/01/22, 20:42 - Mihai Soceanu: we can do it now

12/01/22, 20:44 - Mihai Soceanu: also

12/01/22, 20:44 - Mihai Soceanu: IMG-20220112-WA0003.jpg (file allegato)

12/01/22, 20:45 - Mihai Soceanu: printer on location LDF01C0522_LEFT

12/01/22, 20:45 - Mihai Soceanu: seems to be unresponsive

12/01/22, 20:45 - Mihai Soceanu: this can cause slow pending event consumption\

12/01/22, 20:47 - Stefano Dall'Asta, Lavoro: What does this mean?

12/01/22, 20:48 - Mihai Soceanu: means you can see some occupation without data

12/01/22, 20:48 - Mihai Soceanu: in F01

12/01/22, 20:48 - Mihai Soceanu: we had this problem related toi the same printer some time ago

12/01/22, 20:50 - Stefano Dall'Asta, Lavoro: It can be easely solved? Sorry for the questions but im ignorant about It

12/01/22, 20:51 - Mihai Soceanu: someone from IT on Atlas side must check ip 10.32.0.82

12/01/22, 20:52 - Stefano Dall'Asta, Lavoro: Milo Is It the printer for container?

12/01/22, 20:53 - Nicola Bernardi: Si

12/01/22, 20:53 - Nicola Bernardi: Accanto a baia 2

12/01/22, 21:02 - Stefano Dall'Asta, Lavoro: Ok grazie nik

12/01/22, 21:03 - Milo Barozzi: If it's in bypass mode, it should not create deadlocks and/ or slowing the system. Right?

12/01/22, 21:03 - Mihai Soceanu: yes

12/01/22, 21:04 - Milo Barozzi: Please reboot the system if needed. We already agreed with Alexandru that you can do it if it's the solution to transport order issue

12/01/22, 21:24 - Support Technician 23: the restart is done, can someone please test the tpo

12/01/22, 21:27 - Milo Barozzi: I'm sorry darius but I'm not anymore onsite 😞

12/01/22, 21:28 - Stefano Dall'Asta, Lavoro: I have asked

12/01/22, 21:28 - Stefano Dall'Asta, Lavoro: I Hope someone Will answer me

12/01/22, 21:28 - Support Technician 23: Thank you

12/01/22, 22:09 - Support Technician 23: any news ?

13/01/22, 05:37 - Stefano Dall'Asta, Lavoro: No 😞

18/01/22, 20:22 - Razvan Voicu: @Company Employee 18 hello Giacomo

18/01/22, 20:22 - Razvan Voicu: 60562847 where is this pallet now?

18/01/22, 20:23 - Company Employee 18: Hi Raizan I have the pallet 847 on the 148

18/01/22, 20:24 - Company Employee 18: And the 821 on the 1472

18/01/22, 20:24 - Company Employee 18: Can you update pls

18/01/22, 20:24 - Razvan Voicu: let me check

18/01/22, 20:24 - Company Employee 18: Thx

18/01/22, 20:31 - Razvan Voicu: So the pallets are physically ok on the conveyor?

18/01/22, 20:31 - Razvan Voicu: and if you restart conveyor error

18/01/22, 20:31 - Razvan Voicu: from the panel, it doesn't work?

18/01/22, 20:33 - Company Employee 18: I try

18/01/22, 20:34 - Razvan Voicu: Sensor 148B1111 occupied or manipulated

18/01/22, 20:34 - Company Employee 18: IMG-20220118-WA0013.jpg (file allegato)

18/01/22, 20:35 - Company Employee 18: I have the pallet 60562847 on the 148

18/01/22, 20:35 - Razvan Voicu: I think this sensor should be solved first

18/01/22, 20:35 - Company Employee 18: The sensor it is ok!

18/01/22, 20:35 - Company Employee 18: The sensor read the pallet

18/01/22, 20:55 - Razvan Voicu: I think it's ok now

18/01/22, 20:58 - Company Employee 18: Ok I check

18/01/22, 20:58 - Razvan Voicu: I see EMS picked it up

18/01/22, 21:05 - Razvan Voicu: It seems ok

18/01/22, 21:06 - Company Employee 18: Yes perfect Raizan!

18/01/22, 21:06 - Company Employee 18: Thx

21/01/22, 08:50 - Benedetta Zini: IMG-20220121-WA0000.jpg (file allegato)

📞 Hi all! Sorry but we have a lot of red bubble on site. Can you check? 📞

21/01/22, 08:50 - Milo Barozzi: @Support Technician 6 👉

21/01/22, 08:51 - Mihai Soceanu: i check

21/01/22, 08:51 - Milo Barozzi: thx

21/01/22, 08:52 - Milo Barozzi: there are also two ghosts and foiling infeeds

21/01/22, 08:52 - Milo Barozzi: IMG-20220121-WA0001.jpg (file allegato)

21/01/22, 08:55 - Mihai Soceanu: pls stop EMS

21/01/22, 08:55 - Benedetta Zini: yes

21/01/22, 09:24 - Mihai Soceanu: pls start EMS

21/01/22, 09:24 - Nicola Bernardi: 🙏

21/01/22, 09:28 - Milo Barozzi: IMG-20220121-WA0002.jpg (file allegato)

@Support Technician 6 bubbles seem to be vanished, but EMS still not moving

21/01/22, 09:29 - Mihai Soceanu: try to push an vehicle

21/01/22, 09:29 - Mihai Soceanu: manually

21/01/22, 09:29 - Mihai Soceanu: it was smth like that before

21/01/22, 09:30 - Milo Barozzi: Questo messaggio è stato eliminato.

21/01/22, 09:31 - Milo Barozzi: seems moving now, there's only a ghost on SLF*071

21/01/22, 09:31 - Milo Barozzi: and then I think we're back on track

21/01/22, 19:40 - Stefano Dall'Asta, Lavoro: Hi everyone, all terminals are blocked, the message Is CONNECTION TIME OUT. we already made the call to the hot line.

21/01/22, 19:47 - Razvan Voicu: Hi stefano, we are chckin

21/01/22, 20:07 - Razvan Voicu: I talked to Tudor,, he said terminals started

working

21/01/22, 20:09 - Stefano Dall'Asta, Lavoro: Good thank u!

26/01/22, 09:39 - Razvan Voicu: Hello @Company Employee 11

Regarding the station 2 problem

26/01/22, 09:39 - Razvan Voicu: Is the pick order picked ? Do you want to try to repick it ?

26/01/22, 09:42 - Razvan Voicu: I removed the finalized flag, maybe he could try again

26/01/22, 09:42 - Benedetta Zini: Yes thank you!

26/01/22, 09:44 - Razvan Voicu: It's ok now?

26/01/22, 09:44 - Benedetta Zini: I check

26/01/22, 09:50 - Benedetta Zini: Yess it's okay now! 🙏

26/01/22, 09:50 - Benedetta Zini: Thank you very much!

26/01/22, 09:51 - Razvan Voicu: Great, thanks 👍

26/01/22, 11:10 - ~Vecliuc ha abbandonato.

31/01/22, 18:02 - Milo Barozzi ha aggiunto ~Federico Campedelli.

31/01/22, 18:03 - Milo Barozzi ha aggiunto Alexandru Catarau.

31/01/22, 18:05 - Milo Barozzi: @Support Technician 11 @Company Employee 8

@Support Technician 21

DEPLOY CONFIRMED FOR THIS EVENING 20:50 - 21:10

Battle plan is the following:

- 20:35 @Support Technician 21 @Support Technician 11 please put

com.wamas.mfs.core.common.agvDisable = true

- @Company Employee 18 @Company Employee 10 will ensure AGV will finish their last orders. Usually AGV takes 10 minutes to finish their orders

- As soon as no more orders need to be executed (it'll be close to 20:50),

@Support Technician 11 @Support Technician 21 please proceed with deploy

- hopefully everything will be back on track within 21:10

- @Support Technician 11 @Support Technician 21 please put

com.wamas.mfs.core.common.agvDisable = false as soon as you can

31/01/22, 18:06 - Razvan Voicu: Ok. I assume we are talking about italy time

31/01/22, 18:07 - Milo Barozzi: absolutely Italy time, i.e. add 1 hour for Romania

31/01/22, 20:34 - Razvan Voicu: I have set the parameter to true

31/01/22, 20:34 - Razvan Voicu: @Company Employee 18 @Company Employee 10 let me know when orders are done

31/01/22, 20:37 - Company Employee 18: Ok Raizan 👍

31/01/22, 20:45 - Company Employee 18: Raizan the agv are in preventing start!

When you want

31/01/22, 20:46 - Milo Barozzi: Deploy 🙌🙌🙌🙌

31/01/22, 20:48 - Razvan Voicu: Ok, stopping services

31/01/22, 21:03 - Milo Barozzi: How's it going?

31/01/22, 21:04 - Razvan Voicu: Had a small problem, trying again

31/01/22, 21:04 - Razvan Voicu: the stop went fine, the start not so much

31/01/22, 21:07 - Milo Barozzi: 👍 it happened other times, no stress.. second time will be fine 🙏

31/01/22, 21:16 - Milo Barozzi: @Support Technician 21 what about the 2nd try?

31/01/22, 21:17 - Razvan Voicu: We are on it now

31/01/22, 21:19 - Milo Barozzi: Awaiting for further pieces of news, please update me asap

31/01/22, 21:19 - Support Technician 14: Hi Milo

31/01/22, 21:19 - Support Technician 14: We are on it

31/01/22, 21:19 - Support Technician 14: :)

31/01/22, 21:20 - Milo Barozzi: Ok Flaviu, thanks

31/01/22, 21:36 - Milo Barozzi: If at 21.45 you see no hopes please abort deploy

31/01/22, 21:51 - Milo Barozzi: @Support Technician 14 any news?

31/01/22, 21:51 - Support Technician 14: done

31/01/22, 21:52 - Milo Barozzi: Please restart mfs and release AGVs

31/01/22, 21:53 - Support Technician 14: in progress..

31/01/22, 21:53 - Milo Barozzi: @Company Employee 18 please tell me something when everything looks fine

31/01/22, 21:54 - Company Employee 18: Ok milo 👍

31/01/22, 21:56 - Mihai Soceanu: MFS is up

31/01/22, 21:58 - Company Employee 18: I have release the agv! the system I

think, is back on track I stay here to check
31/01/22, 21:59 - Mihai Soceanu: i am also checking
31/01/22, 21:59 - Company Employee 18: Ok thx
31/01/22, 22:02 - Mihai Soceanu: i see it ok
31/01/22, 22:02 - Milo Barozzi: 🤔
31/01/22, 22:06 - Mihai Soceanu: Thank you all for understanding and srry for trouble, seems all is back on track.
31/01/22, 22:06 - Company Employee 18: Ok Mihai thx!
31/01/22, 22:22 - Company Employee 18: We come back to home goodnight guys! Thx
01/02/22, 08:28 - Nicola Bernardi: IMG-20220201-WA0000.jpg (file allegato)
01/02/22, 08:28 - Nicola Bernardi: IMG-20220201-WA0002.jpg (file allegato)
01/02/22, 10:51 - Razvan Voicu: Solved
01/02/22, 11:00 - Milo Barozzi: Just for knowledge, how you solved it? Was something we should be able solving autonomously?
01/02/22, 11:01 - Razvan Voicu: The archiving job was locked from yesterday deploy
01/02/22, 11:02 - Razvan Voicu: If you have acces to SE024 to unlock the job
01/02/22, 11:03 - Milo Barozzi: We cannot access it 🤖 ok! Thx
01/02/22, 11:07 - Razvan Voicu: No problem. We'll be more careful next time about this
01/02/22, 11:24 - Milo Barozzi: 👍thank you
03/02/22, 20:34 - Razvan Voicu: Hello guys.
I will set the parameter agvDisable to true
03/02/22, 20:36 - Razvan Voicu: @Company Employee 10 @Company Employee 18 let me know when AGVs are done please
03/02/22, 20:36 - Company Employee 18: Ok Raizan I send the agv in preventing mode when everithing is ok I tell you
03/02/22, 20:36 - Company Employee 18: Yes
03/02/22, 20:44 - Company Employee 18: Raizan start the deploy
03/02/22, 20:45 - Razvan Voicu: ok, stopping services now
03/02/22, 20:56 - Razvan Voicu: Starting services
03/02/22, 20:59 - Milo Barozzi: Great! Keeping fingers crossed 🤞
03/02/22, 21:00 - Alexandru Catarau: also toes crossed
03/02/22, 21:02 - Milo Barozzi: Tried knees crossed but I'm not Nadia Comaneci and failed 😞😓😓
03/02/22, 21:05 - Razvan Voicu: agvDisable on false, everything done on our side 👍
03/02/22, 21:05 - Milo Barozzi: Let's see if AGVs start moving 🤖
03/02/22, 21:06 - Milo Barozzi: System looks fine to you?
03/02/22, 21:08 - Razvan Voicu: Yes
03/02/22, 21:09 - Razvan Voicu: Some agvs in error , but I guess that's mechanical issue
03/02/22, 21:09 - Milo Barozzi: @Company Employee 18 are AGVs fine from your point of view?
03/02/22, 21:18 - Alexandru Catarau: Yes Milo, looks ok
03/02/22, 21:19 - Alexandru Catarau: red ones are mech issues
03/02/22, 21:21 - Milo Barozzi: It seems everything fine
03/02/22, 21:21 - Milo Barozzi: Thank you all and have a nice evening
03/02/22, 21:22 - Razvan Voicu: Same, thank you all
03/02/22, 21:23 - Alexandru Catarau: have a nice evening, lets hope to not see terminal issue again
04/02/22, 13:50 - Milo Barozzi: IMG-20220204-WA0001.jpg (file allegato)
04/02/22, 13:51 - Milo Barozzi: 🤖@Support Technician 11 @Support Technician 21 pick station 12
04/02/22, 13:51 - Milo Barozzi: Anytime he opens wamas is kicked out with this error message
04/02/22, 13:52 - Razvan Voicu: Questo messaggio è stato eliminato.
04/02/22, 13:52 - Razvan Voicu: I'm checking
04/02/22, 13:59 - Razvan Voicu: Can you please tell him to try to reconnect?
04/02/22, 14:23 - Milo Barozzi: IMG-20220204-WA0002.jpg (file allegato)
04/02/22, 14:23 - Milo Barozzi: Tried but same issue
04/02/22, 14:27 - Milo Barozzi ha aggiunto Daniele MM0perations.
04/02/22, 14:28 - Milo Barozzi: @Support Technician 21 Please spark directly with @Company Employee 24 regarding pick station 12

04/02/22, 14:30 - Razvan Voicu: @Company Employee 24 is the app crashing when starting wamas or when entering station dialog
04/02/22, 14:34 - Daniele MMOperations: It crashed during the picking, he confirmed the picking and during the loading screen the app crashed
04/02/22, 14:44 - Razvan Voicu: Now is ok
04/02/22, 14:44 - Razvan Voicu: ?
04/02/22, 14:45 - Daniele MMOperations: Going to check
04/02/22, 14:45 - Daniele MMOperations: No... same error
04/02/22, 14:45 - Daniele MMOperations: IMG-20220204-WA0003.jpg (file allegato)
04/02/22, 15:01 - Razvan Voicu: Can you open the log on that computer in the location shown and tell me what it writes there?
04/02/22, 15:01 - Razvan Voicu: Or send the log on my mail
razvan.voicu@ssi-schaefer.com
04/02/22, 15:01 - Daniele MMOperations: Sure
04/02/22, 15:05 - Daniele MMOperations: Sent by mail
05/02/22, 15:09 - Milo Barozzi: IMG-20220205-WA0001.jpg (file allegato)
Dear All,
when entering picking in all manual areas all users are getting the following error "unknown error have occurred":
It happens for pCanaletto, pViazza and pScaffale for sure.
We kindly ask you to fix ASAP, since otherwise on Mon 07.03 at 5:30 AM we'll have tenth of people blocked.
Thanks in advance for your kind reply.
07/02/22, 07:45 - Company Employee 18: Dear all    we have only 2 picking station working! I have open a ticket at 6 but Darius is trying to solve the problem but I think he need some help @Support Technician 6 @Support Technician 21
07/02/22, 07:49 - Milo Barozzi: @Support Technician 11 @Support Technician 6 @Support Technician 21 @Support Technician 14 this is a Red Alam, we're almost stopped in automated area. Please restore the system ASAP. Contact @Company Employee 18 If you need some help, I'm currently not in office until 8.30
07/02/22, 08:14 - Milo Barozzi: @Support Technician 11 @Support Technician 23 @Support Technician 6 @Support Technician 14 @Support Technician 21 news?
07/02/22, 09:08 - Support Technician 23: Hello,
Can you please confirm that the system is back on track?
07/02/22, 09:08 - Company Employee 18: I try to check everithing Darius
07/02/22, 09:11 - Company Employee 18: Darius now everithing picking station are working! Only the picking station 2 we try to fix the problem
07/02/22, 09:14 - Support Technician 23: Thanks for checking
07/02/22, 09:15 - Company Employee 18: 
07/02/22, 09:15 - Milo Barozzi: it seems are all working except pick station #2 for which pallets needing to work are going to pick station
07/02/22, 09:32 - Support Technician 23: Is it working now? I saw that orders were processed there
07/02/22, 09:37 - Milo Barozzi: confirmed 100% working
07/02/22, 09:37 - Milo Barozzi: thanks Darius
07/02/22, 09:40 - Support Technician 23: Thanks and sorry for the inconvenience
07/02/22, 09:41 - Milo Barozzi: Thank you so much for helping. Blocking troubles are not the best way for starting the week 😞 Hope it'll not occur anymore in the future
10/02/22, 18:50 - Milo Barozzi: @Support Technician 11 @Company Employee 8 @Support Technician 21
DEPLOY CONFIRMED FOR THIS EVENING 20:50 - 21:10
Battle plan is the following:
- 20:35 @Support Technician 21 @Support Technician 11 please put
com.wamas.mfs.core.common.agvDisable = true
- @Company Employee 12 will ensure AGV will finish their last orders. Usually AGV takes 10 minutes to finish their orders
- As soon as no more orders need to be executed (it'll be close to 20:50), @Support Technician 11 @Support Technician 21 please proceed with deploy
- hopefully everything will be back on track within 21:10
- @Support Technician 11 @Support Technician 21 please put
com.wamas.mfs.core.common.agvDisable = false as soon as you can
10/02/22, 18:51 - Razvan Voicu: Roger that 

10/02/22, 20:34 - Razvan Voicu: @Company Employee 12 I put parameter AGV disable on true
10/02/22, 20:42 - Andrea Brunetti: Ok, but there are still agv with orders
10/02/22, 20:42 - Razvan Voicu: Let me know when they are finished
10/02/22, 20:48 - Andrea Brunetti: All the agv have finished
10/02/22, 20:48 - Razvan Voicu: Ok, I will log out the user snow
10/02/22, 20:49 - Andrea Brunetti: Okay
10/02/22, 21:09 - Razvan Voicu: @Company Employee 12 @Company Employee 16 Deploy done, parameter set to false, services running, Green all the way!
10/02/22, 21:10 - Andrea Brunetti: Yes full green
10/02/22, 21:19 - Milo Barozzi: It seems all fine...goodnight everybody! Thank you!
10/02/22, 21:21 - Razvan Voicu: Thank you
11/02/22, 06:38 - Stefano Dall'Asta, Lavoro: Hi everyone, i still don't know if it is related to the deploy but we have no connection between wamas and as400
11/02/22, 07:56 - Stefano Dall'Asta, Lavoro: This is the status of DI004
11/02/22, 07:57 - Stefano Dall'Asta, Lavoro: IMG-20220211-WA0000.jpg (file allegato)
11/02/22, 08:10 - Razvan Voicu: I check
11/02/22, 08:32 - Razvan Voicu: Should be ok
11/02/22, 08:35 - Benedetta Zini: What was the problem?
11/02/22, 08:36 - Milo Barozzi: Did you forget to reactivate senders after deploy?
11/02/22, 08:36 - Razvan Voicu: No, the sender worker was activated
11/02/22, 08:36 - Razvan Voicu: I just did a stop start
11/02/22, 08:37 - Razvan Voicu: I'm still looking why
11/02/22, 08:37 - Razvan Voicu: Might be related to the fact that we added a new queue for messaging for totem
11/02/22, 08:37 - Razvan Voicu: But that queue was in production added a couple of days ago
11/02/22, 08:38 - Milo Barozzi: Correct
11/02/22, 18:48 - Nicola Bernardi: IMG-20220211-WA0004.jpg (file allegato)
Please help 🚩🚩🚩
11/02/22, 18:58 - Razvan Voicu: checking
11/02/22, 19:05 - Mihai Soceanu: pls stop EMS
11/02/22, 19:08 - Mihai Soceanu: pls start again EMS
11/02/22, 20:45 - Razvan Voicu: Hello everyone. Sorry for the late message, regarding ticket 587395, a particular problem found was for OBD OBD0000337294, PPLU for item ATLA6YB, the picking doesn't start because the only stock for this item is in location S02 POS which I don't believe is a picking location, in case there's somebody in this chat whom may be concerned.
Thank you
12/02/22, 07:20 - Company Employee 18: Hello guys can you check the BP07 D01 i have a pallet with this error
12/02/22, 07:20 - Company Employee 18: IMG-20220212-WA0000.jpg (file allegato)
15/02/22, 17:13 - Milo Barozzi: IMG-20220215-WA0002.jpg (file allegato)
RED ALARM 🚩
TPO are not created for pallets in automated area
21/02/22, 06:36 - Company Employee 18: Hi guys I have already opened a ticket because the buffer of the picking station 2-7-8-9-10 don't going to the destination empty can you help ASAP?
21/02/22, 06:38 - Company Employee 18: @Support Technician 6 @Support Technician 21
21/02/22, 06:43 - Stefano Dall'Asta, Lavoro: Hi everyone, se have a problem of comunicatomi between wamas and As400 too. This is the situation of DI004
21/02/22, 06:43 - Stefano Dall'Asta, Lavoro: IMG-20220222-WA0000.jpg (file allegato)
21/02/22, 08:04 - Stefano Dall'Asta, Lavoro: Questo messaggio è stato eliminato.
21/02/22, 08:04 - Stefano Dall'Asta, Lavoro: Questo messaggio è stato eliminato.
21/02/22, 08:18 - Razvan Voicu: should be solved
21/02/22, 08:43 - Stefano Dall'Asta, Lavoro: Yes it is ok, thanks
24/02/22, 13:52 - Nicola Bernardi: Can you check asap the system? 🚩🚩🚩 we have more problem
24/02/22, 13:53 - Nicola Bernardi: IMG-20220224-WA0002.jpg (file allegato)

24/02/22, 13:53 - Nicola Bernardi: IMG-20220224-WA0005.jpg (file allegato)
24/02/22, 13:53 - Nicola Bernardi: IMG-20220224-WA0003.jpg (file allegato)
24/02/22, 13:53 - Nicola Bernardi: IMG-20220224-WA0004.jpg (file allegato)
24/02/22, 13:55 - Mihai Soceanu: i check
24/02/22, 13:55 - Nicola Bernardi: 👍
24/02/22, 14:06 - Mihai Soceanu: problem is related to printer
24/02/22, 14:06 - Mihai Soceanu: i mean printing
24/02/22, 14:08 - Nicola Bernardi: Okok, can you solve this?
24/02/22, 14:08 - Mihai Soceanu: pls put in manual
24/02/22, 14:08 - Mihai Soceanu: IMG-20220224-WA0006.jpg (file allegato)
24/02/22, 14:08 - Mihai Soceanu: conveyour 296
24/02/22, 14:09 - Mihai Soceanu: i try a woraround
24/02/22, 14:10 - Nicola Bernardi: □
24/02/22, 14:16 - Nicola Bernardi: Can I put in auto the CU296??
24/02/22, 14:16 - Mihai Soceanu: pls do not
24/02/22, 14:16 - Mihai Soceanu: ...
24/02/22, 14:16 - Mihai Soceanu: wait a bit
24/02/22, 14:17 - Mihai Soceanu: i did a woraround
24/02/22, 14:17 - Mihai Soceanu: so the rest of system is moving
24/02/22, 14:17 - Nicola Bernardi: Yes yes
24/02/22, 14:18 - Mihai Soceanu: did you reported a ticket
24/02/22, 14:18 - Mihai Soceanu: pls
24/02/22, 14:18 - Mihai Soceanu: ?
24/02/22, 14:19 - Nicola Bernardi: I call now the assistance for create a ticket
24/02/22, 14:20 - Mihai Soceanu: please
24/02/22, 14:20 - Mihai Soceanu: and tell them that ypu have problems with
printing service
24/02/22, 14:27 - Nicola Bernardi: Write me when I reput the printer on
24/02/22, 14:35 - Mihai Soceanu: pls put back in auto]
24/02/22, 14:37 - Mihai Soceanu: pls put back in manual
24/02/22, 14:37 - Mihai Soceanu: ...
24/02/22, 14:38 - Nicola Bernardi: 👍
24/02/22, 14:44 - Mihai Soceanu: try again pls
24/02/22, 14:45 - Nicola Bernardi: No 😞
24/02/22, 14:47 - Mihai Soceanu: confirm the error
24/02/22, 14:47 - Mihai Soceanu: ?
24/02/22, 14:47 - Nicola Bernardi: Yes but don't run 😞
24/02/22, 14:52 - Mihai Soceanu: pls confirm again error
24/02/22, 14:53 - Nicola Bernardi: Still in error
24/02/22, 15:01 - Mihai Soceanu: the same ?
24/02/22, 15:01 - Nicola Bernardi: Yes
24/02/22, 15:02 - Mihai Soceanu: pls reset
24/02/22, 15:05 - Nicola Bernardi: Now it seems to work, what was the problem?
24/02/22, 15:06 - Mihai Soceanu: priniting service created some problems
24/02/22, 15:10 - Milo Barozzi: thanks for prompt intervention Mihai 👍
25/02/22, 11:28 - Company Employee 18: Questo messaggio è stato eliminato.
01/03/22, 12:54 - Razvan Voicu: Hi @Company Employee 13
01/03/22, 12:54 - Razvan Voicu: I see on lighthouse it says inverter problem on
conveyor, I believe this is a mecanical problem
01/03/22, 12:55 - Razvan Voicu: I will redirect your ticket to PLC
01/03/22, 13:02 - Federico Gatti, Personale: Hi Razvan, in my opinion, it could
be a problem on a safety signal
01/03/22, 13:02 - Razvan Voicu: Unfortunately my expertise here is none. We have
redirected this to the PLC team in friesach, they should contact soon
01/03/22, 13:03 - Federico Gatti, Personale: Ok, thank you
02/03/22, 10:26 - Milo Barozzi: IMG-20220302-WA0001.jpg (file allegato)
@Support Technician 11 @Support Technician 21 @Support Technician 6 red alarm...
02/03/22, 10:30 - Mihai Soceanu: i check
02/03/22, 10:34 - Andrea Brunetti: It seems to be all okay
02/03/22, 10:34 - Mihai Soceanu: yes
02/03/22, 10:34 - Mihai Soceanu: i found the problem
02/03/22, 10:35 - Mihai Soceanu: give me 5 min pls and i will explain
02/03/22, 10:35 - Milo Barozzi: we had no doubt about that 🤖
02/03/22, 10:35 - Milo Barozzi: sure, take your time

04/03/22, 19:16 - Razvan Voicu: Hello @Company Employee 18
I believe everything is ok now
04/03/22, 19:54 - Company Employee 18: Yes Raizan everithing work good now
04/03/22, 19:54 - Company Employee 18: Thx
06/03/22, 15:47 - Razvan Voicu: Hello everyone,
Deploy was done, agvDisable set to false, everything seems fine
06/03/22, 16:06 - Milo Barozzi: Thanks Razvan. Keeping fingers crossed for tomorrow 🍀🍀🍀
10/03/22, 12:46 - Company Employee 18: IMG-20220310-WA0002.jpg (file allegato)
10/03/22, 12:48 - Company Employee 18: Hi guys we have again this issue! Can you check what happens? @Support Technician 21 @Support Technician 6
14/03/22, 06:39 - Stefano Dall'Asta, Lavoro: Hi everyone, we have a problem of communication between wamas and As400 too. This Is the situation of DI004
14/03/22, 06:39 - Stefano Dall'Asta, Lavoro: IMG-20220314-WA0001.jpg (file allegato)
14/03/22, 06:40 - Razvan Voicu: hi stefnao we check
14/03/22, 06:42 - Razvan Voicu: Done
14/03/22, 06:59 - Stefano Dall'Asta, Lavoro: Now It works, thank you
14/03/22, 07:26 - Razvan Voicu: great thanks
14/03/22, 09:00 - Milo Barozzi: SSI4atl

admin
14/03/22, 09:00 - Milo Barozzi: Did you change pw or user? We can't access...
14/03/22, 09:01 - Alexandru Catarau: no pass changed
14/03/22, 09:01 - Milo Barozzi: interesting, is refusing access
14/03/22, 09:01 - Alexandru Catarau: sorry
14/03/22, 09:01 - Alexandru Catarau: changed
14/03/22, 09:02 - Alexandru Catarau: a sec
14/03/22, 09:02 - Milo Barozzi: 🤔👉
14/03/22, 09:08 - Milo Barozzi: which is the new one?
15/03/22, 08:16 - Razvan Voicu: Hello guys. I have logged out user out of station 12. Can you please tell him to relog on station dialog?
15/03/22, 08:23 - Razvan Voicu: Is it workign now?
15/03/22, 08:27 - Milo Barozzi: Hi Razvan, Leonardo (who reported the issue) is not into this group. He forwarded him the info to ask the picker to log again. As soon as he replies to me, he'll tell you
15/03/22, 08:27 - Razvan Voicu: Thanks. Should I talk with him via email?
15/03/22, 08:27 - Nicola Bernardi: @Company Employee 16 hanno già fatto in baia
15/03/22, 08:27 - Milo Barozzi: e funziona?
15/03/22, 08:28 - Milo Barozzi: I don't know if he speaks English.....
15/03/22, 08:28 - Nicola Bernardi: Sisi
15/03/22, 08:29 - Milo Barozzi: @Support Technician 21 pick station #12 works
15/03/22, 08:29 - Milo Barozzi: @Support Technician 21 I think the issue of pick station #12 was an already reported issue. I'm checking for the issue number in XLS file
15/03/22, 08:30 - Razvan Voicu: Ok sure
27/03/22, 16:01 - Razvan Voicu: Hello, deploy is done, everything is green
com.wamas.mfs.core.common.srmMaintenanceAccessBlock - set on true
com.wamas.mfs.core.common.agvDisable - set to false

Thank you, have a nice weekend!
27/03/22, 16:03 - Razvan Voicu: Also, don't forget about the new parameter
com.wamas.biz.prj.DestinationForSpontaneousTpo - set default value to S26 55-34-00
27/03/22, 16:31 - Milo Barozzi: Super! Thank you!
For safety.... these values were the ones set before you did the deploy right?
27/03/22, 16:31 - Milo Barozzi: That's nice! Thank you!
27/03/22, 16:31 - Milo Barozzi: Wish you a nice weekend too
27/03/22, 16:34 - Razvan Voicu: Yes
27/03/22, 16:37 - Milo Barozzi: Super! Thanks again!
28/03/22, 07:14 - Razvan Voicu: Hello. The location S26 55-34-00 was unfortunately blocked so that's why the spontanous didn't work. Now everything seems ok
04/04/22, 07:47 - Stefano Dall'Asta, Lavoro: Hi everyone, we have a problem of

communication between wamas and As400 too. This Is the situation of DI004
04/04/22, 07:47 - Stefano Dall'Asta, Lavoro: IMG-20220404-WA0000.jpg (file allegato)
04/04/22, 07:47 - Alexandru Catarau: ill check
04/04/22, 07:47 - Alexandru Catarau: a sec
04/04/22, 07:51 - Alexandru Catarau: pls check now
04/04/22, 07:52 - Stefano Dall'Asta, Lavoro: Still the same
04/04/22, 07:55 - Stefano Dall'Asta, Lavoro: Another thing..@Support Technician 21 this morning we have the problem on manual and automatic transports too.
04/04/22, 08:06 - Milo Barozzi: @Support Technician 21 @Support Technician 11 situation is extremely critical.
Me and @Company Employee 15 are ill at home and cannot provide support onsite. Data is not going from WAMAS to As400, transports (manual allocation) are not working.
The majority of manual activities are not possible to be done.
Please, evaluate a rollback deploy.
04/04/22, 08:07 - Alexandru Catarau: we are all connected and investigating
04/04/22, 08:07 - Alexandru Catarau: will keep you informed
04/04/22, 08:10 - Alexandru Catarau: as400 communication done
04/04/22, 08:10 - Alexandru Catarau: working now
04/04/22, 08:11 - Stefano Dall'Asta, Lavoro: Comunicazione ok, i confirm
04/04/22, 08:15 - Alexandru Catarau: Milo, can we perform a rollback?
04/04/22, 08:16 - Milo Barozzi: Yes, please do it
04/04/22, 08:17 - Alexandru Catarau: stop yhe activity pls in the warehouse
04/04/22, 08:17 - Milo Barozzi: You can start as soon as you want but before please put agvdisable parameter to true and wait for agv to finish their missions
04/04/22, 08:17 - Alexandru Catarau: i will enable agvDisable param
04/04/22, 08:17 - Alexandru Catarau: yes
04/04/22, 08:18 - Milo Barozzi: Otherwise at restart we'll have the hell of issues in automated part
04/04/22, 08:44 - Milo Barozzi: AGV finished. Please start rollback and write updates here
04/04/22, 08:47 - Milo Barozzi: @Support Technician 11 @Support Technician 21 are you performing rollback?
04/04/22, 08:48 - Milo Barozzi: Please do it ASAP
04/04/22, 08:48 - Alexandru Catarau: yes
04/04/22, 08:48 - Alexandru Catarau: doing it now
04/04/22, 08:56 - Milo Barozzi: Please notify when finished
04/04/22, 09:12 - Alexandru Catarau: all started
04/04/22, 09:12 - Alexandru Catarau: pls check
04/04/22, 09:13 - Benedetta Zini: Automatic area is all in manual
04/04/22, 09:14 - Alexandru Catarau: loading
04/04/22, 09:14 - Alexandru Catarau: a min
04/04/22, 09:19 - Milo Barozzi: Hope everything is fine now
04/04/22, 09:21 - Alexandru Catarau: automatic started
04/04/22, 09:21 - Alexandru Catarau: pls confirm
04/04/22, 09:21 - Alexandru Catarau: we are checking now manual
04/04/22, 09:30 - Stefano Dall'Asta, Lavoro: Obdc are still not working
04/04/22, 09:30 - Stefano Dall'Asta, Lavoro: IMG-20220404-WA0001.jpg (file allegato)
04/04/22, 09:31 - Alexandru Catarau: what are you trying to do?
04/04/22, 09:33 - Razvan Voicu: Can you please try manual transports from mobile again?
04/04/22, 09:33 - Alexandru Catarau: Stefano, in few moments CUST user should be ok
04/04/22, 09:36 - Alexandru Catarau: ODBC should be ok
04/04/22, 09:37 - Benedetta Zini: manual transports don't work
04/04/22, 09:37 - Benedetta Zini: IMG-20220404-WA0002.jpg (file allegato)
04/04/22, 09:37 - Benedetta Zini: IMG-20220404-WA0003.jpg (file allegato)
04/04/22, 09:39 - Chiara Lodesani, Lavoro: they are ok
04/04/22, 09:39 - Company Employee 2: Confirmed
04/04/22, 09:39 - Benedetta Zini: IMG-20220404-WA0004.jpg (file allegato)
Red bubbles in automatic area

04/04/22, 09:42 - Alexandru Catarau: few more min pls
04/04/22, 09:43 - Benedetta Zini: Okay
04/04/22, 09:51 - Razvan Voicu: Can we check manual transports now?
04/04/22, 09:51 - Benedetta Zini: YES
04/04/22, 09:54 - Benedetta Zini: All transports don't work
04/04/22, 09:54 - Razvan Voicu: can you give me a LU id?
04/04/22, 09:54 - Razvan Voicu: that you tried
04/04/22, 09:55 - Benedetta Zini: 06232748
04/04/22, 09:55 - Benedetta Zini: for example
04/04/22, 09:55 - Benedetta Zini: or this 51010465
04/04/22, 10:02 - Benedetta Zini: If i select UM
04/04/22, 10:02 - Benedetta Zini: IMG-20220404-WA0005.jpg (file allegato)
04/04/22, 10:03 - Razvan Voicu: I canceled all TPOs from S04 MAV
04/04/22, 10:03 - Benedetta Zini: IMG-20220404-WA0006.jpg (file allegato)
and then
04/04/22, 10:03 - Razvan Voicu: They need to be recreated
04/04/22, 10:04 - Razvan Voicu: Any other examples of LUs not working?
04/04/22, 10:04 - Benedetta Zini: IMG-20220404-WA0007.jpg (file allegato)
no TPO for outbound goods
04/04/22, 10:07 - Razvan Voicu: If you are talking about TPOS from S04 MAV ->
other location , I canceled them all, they need to be recreated
04/04/22, 10:08 - Benedetta Zini: All LUs that have to move with manual
transport don't work
04/04/22, 10:08 - Milo Barozzi: Will not wamas recreate them automatically??
04/04/22, 10:09 - Benedetta Zini: not only from S04 MAV to other locations
04/04/22, 10:09 - Benedetta Zini: All LUs that we need to move them with manual
transport
04/04/22, 10:10 - Razvan Voicu: Can you give me LU-ID that you try?
04/04/22, 10:10 - Razvan Voicu: Depends on the TPO
04/04/22, 10:11 - Benedetta Zini: 51230221
04/04/22, 10:11 - Benedetta Zini: 51377436
04/04/22, 10:11 - Milo Barozzi: All TOS you cancelled please make in manner
they're recreated
04/04/22, 10:11 - Milo Barozzi: We cannot do it sorry
04/04/22, 10:14 - Milo Barozzi: @Support Technician 11 @Support Technician 21
Please escalate / ask for help if needed. Manual area is blocked since 5 hours
and a half...it's critical
04/04/22, 10:14 - Milo Barozzi: to restart ASAP
04/04/22, 10:20 - Alexandru Catarau: did that already
04/04/22, 10:21 - Milo Barozzi: Thanks
04/04/22, 10:21 - Milo Barozzi: Put all tanks on battlefield please
04/04/22, 10:29 - Alexandru Catarau: they are all in
04/04/22, 10:29 - Milo Barozzi: Ok
04/04/22, 10:39 - Razvan Voicu: can you try again and give me another example?
04/04/22, 10:39 - Benedetta Zini: Yes
04/04/22, 10:42 - Benedetta Zini: I'm checking
04/04/22, 10:50 - Benedetta Zini: It works!
04/04/22, 10:51 - Alexandru Catarau: pls if you see some overlooked LUs, let us
know asap
04/04/22, 10:53 - Benedetta Zini: Yes sure!Bbut for now it seems we are back on
track again! Thank you very much
04/04/22, 12:02 - Benedetta Zini: Hi All! It is happening again with manual T0
04/04/22, 12:03 - Benedetta Zini: 60975142
04/04/22, 12:03 - Benedetta Zini: 59474164
04/04/22, 12:04 - Benedetta Zini: 60975141
04/04/22, 12:04 - Benedetta Zini: 51291222
04/04/22, 12:05 - Benedetta Zini: 58881343
04/04/22, 12:05 - Benedetta Zini: Some example of LUS
04/04/22, 12:06 - Benedetta Zini: Could you please check ASAP?
04/04/22, 12:12 - Razvan Voicu: i check
04/04/22, 12:31 - Benedetta Zini: Any news?
04/04/22, 12:35 - Razvan Voicu: Still checking
04/04/22, 12:39 - Benedetta Zini: Other example of LUs are: 59159709, 57631107,
60441657

04/04/22, 12:59 - Razvan Voicu: So a workaround for now for this is to go in MF014 and suspend+resume the TPO
04/04/22, 13:03 - Razvan Voicu: @Company Employee 11 regarding the wood error
04/04/22, 13:03 - Razvan Voicu: This has a special flow for resolving the error
04/04/22, 13:04 - Razvan Voicu: As far as I remember, an empty LU must be on the other nok location (MDP05L02) so the swap can be done
04/04/22, 13:07 - Benedetta Zini: Yes but this flow is for pallet that really have wood error. If pallet it's okay we normally resolve error and approve LU
04/04/22, 13:08 - Razvan Voicu: But the error in WAMAS is wood error
04/04/22, 13:08 - Razvan Voicu: The code doesn't know physically what's going on there, we just see wood error
04/04/22, 13:08 - Razvan Voicu: I can change the error name and then resolve it
04/04/22, 13:09 - Razvan Voicu: It doesn't work because the flow checks for MDP05L02 pallet, it expects to be a temp, does the swap between temp and our error lu and then deletes the temp from system. Now we try to delete the shipment LU
04/04/22, 13:09 - Razvan Voicu: let me know if you want me to get rid of the error
04/04/22, 13:26 - Benedetta Zini: We try with this way... But i don't understand why other times it let you cancel wood error without asking for another one
04/04/22, 13:31 - Benedetta Zini: Can you tell me for how long? I think it is untenable suspend+resume TPO for all afternoon
04/04/22, 13:33 - Benedetta Zini: Users work with terminals and they don't have MF014... So they have to go to office and asking for suspend+resume...
04/04/22, 13:36 - Razvan Voicu: for wood_gap and clearance_wood we always require another LU to be on the 02 position
04/04/22, 13:37 - Razvan Voicu: If nothing is there, then we don't do anything. If this doesn't happen, then it might be something weird that should be checked
04/04/22, 13:37 - Razvan Voicu: We are analyzing for a solution, but I don't have an estimation
04/04/22, 13:40 - Benedetta Zini: Okay, I'll go into the different cases of wood error and I'll let you know
04/04/22, 13:41 - Benedetta Zini: the sooner you solve the better...
04/04/22, 14:21 - Razvan Voicu: @Company Employee 11 I have forced the synchronization of tpos from some areas
04/04/22, 14:21 - Razvan Voicu: Please let me know if you find more LUs that you can't do manual tpo allocation

04/04/22, 14:47 - Razvan Voicu: I resetted all the pallets from S24

04/04/22, 14:47 - Razvan Voicu: TPOs from S24 shul work now
04/04/22, 14:47 - Razvan Voicu: should*
04/04/22, 14:50 - Benedetta Zini: okay
05/04/22, 07:37 - Company Employee 18: Hello everyone every pallet that comes out of the foiling line gets blocked and you have to recreate the transport order please we need urgent assistance
We has already been opened a ticket from your hotline
05/04/22, 07:50 - Company Employee 18: Now we have every picking station blocked we need your help ASAP   
05/04/22, 08:00 - Benedetta Zini: There is a problem with T0 in automatic area. Could you please take a look ASAP?
05/04/22, 08:01 - Mihai Soceanu: wait 1 min pls
05/04/22, 08:01 - Mihai Soceanu: i am checking
05/04/22, 08:01 - Benedetta Zini: Thank you
05/04/22, 08:02 - Mihai Soceanu: will start back
05/04/22, 08:02 - Mihai Soceanu: is related to leftover from yesterday...
05/04/22, 08:03 - Benedetta Zini: Okay 😊
05/04/22, 08:03 - Mihai Soceanu: srry...
05/04/22, 08:03 - Benedetta Zini: Now it's okay?
05/04/22, 08:05 - Mihai Soceanu: i had to cancel TPO for 60598768
05/04/22, 08:05 - Mihai Soceanu: yes now is ok
05/04/22, 08:05 - Mihai Soceanu: 60598768 had to go to S04 MAV
05/04/22, 08:10 - Company Employee 18: I check where us
05/04/22, 08:10 - Mihai Soceanu: back on track
05/04/22, 08:10 - Company Employee 18: Yes thx 🙏🙏
05/04/22, 08:11 - Mihai Soceanu: np, welcome
05/04/22, 08:12 - Company Employee 18: For wamas is located logically s24 04 11 00
05/04/22, 08:13 - Company Employee 18: If you want, I go to check if these pallet is here
05/04/22, 08:13 - Mihai Soceanu: ok :) thx
05/04/22, 08:13 - Company Employee 18: Ok I'm going here 🚶🚶
05/04/22, 10:05 - Benedetta Zini: Hi all, we still have problems with T0 in manual area

05/04/22, 10:07 - Benedetta Zini: If I do suspend+resume it works, but it's slowing us down...
05/04/22, 10:18 - Support Technician 23: hello
please let us know if we can perform a restart of the mobile worker, by this we think that the suspend - resume should be avoided and the transport orders should work without any other intervention
05/04/22, 10:26 - Benedetta Zini: Okay, you can perform a restart of mobile worker

05/04/22, 10:29 - Support Technician 23: done
05/04/22, 10:29 - Support Technician 23: please check and let us know if it helped
05/04/22, 10:30 - Benedetta Zini: yes
05/04/22, 10:30 - Benedetta Zini: I check
05/04/22, 11:15 - Benedetta Zini: It seems to work now 🤞 In these 45 minutes no operator has reported the problem with T0
05/04/22, 11:16 - Alexandru Catarau: thank you Benedetta for the feedback!
05/04/22, 11:18 - Benedetta Zini: Thanks to you!
05/04/22, 19:33 - Nicola Bernardi: Hi all, we have a problem on all system, can you check please? (The ticket are open in a minute)
05/04/22, 19:51 - Nicola Bernardi: Ticket ID 600385
06/04/22, 16:57 - Benedetta Zini: Dear all, we have a problem at infeed line when user put a pallet on CU001 or CU007 it create a ghost pallet in Lighthouse, in WAMAS there are LU and TEMPXXXX and in MF266 there is only T_00000000000000000000 and not the LU of pallet... Could you please take a look of this problem? Is related to the problem we had yesterday?
06/04/22, 16:57 - Benedetta Zini: IMG-20220406-WA0001.jpg (file allegato)
06/04/22, 16:58 - Benedetta Zini: LUs are 60957988 and 85162156
06/04/22, 16:58 - Benedetta Zini: IMG-20220406-WA0002.jpg (file allegato)
06/04/22, 16:59 - Benedetta Zini: IMG-20220406-WA0004.jpg (file allegato)
06/04/22, 17:06 - Benedetta Zini: We tried to cancel T_0000000000000000 but it remain in MF266
06/04/22, 17:07 - Benedetta Zini: sorry it create another SOC-ID
06/04/22, 17:07 - Benedetta Zini: IMG-20220406-WA0003.jpg (file allegato)
06/04/22, 17:07 - Benedetta Zini: and cancel ghost pallet from Lighthouse
06/04/22, 17:08 - Support Technician 23: Hello
Is there anything physical on the conveyor?
06/04/22, 17:09 - Benedetta Zini: now on CU001 not
06/04/22, 17:09 - Support Technician 23: What about 7?
06/04/22, 17:09 - Benedetta Zini: on 7 yes there is 85162156
06/04/22, 17:09 - Support Technician 23: Can you please check the sensors and make sure there is no dust on them ?
06/04/22, 17:11 - Benedetta Zini: No dust on sensors
06/04/22, 17:15 - Benedetta Zini: Now for 60957988 terminal says that it doesn't have T0
06/04/22, 17:15 - Benedetta Zini: But it has T0
06/04/22, 17:20 - Benedetta Zini: We did suspend+reset for 85162156 and it worked
06/04/22, 17:21 - Support Technician 23: Have you tried the suspend resume ?
06/04/22, 17:21 - Benedetta Zini: resume sorry
06/04/22, 17:21 - Benedetta Zini: yes yes
06/04/22, 17:21 - Support Technician 23: On 609*
06/04/22, 17:22 - Benedetta Zini: No on 85162156
06/04/22, 17:22 - Benedetta Zini: Now we are trying with 609*
06/04/22, 17:22 - Support Technician 23: Can you please try on the other one as well?
06/04/22, 17:22 - Benedetta Zini: yes yes but phisically is in S04 MAV
06/04/22, 17:23 - Benedetta Zini: it worked
06/04/22, 17:23 - Support Technician 23: Ok
06/04/22, 17:24 - Support Technician 23: Please let me know if there are any other pallets that have this issue ?
06/04/22, 17:25 - Benedetta Zini: 71351386 now on CU001
06/04/22, 17:26 - Support Technician 23: I will restart the worker, is it ok for you ?
06/04/22, 17:26 - Benedetta Zini: you mean terminal?
06/04/22, 17:26 - Support Technician 23: Yes
06/04/22, 17:26 - Benedetta Zini: Yes it's okay
06/04/22, 17:27 - Benedetta Zini: let me know when it is finished
06/04/22, 17:27 - Support Technician 23: Done
06/04/22, 17:27 - Benedetta Zini: okay thanks
06/04/22, 17:28 - Benedetta Zini: What is the root cause?
06/04/22, 17:30 - Benedetta Zini: 71351386 on CU001 doesn't go
06/04/22, 17:31 - Support Technician 23: I will check to see if it's the same as

the ones from previous days

06/04/22, 17:32 - Benedetta Zini: okay
06/04/22, 17:32 - Support Technician 23: We check
06/04/22, 17:33 - Benedetta Zini: It worked
06/04/22, 17:34 - Mihai Soceanu: pls try with a new one
06/04/22, 17:34 - Benedetta Zini: yes yes
06/04/22, 17:35 - Mihai Soceanu: thx
06/04/22, 17:56 - Benedetta Zini: All pallets we put on CU001 and CU007 have left so far
13/04/22, 08:52 - Benedetta Zini: Hi all! I sent an email for issue D202 (ticket ID #585604) that is marked "need to be checked live" in file XLS and now picking station #12 is blocked about this problem. Is there anyone available now for taking logs?
13/04/22, 08:52 - Benedetta Zini: IMG-20220413-WA0001.jpg (file allegato)
13/04/22, 08:56 - Razvan Voicu: Hi. Adrian is looking into it
13/04/22, 08:56 - Benedetta Zini: Perfect! Thank you!
15/04/22, 17:25 - Benedetta Zini: Hi all! I sent an email for issue A104 (ticket ID #581183) that is marked "need to be checked live" in file XLS and now picking station #9 is blocked about this problem. Is there anyone available now for taking logs?
15/04/22, 17:25 - Benedetta Zini: IMG-20220415-WA0002.jpg (file allegato)
26/04/22, 11:46 - Benedetta Zini: Hi All! We have a problem in automatic area
26/04/22, 11:46 - Benedetta Zini: IMG-20220426-WA0004.jpg (file allegato)
26/04/22, 11:46 - Benedetta Zini: Could you please take a look?
26/04/22, 11:56 - Benedetta Zini: I have already sent an email
26/04/22, 12:01 - Mihai Soceanu: 60440210 had TPO to go to S04 MAV
26/04/22, 12:02 - Mihai Soceanu: this was making a queue to crash
26/04/22, 12:02 - Mihai Soceanu: now we wait
26/04/22, 12:02 - Mihai Soceanu: ...
26/04/22, 12:03 - Mihai Soceanu: i keep en eye on the queue
26/04/22, 12:03 - Benedetta Zini: Hi Mihai! Thank you!
26/04/22, 12:07 - Mihai Soceanu: np
26/04/22, 12:07 - Mihai Soceanu: seems ok now
26/04/22, 12:07 - Benedetta Zini: Yes TPOs are working now
26/04/22, 12:08 - Benedetta Zini: We noticed that in MF266 SOC-ID for pallets at infeed and foiling were in status "complete"
26/04/22, 12:09 - Benedetta Zini: Is it related to 60440210 ?
26/04/22, 12:10 - Mihai Soceanu: yes
26/04/22, 12:10 - Mihai Soceanu: all failure was related to 60440210
26/04/22, 12:10 - Mihai Soceanu: ...
26/04/22, 12:13 - Benedetta Zini: What is the root cause related to LU 60440210?
26/04/22, 12:14 - Benedetta Zini: It is happening again now
26/04/22, 12:14 - Mihai Soceanu: i do not know i send it to CSS to be analyzed, I think they will come back to you
26/04/22, 12:15 - Mihai Soceanu: did you tried to recreate again TPO ?
26/04/22, 12:15 - Benedetta Zini: Okay thank you!
26/04/22, 12:15 - Mihai Soceanu: srry is manual area stuff
26/04/22, 12:15 - Benedetta Zini: not yet
28/04/22, 14:51 - Milo Barozzi ha aggiunto Company Employee 5.
28/04/22, 14:54 - Milo Barozzi ha aggiunto Adrian Cindea.
02/05/22, 08:40 - Milo Barozzi: Good morning @Support Technician 12 and to all the Team! Today is the day! Let's touch base at round about 12:45 Italian time... 🍷🍷🍷
02/05/22, 08:41 - Adrian Cindea: Good morning
02/05/22, 12:07 - Support Technician 25: @Company Employee 16 which day? Gnocco Fritto gratuito per tutti? 😊
02/05/22, 12:08 - Milo Barozzi: Not really: that day will be when CR43 is deployed and working. Today is "only" deploy day...
02/05/22, 12:08 - Support Technician 25: 🍷🍷 keep fingers crossed
02/05/22, 12:35 - Company Employee 2: Both totems are blocked, they won't send any telegram to WMS during Deploy
02/05/22, 12:35 - Razvan Voicu: Ok
02/05/22, 12:37 - Milo Barozzi: thanks Federico! 🍷
02/05/22, 12:37 - Razvan Voicu: Milo, let us know when you switch parameter so

we start our procedures

02/05/22, 12:38 - Milo Barozzi: a couple of minutes and I'll do it
02/05/22, 12:43 - Milo Barozzi: Cabin crew, com.wamas.mfs.core.common.agvDisable set to true in this moment
02/05/22, 12:44 - Milo Barozzi: @Support Technician 21 @Support Technician 12 🙌
02/05/22, 12:44 - Razvan Voicu: Ok, we are starting
02/05/22, 12:44 - Razvan Voicu: Commencing shutdown procedure
02/05/22, 12:45 - Razvan Voicu: 1) Logging users out
02/05/22, 12:46 - Milo Barozzi: No no no
02/05/22, 12:46 - Milo Barozzi: Wait 13:00 pls
02/05/22, 12:47 - Razvan Voicu: Ok, already logged them out. I see them reconnecting
02/05/22, 12:51 - Milo Barozzi: AGV already finished their tasks, but we need to wait until 13:00 before starting
02/05/22, 12:51 - Milo Barozzi: To my signal (not yet), "unleash the hell", please.
02/05/22, 12:51 - Razvan Voicu: <Media omessi>
02/05/22, 13:00 - Milo Barozzi: @Support Technician 21 green light! please proceed!
Keep us updated on status/phases of deploy please. For any help, please do not hesitate to ask us!
02/05/22, 13:00 - Razvan Voicu: Ok, I will start again
02/05/22, 13:01 - Milo Barozzi: thanks! We're in your hands now
02/05/22, 13:01 - Razvan Voicu: mmontanari1 logged back
02/05/22, 13:05 - Milo Barozzi: kick him out
02/05/22, 13:05 - Milo Barozzi: with no mercy!
02/05/22, 13:06 - Razvan Voicu: Ok
02/05/22, 13:22 - Adrian Cindea: We are working to add new locations
02/05/22, 13:22 - Milo Barozzi: ok
02/05/22, 13:23 - Milo Barozzi: we're in time, no stress
02/05/22, 13:34 - Milo Barozzi: All plant is in manual mode now. I guess you're loading new repository now
02/05/22, 13:41 - Razvan Voicu: yes
02/05/22, 13:41 - Milo Barozzi: ok!
02/05/22, 13:47 - Milo Barozzi: don't want to stress, but.. estimated time for system restoring from now? Approx?
02/05/22, 13:48 - Milo Barozzi: heard MFS reset now 😊
02/05/22, 13:52 - Milo Barozzi: can we join WAMAS?
02/05/22, 13:52 - Razvan Voicu: Services are up
02/05/22, 13:52 - Razvan Voicu: Start the machines!
02/05/22, 13:53 - Milo Barozzi: ok, engines ON
02/05/22, 13:53 - Milo Barozzi: @Company Employee 9 and @Company Employee 11 will check automated part, I'll check Bucket To function with some other colleagues
02/05/22, 13:53 - Milo Barozzi: We'll keep you updated
02/05/22, 14:41 - Milo Barozzi: first feedbacks:
- AS400 working
- Bucket TO under investigation: main function seem working fine, but there are some issues with visualization of total LUs/remaining LUs + visualization of list of LUs which is visualizing also other LUs not related to the same order
- automated part seems fine, but we're checking a kind of error which occurred not too much times
02/05/22, 14:44 - Milo Barozzi: sorry for not so frequent updates, but we're involved in bucket TO testing
02/05/22, 15:08 - Milo Barozzi: after 1h 20 min of working/observing/testing it seems bucket To is working in an acceptable way even not perfectly, we're deepening function of a case on it, but seems acceptably working until now
02/05/22, 15:08 - Milo Barozzi: automated part working
02/05/22, 15:08 - Milo Barozzi: AS400 working
02/05/22, 15:33 - Milo Barozzi: @Support Technician 12 would you like to have a quick call (teams or whatever) to let you know our feelings on deploy?
02/05/22, 15:41 - Adrian Cindea: Tomorrow
02/05/22, 15:42 - Adrian Cindea: We spent 30 minutes for locations
02/05/22, 15:42 - Adrian Cindea: At least

02/05/22, 15:43 - Adrian Cindea: Locations were extra this time
02/05/22, 15:46 - Milo Barozzi: ok, as you prefer. We'll send you what we think is not working in "ticket" form as usual (mail to helpdesk), ok? Thank you and to all the team so far!
02/05/22, 15:55 - Adrian Cindea: Yes, please follow standard procedure and tomorrow we will analyze issues reported
02/05/22, 16:01 - Milo Barozzi: perfect! Thank you
02/05/22, 16:07 - Adrian Cindea: you're welcome
05/05/22, 19:04 - Milo Barozzi: IMG-20220505-WA0006.jpg (file allegato)
@Support Technician 14 @Support Technician 12 @Support Technician 11 @Support Technician 21 @Support Technician 23 @Support Technician 9 @Company Employee 5 @Company Employee 8 @Support Technician 6 we have WAMASDB CPU to over 90%. Usually is 30%. It raised up from 16:00 today. Please, help us as fast as you can! I'm scared we're close to block the whole plant!
05/05/22, 19:05 - Razvan Voicu: I check
05/05/22, 19:06 - Razvan Voicu: but unfortunately I will also need a ticket for this, please
05/05/22, 19:06 - Milo Barozzi: I already called the hotline
05/05/22, 19:06 - Milo Barozzi: not sent e-mail but phone call I did already
05/05/22, 19:07 - Milo Barozzi: it's the CPU of WAMASDB machine
05/05/22, 19:07 - Milo Barozzi ha aggiunto Matteo Gaibani.
05/05/22, 19:09 - Milo Barozzi: it's ticket # 01230312
05/05/22, 19:37 - Milo Barozzi: @Support Technician 21 still working on it?
05/05/22, 19:37 - Razvan Voicu: Yes
05/05/22, 19:37 - Milo Barozzi: Ok thanks
05/05/22, 19:37 - Razvan Voicu: The CPU usage lowered a bit, it's around 70%
05/05/22, 19:38 - Razvan Voicu: Do you know if problems occurred in the warehouse already
05/05/22, 19:40 - Milo Barozzi: That's not the final result but good because is keeping far the total block risk. Btw is anyway the double of usual usage
05/05/22, 19:40 - Milo Barozzi: Which kind of problems?
05/05/22, 19:40 - Razvan Voicu: any kind of problems
05/05/22, 19:41 - Milo Barozzi: One pallet was on left printer not moving with no soc to id
05/05/22, 19:41 - Milo Barozzi: But was at 17.30
05/05/22, 19:41 - Milo Barozzi: F destacker crashes at 19.00
05/05/22, 19:41 - Milo Barozzi: But now all of them are working
05/05/22, 19:42 - Milo Barozzi: Nothing special different let's say
05/05/22, 19:43 - Razvan Voicu: IMG-20220505-WA0007.jpg (file allegato)
It chilled down a bit
05/05/22, 19:44 - Razvan Voicu: I saw that the DB tablespaces are almost full, part of the equation is the increase in retention period. We contacted DBA to check
05/05/22, 19:45 - Milo Barozzi: If needed, but only if needed, restore retention period to 130 days, but I don't think this is the cause
05/05/22, 19:45 - Razvan Voicu: For now it seems ok, we can also do an allinone restart (not instance, only allinone) for extreme cases
05/05/22, 19:46 - Razvan Voicu: Around what hour will automation part stop ?
05/05/22, 20:04 - Milo Barozzi: From site feedback is that both manual part and automated part are fine. desktop users are working. 65% usage of cpu is still not the best (usual value is 35-40) but it's far from 90.
05/05/22, 20:05 - Milo Barozzi: Please keep an eye on the system in manner to keep blocks far from us. Especially I'm referring to tomorrow morning 5:30 AM
05/05/22, 20:05 - Milo Barozzi: 20:40 Italian time, 35mins from now
05/05/22, 21:56 - Milo Barozzi: IMG-20220506-WA0000.jpg (file allegato)
@Support Technician 21 CPU usage of WAMASDB is now around 35% (Usual value). Did you do something or it self-adjusted?
05/05/22, 21:56 - Razvan Voicu: Self adjusted
05/05/22, 21:57 - Milo Barozzi: 😊 I'm curious of what the hell caused the issue....
05/05/22, 21:58 - Milo Barozzi: btw... seems fine. Let's see tomorrow... Wish you all a good evening
09/05/22, 01:43 - Giacomo Trivieri, Lavoro ha abbandonato.
09/05/22, 09:45 - Milo Barozzi: Dear All, just wanted to inform that today

deploy, from Atlas Concorde side, will be ruled by @Company Employee 11.
@Company Employee 9 will be her 2nd in command, while I will act as "supervisor". Obviously, in case of need I'll join the battle also, but I'm pretty sure it'll not be needed.
09/05/22, 09:46 - Milo Barozzi: Please, refer to @Company Employee 11 regarding all kind of communications regarding this deploy (obviously, keep me in copy in emails as usual).
It'll be @Company Employee 11 responsibility letting you know when we'll start disable missions to AGV and when you can start kicking out users.
Thanks for your kind cooperation.
09/05/22, 12:15 - Benedetta Zini: Hi All! com.wamas.mfs.core.common.agvDisable set to true in this moment
09/05/22, 12:21 - Benedetta Zini: Both totems are blocked, thanks @Company Employee 2
09/05/22, 12:23 - Company Employee 2: Yes, confirmed
09/05/22, 12:28 - Benedetta Zini: I tell you when you can proceed
09/05/22, 12:33 - Benedetta Zini: You can go with deploy!
09/05/22, 12:34 - Benedetta Zini: @Support Technician 21 @Support Technician 12 🖱
09/05/22, 12:36 - Benedetta Zini: ??
09/05/22, 12:36 - Razvan Voicu: We are on it
09/05/22, 12:36 - Benedetta Zini: Perfect
09/05/22, 12:40 - Benedetta Zini: All plant is in manual mode now. Is deploy starting?
09/05/22, 12:41 - Adrian Cindea: Yes, wait to finish
09/05/22, 12:50 - Benedetta Zini: Okay, estimated time?
09/05/22, 12:52 - Adrian Cindea: Waiting for mfs to start
09/05/22, 12:53 - Benedetta Zini: Okay!
09/05/22, 12:56 - Adrian Cindea: Please start to check and work
09/05/22, 12:56 - Adrian Cindea: Deploy is done
09/05/22, 12:56 - Benedetta Zini: Yes we are checking!
09/05/22, 12:57 - Benedetta Zini: Milo is checking CRs of Bucket T0 while me and Chiara are checking automatic area
09/05/22, 13:03 - Benedetta Zini: IMG-20220509-WA0016.jpg (file allegato)
How does it work the new button in MF200 "CancelRequestEMS"?
09/05/22, 13:05 - Support Technician 23: Hi
You should first cancel the request and reset transport order
09/05/22, 13:24 - Benedetta Zini: Okay thank you!
09/05/22, 13:40 - Benedetta Zini: Everything is fine! Thanks for deploy!
Could you please send an email indicating patches included in this deploy?
09/05/22, 13:42 - Adrian Cindea: Email was resent
09/05/22, 13:44 - Benedetta Zini: oookay thanks
09/05/22, 15:56 - Milo Barozzi: @Support Technician 12 @Support Technician 21 regarding counter-issue generated by patch of K76, we're telling people to make the following workaround:
-release source LU/destination LU
-before LU leaving the station, shift leader changes the stock from SM023/SM028 in desktop interface

as you can easily imagine, this is quite annoying and long. We cannot stand it for too much. What's your idea? Rollback only this fix?

09/05/22, 15:56 - Razvan Voicu: probably yes
09/05/22, 15:58 - Milo Barozzi: Second shift for today (until 20:40) we can handle this drawback.. doing it for more time it'll become very complicated and time-wasting. So I think the only chance we have is to make it in the 20:40-21:10 window this evening
09/05/22, 16:11 - Razvan Voicu: Ok, we will do a deploy at 20:40 Italy time
09/05/22, 16:12 - Razvan Voicu: Let me know if you will set the AGV parameter to false or if I need to do that
09/05/22, 16:12 - Milo Barozzi: please, do it on your own
09/05/22, 16:13 - Milo Barozzi: Let me speak with maintenance team to understand who's present and who can support you
09/05/22, 16:13 - Milo Barozzi: I'll come back to you in max 30 mins
09/05/22, 16:13 - Razvan Voicu: Ok, then let me know when I can set the

parameter to false and start doing the deploy
09/05/22, 16:13 - Razvan Voicu: perfect
09/05/22, 16:37 - Milo Barozzi: @Support Technician 21 need to discuss also about bucket TO changes. two FK drivers: mm21 and mm36 reported that when they execute the last TPO of a bucket, they're kicked out of the mobile terminal. Can check it with this poor pieces of info?
09/05/22, 16:39 - Razvan Voicu: I can try
09/05/22, 16:39 - Milo Barozzi: I can give you the OBD number... gimme 2 seconds..
09/05/22, 16:40 - Milo Barozzi: OBD*404270
09/05/22, 16:40 - Razvan Voicu: I think the user helps me more
09/05/22, 16:40 - Razvan Voicu: I need to check terminal log
09/05/22, 16:40 - Milo Barozzi: mm21
09/05/22, 16:42 - Milo Barozzi: now happened again, same user: mm21, OBD*400616, last LU scanned 65887199
09/05/22, 16:43 - Milo Barozzi: MUL-133-1
09/05/22, 16:43 - Milo Barozzi: the same happened to mm36 while suspending. He suspended, was the last pallet of his bucket, kicked out to login page
09/05/22, 16:43 - Milo Barozzi: I'm telling you this because maybe you'll need to revert/patch also something else in this evening deploy
09/05/22, 16:48 - Razvan Voicu: We are checking now and will let you know
09/05/22, 17:05 - Milo Barozzi: Ok, meanwhile I'll open a ticket for it
09/05/22, 17:44 - Razvan Voicu: let me know about this
09/05/22, 17:48 - Benedetta Zini: yes 1 min pls
09/05/22, 18:15 - Benedetta Zini: @Razvan Voicu @Adrian Cindea
DEPLOY CONFIRMED FOR THIS EVENING 20:50 - 21:10
Battle plan is the following:
- 20:30 @Razvan Voicu please put com.wamas.mfs.core.common.agvDisable = true
- @Giacomo Trivieri will ensure AGV will finish their last orders. Usually AGV takes 15 minutes to finish their orders
- As soon as no more orders need to be executed (it'll be close to 20:50), @Razvan Voicu please proceed with deploy
- hopefully everything will be back on track within 21:10
- @Razvan Voicu please put com.wamas.mfs.core.common.agvDisable = false as soon as you can
- @Razvan Voicu put again threshold inventory for PLAs from pStations (from 0 to 2)
09/05/22, 18:17 - Razvan Voicu: ok, thanks
09/05/22, 18:27 - Benedetta Zini: @Support Technician 21 @Support Technician 12 I recommend not starting deploy before 20:50 because operators finish working at that time.
Remember to send email where you indicate that deploy is completed
09/05/22, 18:28 - Benedetta Zini: IMG-20220509-WA0028.jpg (file allegato)
an email like this
09/05/22, 18:31 - Razvan Voicu: Can someone give me green light when operators finish working?
09/05/22, 18:34 - Benedetta Zini: At 20:50 you can assume that operators have finished working, while for AGVs you have to wait @Company Employee 18
09/05/22, 18:35 - Razvan Voicu: Ok
09/05/22, 18:42 - Company Employee 18: Ready for tonight 👍
09/05/22, 20:30 - Razvan Voicu: AgvDisable set to true
09/05/22, 20:31 - Benedetta Zini: 👍
09/05/22, 20:32 - Company Employee 18: Ok 👍 we are ready
09/05/22, 20:47 - Razvan Voicu: Let me know when AGV stopped
09/05/22, 20:47 - Razvan Voicu: at :50 I will start deploy
09/05/22, 20:48 - Company Employee 18: Yes every agv are stopped
09/05/22, 20:48 - Company Employee 18: Start! 🚀
09/05/22, 21:11 - Razvan Voicu: Everything seems up
09/05/22, 21:11 - Razvan Voicu: 👍
09/05/22, 21:12 - Milo Barozzi: 📱👍
09/05/22, 21:12 - Company Employee 18: @Support Technician 21 the deploy has been finished?
09/05/22, 21:12 - Razvan Voicu: Yes
09/05/22, 21:12 - Razvan Voicu: 1) parameter set to false

2) sender to AS400 works
3) inventory threshold set back
09/05/22, 21:13 - Milo Barozzi: @Support Technician 21 please don't forget mail, people in manual area are waiting for it to restart
09/05/22, 21:13 - Milo Barozzi: 👍👍👍
09/05/22, 21:13 - Razvan Voicu: Sending it now
09/05/22, 21:13 - Milo Barozzi: Same repository than today at midday except k76 patch, right?
09/05/22, 21:13 - Milo Barozzi: Thanks
09/05/22, 21:14 - Razvan Voicu: and fix for that bucket to logout
09/05/22, 21:14 - Company Employee 18: Now we restart the pc
09/05/22, 21:14 - Milo Barozzi: Fix or revert for that patch causing it?
09/05/22, 21:15 - Milo Barozzi: 🤔👍👍
09/05/22, 21:15 - Razvan Voicu: Revert for K76
Fix for bucket to
09/05/22, 21:16 - Milo Barozzi: Cool! Thank you!
09/05/22, 21:16 - Razvan Voicu: Thanks aswell. Have a nice evening
09/05/22, 21:17 - Milo Barozzi: Thank you. Same for u
10/05/22, 07:39 - Nicola Bernardi: Hi all, today i try the new "button" on ms200 but doesn't work, the pallet is on BP04 BUFFER* , can you help me please?
10/05/22, 08:07 - Milo Barozzi: Pick station 4 is blocked due to this, please solve ASAP
10/05/22, 08:11 - Razvan Voicu: I will check
10/05/22, 08:12 - Mihai Soceanu: did you press replan route
10/05/22, 08:12 - Mihai Soceanu: and refresh ?
10/05/22, 08:12 - Nicola Bernardi: No
10/05/22, 08:12 - Nicola Bernardi: No
10/05/22, 08:13 - Mihai Soceanu: try it, also after this press reset
10/05/22, 08:13 - Nicola Bernardi: I press cancel, replan and reset?
10/05/22, 08:13 - Benedetta Zini: We have "CancelRequestEMS"
10/05/22, 08:14 - Benedetta Zini: Is it the same as "replan route"?
10/05/22, 08:14 - Mihai Soceanu: no, cancel request will remove order from EMS on MFS side
10/05/22, 08:16 - Mihai Soceanu: and if is still not working
10/05/22, 08:17 - Nicola Bernardi: I pressed "replannig route" and "reset traspor order" now
10/05/22, 08:17 - Mihai Soceanu: i also press cancel step in MF266
10/05/22, 08:18 - Nicola Bernardi: 😞
10/05/22, 08:19 - Mihai Soceanu: you can press it now
10/05/22, 08:21 - Mihai Soceanu: you can press cancel request in MF266
10/05/22, 08:21 - Nicola Bernardi: Pressed
10/05/22, 08:22 - Mihai Soceanu: ok, now go back to MF200 and press reset again
10/05/22, 08:22 - Nicola Bernardi: Refresh and reset?
10/05/22, 08:22 - Mihai Soceanu: yes
10/05/22, 08:23 - Nicola Bernardi: Now the pallet is visibile on lighthouse
10/05/22, 08:25 - Benedetta Zini: It worked!
10/05/22, 08:25 - Mihai Soceanu: yes
10/05/22, 08:25 - Mihai Soceanu: usually i do these steps
10/05/22, 08:25 - Mihai Soceanu: first try refresh and reset
10/05/22, 08:26 - Mihai Soceanu: then if not ok, replan route, refresh and reset
10/05/22, 08:26 - Mihai Soceanu: if still not working, cancel step in MF266, refresh and reset
10/05/22, 08:26 - Mihai Soceanu: and last stepp, cancel EMS request to remove EMS order from MFS
10/05/22, 08:29 - Benedetta Zini: okay so we have to use the new button "CancelRequestEMS" only if the other 3 steps don't work (1. refresh and reset, 2. replan, refresh and reset, 3. cancel step MF266, refresh and reset)
10/05/22, 08:29 - Benedetta Zini: Right?
10/05/22, 08:33 - Mihai Soceanu: Yes
10/05/22, 08:33 - Mihai Soceanu: Correct
10/05/22, 08:33 - Milo Barozzi: thanks a lot @Support Technician 6
10/05/22, 08:34 - Benedetta Zini: Okay perfect thank you!
10/05/22, 08:34 - Mihai Soceanu: Welcome :)
10/05/22, 08:37 - Adrian Cindea: F105 fixed 😊

10/05/22, 09:07 - Milo Barozzi: @Support Technician 12 @Support Technician 21 please, as soon as you can, check my email regarding issue N30 because in this way system is not assigning any priority, therefore is worst than before. Thank you in advance!

10/05/22, 09:33 - Adrian Cindea: The idea is to check the case live

10/05/22, 09:34 - Adrian Cindea: Because locally system works as expected

10/05/22, 09:35 - Milo Barozzi: it's happening exactly now

10/05/22, 09:35 - Adrian Cindea: K

10/05/22, 09:35 - Mihai Soceanu: i check

10/05/22, 09:37 - Milo Barozzi: IMG-20220510-WA0001.jpg (file allegato)

@Support Technician 6 IMHO it should have prioritized pallet from 810 but sometimes it doesn't prioritizes any pallet (case in my mail from yesterday evening), sometimes it prioritizes 1010 (CU379). If you want, we can discuss it/check it together in private chat and/or Skype also

10/05/22, 09:38 - Mihai Soceanu: one sec pls

10/05/22, 09:38 - Milo Barozzi: take your time!

10/05/22, 09:39 - Mihai Soceanu: slaved pallets are not working properly

10/05/22, 09:40 - Mihai Soceanu: on wunderwuzzi

10/05/22, 09:40 - Mihai Soceanu: because i do not collect the pallet which is the DHZ one

10/05/22, 09:40 - Mihai Soceanu: for wunrewuzzi

10/05/22, 09:41 - Milo Barozzi: you mean N31 and N33 right? is this patchable?

10/05/22, 09:41 - Milo Barozzi: by the way, I was referring to N30 😊

10/05/22, 09:42 - Mihai Soceanu: ah also the most right lines are not workin properly

10/05/22, 09:42 - Mihai Soceanu: ?

10/05/22, 09:42 - Mihai Soceanu: i will check line 379 now

10/05/22, 09:43 - Milo Barozzi: Sorry.. I think we're doing a marmelade with info here 😊

10/05/22, 09:43 - Mihai Soceanu: is ok i checked N30 now

10/05/22, 09:44 - Milo Barozzi: I was thought that deploy from yesterday was containing patch for issue N30 (prio on CU379 extended to CU384 and CU388). behave should be: when 3 pallets are there and there's the queue of 5 pallets (like the parameter is configured right now), Hive should prioritize the mission for the older pallet on CU379-384-388

10/05/22, 09:44 - Milo Barozzi: If patches for N31 and N33 were also inside the deploy, I was not informed about it. It'll be a nice surprise and surely we can test them during the day and come back to you with a feedback. Just let us know 😊

10/05/22, 09:45 - Milo Barozzi: right now we have 5+1 pallet on CU379 line and no prio neither for 1010, nor for 910, nor for 810

10/05/22, 09:46 - Milo Barozzi: (prio should go to 910, since it's the older one)

10/05/22, 09:46 - Milo Barozzi: *oldest

10/05/22, 09:47 - Mihai Soceanu: i am not sure if this feature is in

10/05/22, 09:48 - Milo Barozzi: 🤔🤔🤔

10/05/22, 09:48 - Mihai Soceanu: MFS for the moment when i coded i was not combinining the Retrieval Points

10/05/22, 09:48 - Mihai Soceanu: only one point

10/05/22, 09:48 - Mihai Soceanu: or what do you mean by 1010, 910 and 810 ?

10/05/22, 09:49 - Mihai Soceanu: adress from Rocla

10/05/22, 09:49 - Mihai Soceanu: ?

10/05/22, 09:49 - Milo Barozzi: 🤖 I think it's something you must clarify internally because I thought being clear in request I did 😊

10/05/22, 09:49 - Mihai Soceanu: ah sriry

10/05/22, 09:49 - Milo Barozzi: yep, they're address from Rocla for CU379, 384 and 388

10/05/22, 09:49 - Mihai Soceanu: i did not ask i will ask :)

10/05/22, 09:49 - Milo Barozzi: @Support Technician 6 btw, even so, 1010 is not prioritized while it should

10/05/22, 09:50 - Milo Barozzi: in one way or another, something is not working there unfortunately

10/05/22, 09:50 - Mihai Soceanu: yep i am checking

10/05/22, 09:51 - Milo Barozzi: thanks

10/05/22, 09:52 - Mihai Soceanu: ok, you are right the check between conveyours is in
10/05/22, 09:52 - Mihai Soceanu: :)
10/05/22, 09:53 - Milo Barozzi: 🤔 that's the good part
10/05/22, 09:53 - Milo Barozzi: the bad part, is that it's not working for some reason 😞
10/05/22, 09:58 - Mihai Soceanu: ok, all clear for me :) we have a bug 😞 i will take it intrenally
10/05/22, 09:59 - Mihai Soceanu: i mean we have a bug with N30, update for other 2 conveyours
10/05/22, 09:59 - Mihai Soceanu: aaaand the one from 120 related to slaved pallets
10/05/22, 09:59 - Mihai Soceanu: i will check t
10/05/22, 09:59 - Mihai Soceanu: them*
10/05/22, 10:00 - Milo Barozzi: good you discovered it!
10/05/22, 10:00 - Milo Barozzi: regarding these bugs (N31 and N33), were their related patches in the deploy from yesterday?
10/05/22, 10:04 - Mihai Soceanu: i will ask, i am not 100% involved srly but I will discuss with team
10/05/22, 10:06 - Milo Barozzi: no problem. just to let you know: team did not inserted them in the "deploy list" confirmation. Did you code a patch for issues N31/N33?
Second question: do you think you'll be able to patch N30 in the next days?

Thanks so much as usual for your help

10/05/22, 10:07 - Mihai Soceanu: 1. I did not code the patch, I helped the team, but I missed smth (srly)
10/05/22, 10:08 - Mihai Soceanu: 2. We will inform, when patch can be installed
10/05/22, 10:08 - Milo Barozzi: ok, so team coded a patch btw for that
10/05/22, 10:08 - Milo Barozzi: ok, thank you. I'm a broken CD player repeating the same track, but... the sooner the better for us, since now it's not prioritizing at all
10/05/22, 10:08 - Mihai Soceanu: grrrrr i am crazy, i helped for N30 and missed smth, N31/N33 i just discovered the problem
10/05/22, 10:09 - Mihai Soceanu: i think Mars is retrograde, my communication skills are bad today ☹️
10/05/22, 10:09 - Mihai Soceanu: we will correct
10/05/22, 10:10 - Milo Barozzi: <Media omessi>
🤔🤔 today communication drove me crazy too, but I understood now... please, find a picture of me now after this discussion 😊
10/05/22, 10:11 - Mihai Soceanu: 😞😁 srly
10/05/22, 10:11 - Milo Barozzi: no problem, just joking
10/05/22, 10:11 - Mihai Soceanu: :))
10/05/22, 11:12 - Chiara Lodesani, Lavoro: after yesterday deploy we noticed that for slaved pallet we have to do suspend and resume because TPOs don't work
10/05/22, 11:13 - Chiara Lodesani, Lavoro: 59042948 for example
10/05/22, 11:14 - Razvan Voicu: I will check
10/05/22, 11:15 - Chiara Lodesani, Lavoro: thanks
10/05/22, 11:19 - Chiara Lodesani, Lavoro: if you do suspend and resume it starts
10/05/22, 11:44 - Chiara Lodesani, Lavoro: it moved 15 min ago but for WAMAS it is still there. Are you checking?
10/05/22, 11:52 - Razvan Voicu: Let me know if now it works
10/05/22, 11:59 - Chiara Lodesani, Lavoro: I tryed with two pallets and it seems work. thank you!
what was the problem?
10/05/22, 12:01 - Razvan Voicu: Mobile cache most likely, did a restart
10/05/22, 12:06 - Chiara Lodesani, Lavoro: ok, thanks
13/05/22, 12:31 - Adrian Cindea: Hi
13/05/22, 12:31 - Adrian Cindea: What is status for agvs?
13/05/22, 12:32 - Milo Barozzi: waiting for 12:35 to set parameter to true, according to your plan

12:35 -> set AGV parameter

12:45 -> stop MFS (after AGVs are in parking position) - wait to stop ~ 2-3 minutes
12:48 -> start MFS wait to start (~7 minutes)
~12:55 -> MFS is up completely.
13/05/22, 12:32 - Adrian Cindea: We will wait
13/05/22, 12:33 - Milo Barozzi: noticed there are a lot of mission in rocla system, set parameter to true now
13/05/22, 12:34 - Milo Barozzi: IMG-20220513-WA0018.jpg (file allegato)
this is the order buffer of Rocla System.. it'll take more than a while to AGV to finish all these ones...
13/05/22, 12:35 - Adrian Cindea: We will wait
13/05/22, 12:42 - Milo Barozzi: we're almost done... 7 missions left
13/05/22, 12:45 - Milo Barozzi: 5 left
13/05/22, 12:47 - Milo Barozzi: 3 left
13/05/22, 12:48 - Milo Barozzi: 1 left only...
13/05/22, 12:49 - Milo Barozzi: @Support Technician 12 GO GO GO!
13/05/22, 12:50 - Alexandru Catarau: nono
13/05/22, 12:50 - Adrian Cindea: 2 are moving
13/05/22, 12:50 - Milo Barozzi: all AGVs finished their missions, you can start
13/05/22, 12:50 - Milo Barozzi: they're moving but empty
13/05/22, 12:50 - Milo Barozzi: going to charging
13/05/22, 12:50 - Milo Barozzi: it'll make no issues if you do now
13/05/22, 12:50 - Adrian Cindea: K
13/05/22, 12:50 - Adrian Cindea: Stop done
13/05/22, 12:50 - Adrian Cindea: Start in progress
13/05/22, 12:53 - Adrian Cindea: 112/295
13/05/22, 12:53 - Adrian Cindea: 160/295
13/05/22, 12:54 - Adrian Cindea: 200/295
13/05/22, 12:54 - Milo Barozzi: 🤔
13/05/22, 12:55 - Adrian Cindea: 250/295
13/05/22, 12:56 - Adrian Cindea: Done
13/05/22, 12:56 - Milo Barozzi: I heard the "reset"
13/05/22, 12:56 - Adrian Cindea: 6 minutes
13/05/22, 12:56 - Milo Barozzi: AGV parameter set back to false
13/05/22, 12:57 - Milo Barozzi: +16 for stopping AGVs = 22 minutes.. faster than light
13/05/22, 12:57 - Milo Barozzi: AGVs are moving, mission for pallet on CU379 prioritized
13/05/22, 12:58 - Milo Barozzi: rollback works 🍌
13/05/22, 12:58 - Adrian Cindea: 10 minutes because it works
13/05/22, 12:58 - Milo Barozzi: IMG-20220513-WA0019.jpg (file allegato)
13/05/22, 12:58 - Adrian Cindea: Confirmed by us
13/05/22, 12:59 - Milo Barozzi: what do you mean? 😞
13/05/22, 13:01 - Milo Barozzi: for me it works, doesn't it?
13/05/22, 13:02 - Alexandru Catarau: yes
13/05/22, 13:02 - Adrian Cindea: In 16 minutes system works
13/05/22, 13:02 - Alexandru Catarau: all looks good from our side
13/05/22, 13:02 - Adrian Cindea: Rollback works
13/05/22, 13:02 - Adrian Cindea: I am talking about stopping time
13/05/22, 13:02 - Milo Barozzi: Thank you so much to all of you guys!
13/05/22, 13:02 - Milo Barozzi: Now I got it sorry
13/05/22, 13:03 - Adrian Cindea: It was not 22 ... it was about 10
13/05/22, 13:03 - Adrian Cindea: Impact was minimum
13/05/22, 13:04 - Adrian Cindea: Maybe 6 stations were affected
13/05/22, 13:04 - Adrian Cindea: Temporary due to this stop and start
13/05/22, 13:05 - Milo Barozzi: We're speaking about peanuts. I think start/stop performance was like F1 pit-stop time 🏎️
19/05/22, 11:37 - Milo Barozzi: @Support Technician 12 @Support Technician 21 @Support Technician 11 @Support Technician 6 we're facing a new really annoying issue. All source pallets from pick stations are addressed to Wunderwuzzi instead to HBW1. We're trying to "dam" the river of pallets but it's a mess... we're writing the mail to open the ticket also. meanwhile, somebody can help us on the fly, please?
19/05/22, 11:41 - Milo Barozzi: Mail sent, ticket open

19/05/22, 11:46 - Milo Barozzi: Could be that if there's no space for that source in HBW1 source is re-addressed to Wuzzi? @Support Technician 12 @Support Technician 11 @Support Technician 21 @Support Technician 6 Never seen something similar in 15 months... 🤔

19/05/22, 12:43 - Support Technician 25: Extend HBW1 😊 Greetings from Amsterdam

19/05/22, 12:45 - Milo Barozzi: no space, no money, and since SSI is full of projects.. it'll be not before 2024 maybe... 😞 Be aware of Amsterdam, it's a dangerous place! 😊

19/05/22, 12:49 - Milo Barozzi: @Support Technician 12 @Support Technician 11 @Support Technician 6 @Support Technician 21 btw now it seems not happening anymore, but when it happens it's like a show stopper. Pls investigate it ASAP. Thank you

19/05/22, 12:50 - Razvan Voicu: 👍

19/05/22, 14:50 - Adrian Cindea: Do you have another example of LU different by email?

19/05/22, 15:02 - Benedetta Zini: LU 51374974

19/05/22, 15:04 - Benedetta Zini: Hai eliminato questo messaggio.

19/05/22, 15:36 - Milo Barozzi: @Support Technician 12 happening again now. Some examples:
59906886
59963166
59963555
59982551

19/05/22, 15:44 - Adrian Cindea: Space issue

19/05/22, 15:46 - Milo Barozzi: I supposed so. But..... system is not "auto-protecting" itself? I mean.. it continues creating TPOs for replenishment HBW1 from bulk storage and sends pallets from picking stations out to Wuzzi and slowing performances of all pick stations?
I mean, it's not so full of sense sending out pallets from Wuzzi, re-slate them immediately infeeding them again to Wuzzi and then sending them out to QC... 🤔🤖

19/05/22, 16:36 - Adrian Cindea: All levels are for H?

19/05/22, 16:36 - Adrian Cindea: It meas level 13 -18?

19/05/22, 16:36 - Adrian Cindea: Y = 13 -18

19/05/22, 16:37 - Milo Barozzi: all compartment have the same width and depth, they change only in height

19/05/22, 16:37 - Milo Barozzi: so yes, H can fit to all levels, according to their height

19/05/22, 16:44 - Adrian Cindea: 149 as compartments without pilar check

19/05/22, 16:44 - Adrian Cindea: Free compartments no blockage/no lu/no tpo

19/05/22, 16:45 - Adrian Cindea: 147 now

19/05/22, 16:46 - Milo Barozzi: please, take into account that for making in manner not to block pick station now we're continuously cancel replenishment TPOs for HBW1

19/05/22, 16:46 - Milo Barozzi: I don't know when you measured 147.. but if there are free locations for H/D.. why they go from pick stations to Wuzzi instead going to HBW1?

19/05/22, 16:47 - Adrian Cindea: Pilar check is not included

19/05/22, 16:47 - Adrian Cindea: Weight check to not break the racks

19/05/22, 16:48 - Adrian Cindea: 147/12000

19/05/22, 16:48 - Milo Barozzi: pilar check is a must, we cannot bypass it 😊

19/05/22, 16:49 - Adrian Cindea: Pilar check is not included in my query

19/05/22, 16:49 - Adrian Cindea: But it is included in wamas check

19/05/22, 16:49 - Milo Barozzi: and it's good that we have it 😊

19/05/22, 16:49 - Milo Barozzi: I see, I see. In other words... there's no more space for more water in this glass....

19/05/22, 16:50 - Milo Barozzi: and this is something we know, but I'm discussing about the strategy implemented by WAMAS

19/05/22, 16:50 - Milo Barozzi: there's no space in HBW1 > slaved sources are sent from pick station to Wuzzi, AGV take them and reinfed them immediately to Wuzzi and they exit to QC

19/05/22, 16:52 - Milo Barozzi: even I'm not happy slaved sources are not returning to HBW1.. I say: why they're not going immediately to QC instead overrun Wuzzi? In this way we're double punched: 1 - because pallets are not

returning in HBW1 (and I see, there's no space, but the system should self-protect itself IMHO), and 2 - picking is slowed a lot because empty sources are infesting Wuzzi...

19/05/22, 16:52 - Adrian Cindea: Improvements ...

19/05/22, 16:54 - Milo Barozzi: for sure... but I'm not sure it's a CR... if nobody told me / asked me if implemented behaviour was fine like this...? it's a CR or a bug? or 50%-50%? Btw... we should found a way to improve this

23/05/22, 08:55 - Milo Barozzi: *BREAKING NEWS FOR TODAYS DEPLOY 12:30 ITALIAN TIME*

Dear All, just wanted to inform that today deploy, from Atlas Concorde side, will be ruled by @Company Employee 9, while I will act as "supervisor". Obviously, in case of need I'll join the battle also, but I'm pretty sure it'll not be needed.

Please, refer to @Company Employee 9 regarding all kind of communications regarding this deploy (obviously, keep me in copy in emails as usual). It'll be @Company Employee 9 responsibility letting you know when we'll start disable missions to AGV and when you can start kicking out users.

Thanks for your kind cooperation.

23/05/22, 12:16 - Chiara Lodesani, Lavoro: Hi!
com.wamas.mfs.core.common.agvDisable set to true in this moment.
I will tell you when you can proceed with deploy

23/05/22, 12:21 - Razvan Voicu: Hello. Ok, I am here 👍

23/05/22, 12:24 - Chiara Lodesani, Lavoro: Although the AGVs will stop before 12.30, we will wait until 12.30 to start the deploy

23/05/22, 12:25 - Company Employee 2: @Company Employee 9 both totems have been stopped 👍

23/05/22, 12:25 - Chiara Lodesani, Lavoro: Thanks

23/05/22, 12:29 - Chiara Lodesani, Lavoro: You can go with deploy!

23/05/22, 12:30 - Razvan Voicu: Start?

23/05/22, 12:30 - Razvan Voicu: Ok :)

23/05/22, 12:30 - Chiara Lodesani, Lavoro: yes!

23/05/22, 12:49 - Razvan Voicu: Parameter set back to original values

23/05/22, 12:50 - Razvan Voicu: Checking MFS now

23/05/22, 12:50 - Chiara Lodesani, Lavoro: Ok

23/05/22, 13:02 - Chiara Lodesani, Lavoro: We're checking if all is ok

23/05/22, 13:07 - Razvan Voicu: Everything is up and running from our side :)

23/05/22, 13:16 - Razvan Voicu: sending mail now

23/05/22, 13:20 - Chiara Lodesani, Lavoro: All seems ok also from our side.
We'll tested the patches asap

23/05/22, 13:57 - Chiara Lodesani, Lavoro: Razvan seems that D207 doesn't work

23/05/22, 13:58 - Chiara Lodesani, Lavoro: <Media omessi>

23/05/22, 14:00 - Chiara Lodesani, Lavoro: This is the same problem of the last deploy. Please unlock the BP04

23/05/22, 14:01 - Chiara Lodesani, Lavoro: and disable the inventory for BP*

23/05/22, 14:06 - Milo Barozzi: @Support Technician 21 we mean, please set threshold to 0

23/05/22, 14:06 - Milo Barozzi: in manner to avoid this issue happening on all pick stations

23/05/22, 14:08 - Razvan Voicu: Questo messaggio è stato eliminato.

23/05/22, 14:08 - Razvan Voicu: I check

23/05/22, 14:14 - Razvan Voicu: This doesn't look like D207

23/05/22, 14:14 - Milo Barozzi: Different one?

23/05/22, 14:24 - Razvan Voicu: related to K76, disabling inventory now

23/05/22, 14:26 - Milo Barozzi: it's K76!

23/05/22, 14:27 - Milo Barozzi: we wrote in the same moment it. Did you do something different for it in this deploy? Because in the last 2 weeks we had no troubles after evening patch

23/05/22, 14:27 - Milo Barozzi: pls, let me know when inventory is disabled.
thanks

23/05/22, 14:32 - Razvan Voicu: Inventory is disabled

23/05/22, 14:32 - Milo Barozzi: thanks!

23/05/22, 14:32 - Razvan Voicu: Can we do in the evening a new deploy?

23/05/22, 14:32 - Razvan Voicu: There was a problem with the revert we did 2 weeks ago, with K76

23/05/22, 14:32 - Razvan Voicu: And the bug that was then is also now
23/05/22, 14:34 - Milo Barozzi: yes, sure. @Company Employee 9 will send you instructions this afternoon
23/05/22, 14:35 - Razvan Voicu: Revert procedure problem, we saw it now and re-did it
23/05/22, 14:36 - Milo Barozzi: summing up, you reverted the reversion and left "original bug K76 from 09.05 lunchtime deploy"?
23/05/22, 14:37 - Razvan Voicu: Something like that
23/05/22, 14:37 - Razvan Voicu: My bad, sorry
23/05/22, 14:38 - Milo Barozzi: if you can fix it today evening, it'll be fine
23/05/22, 14:40 - Chiara Lodesani, Lavoro: Questo messaggio è stato eliminato.
23/05/22, 14:43 - Chiara Lodesani, Lavoro: Questo messaggio è stato eliminato.
23/05/22, 14:45 - Chiara Lodesani, Lavoro: @Support Technician 21 @Support Technician 12

DEPLOY CONFIRMED FOR THIS EVENING 20:50 - 21:10

Battle plan is the following:

- 20:30 @Support Technician 21 please put com.wamas.mfs.core.common.agvDisable = true
- @Company Employee 18 will ensure AGV will finish their last orders. Usually AGV takes 15 minutes to finish their orders
- As soon as no more orders need to be executed (it'll be close to 20:50), @Support Technician 21 please proceed with deploy
- hopefully everything will be back on track within 21:10
- @Support Technician 21 please put com.wamas.mfs.core.common.agvDisable = false as soon as you can
- @Support Technician 21 put again threshold inventory for PLAs from pStations (from 0 to 2).

I recommend not starting deploy before 20:50 because operators finish working at that time.

Remember to send email where you indicate that deploy is completed. Thank you

23/05/22, 14:46 - Razvan Voicu: Ok, thanks 🙌

23/05/22, 15:24 - Milo Barozzi: IMG-20220523-WA0003.jpg (file allegato)

@Support Technician 21 we have one pick station with 5 pick orders assigned at the same moment:

23/05/22, 15:25 - Milo Barozzi: this is strange, never seen before

23/05/22, 15:25 - Milo Barozzi: *before

23/05/22, 15:25 - Milo Barozzi: and the point is that pick order #3209634 for OBD0000410977 has not empty request in OG525 and it's the one he has to continue

23/05/22, 15:26 - Milo Barozzi: IMG-20220523-WA0004.jpg (file allegato)

@Support Technician 21 can the mess come from this inventory?

23/05/22, 15:26 - Milo Barozzi: +K76?

23/05/22, 15:30 - Razvan Voicu: Most likely

23/05/22, 15:30 - Milo Barozzi: OMG

23/05/22, 15:30 - Razvan Voicu: But after this evening's deploy for K76 revert, we can check if this occurs from another issue

23/05/22, 15:31 - Milo Barozzi: this for sure

23/05/22, 15:31 - Milo Barozzi: to solve now, I think to finalize pick order for OBD0000413193

23/05/22, 15:31 - Milo Barozzi: do you agree?

23/05/22, 15:32 - Milo Barozzi: and for OBD0000413197 also

23/05/22, 15:32 - Razvan Voicu: but is station blocked now?

23/05/22, 15:32 - Milo Barozzi: yes, it is

23/05/22, 15:32 - Razvan Voicu: what's showing on dialog

23/05/22, 15:32 - Milo Barozzi: Wait for....

23/05/22, 15:33 - Milo Barozzi: it's blocked because he has all sources occupied by pallets for OBD0000410977, but no destination

23/05/22, 15:33 - Razvan Voicu: I think the destination can be the negative pallet

23/05/22, 15:33 - Milo Barozzi: IMG-20220523-WA0005.jpg (file allegato)
with the new feature you can appreciate it in a glance 😊

23/05/22, 15:33 - Milo Barozzi: nono, negative picking was already done

23/05/22, 15:33 - Razvan Voicu: yes, but the pallet is still there

23/05/22, 15:34 - Milo Barozzi: IMG-20220523-WA0006.jpg (file allegato)

23/05/22, 15:34 - Razvan Voicu: The destination pallet from negative pick can be target for pick
23/05/22, 15:34 - Razvan Voicu: if the pallet is not full
23/05/22, 15:35 - Milo Barozzi: I agree, but the only shipLU for that OBD is at foiling1 now 🤖
23/05/22, 15:35 - Razvan Voicu: oh
23/05/22, 15:35 - Milo Barozzi: IMG-20220523-WA0007.jpg (file allegato)
23/05/22, 15:37 - Milo Barozzi: I think he did inventory somehow on negative pick pallet at destination
23/05/22, 15:37 - Milo Barozzi: IMG-20220523-WA0008.jpg (file allegato) since picked qty is 0
23/05/22, 15:38 - Razvan Voicu: but then again that pallet left for foiling with 20SO
23/05/22, 15:38 - Razvan Voicu: 20 SC*
23/05/22, 15:38 - Milo Barozzi: but it's not the same item
23/05/22, 15:38 - Razvan Voicu: Ok for now sure, let's try to cancel soem POs for station 5
23/05/22, 15:38 - Razvan Voicu: to clear the air
23/05/22, 15:38 - Razvan Voicu: and make room for another pallets at destination
23/05/22, 15:39 - Milo Barozzi: ok, I'll clean the two OBDs I told you
23/05/22, 15:39 - Milo Barozzi: gimme 1 min, pls
23/05/22, 15:40 - Razvan Voicu: oh, the one at foiling is from another picking order for the same OBD
23/05/22, 15:40 - Milo Barozzi: finalized pick activity for OBD0000413193 and for OBD0000413192
23/05/22, 15:40 - Milo Barozzi: yes it is, exactly
23/05/22, 15:40 - Milo Barozzi: I think something went bad with inventory
23/05/22, 15:41 - Milo Barozzi: we're still having no empty request for OBD0000410977
23/05/22, 15:41 - Milo Barozzi: I'll stop pick station in manner the system is not giving it more pick orders
23/05/22, 15:41 - Milo Barozzi: otherwise I'm in a While(1) loop
23/05/22, 15:45 - Razvan Voicu: I suggest we finish this PO also
23/05/22, 15:45 - Razvan Voicu: and post-pick obd agian
23/05/22, 15:46 - Milo Barozzi: you mean OBD0000410977?
23/05/22, 15:46 - Milo Barozzi: I stopped pick station, finalized all POs for all OBDs except OBD0000410977 and OBD0000412272. Result: no empty request for OBD0000410977 and negative picking pallet for OBD0000412272 is coming...
23/05/22, 15:47 - Milo Barozzi: my idea is that he'll be able to pick for OBD0000412272 when negative arrives, but then he'll be stuck again
23/05/22, 15:47 - Milo Barozzi: do you agree?
23/05/22, 15:47 - Razvan Voicu: Not really
23/05/22, 15:48 - Milo Barozzi: 😞?
23/05/22, 15:49 - Razvan Voicu: What I believe the situation was
1) Negative arrived
2) Inventory = 0 (because of k76 the shipmentLu was disconnected)
3) This negative pallet could have been a destination for the pallet pick from sources location
23/05/22, 15:49 - Milo Barozzi: 4)... but actually it couldn't = pick station stucked?
23/05/22, 15:50 - Razvan Voicu: yes because it didn't need an empty request because it had that negative
23/05/22, 15:50 - Razvan Voicu: that's my explanation for this
23/05/22, 15:50 - Milo Barozzi: could be... so it's K76 triggering the bad situation
23/05/22, 15:51 - Milo Barozzi: with fixed K76 we should never see it again in our whole lives...
23/05/22, 15:51 - Razvan Voicu: yep
23/05/22, 15:51 - Razvan Voicu: let me check if I can trigger somehow empty
23/05/22, 15:51 - Milo Barozzi: btw, now it can work on the other order, but no empty request for OBD0000410977. Shall I try to finalize pick order for OBD0000410977?
23/05/22, 15:51 - Milo Barozzi: ah ok...
23/05/22, 15:52 - Razvan Voicu: work on the other order

23/05/22, 15:52 - Razvan Voicu: maybe after order switch it will refresh the context and have the empty request sent
23/05/22, 15:52 - Razvan Voicu: while I do my analysis
23/05/22, 15:52 - Milo Barozzi: already did, but he's stuck again since all sources are full
23/05/22, 15:52 - Milo Barozzi: 😞
23/05/22, 15:53 - Milo Barozzi: so the next pallet for this order cannot come to pick station
23/05/22, 15:53 - Razvan Voicu: Let's kill it
23/05/22, 15:53 - Milo Barozzi: I'm shooting the sheriff...
23/05/22, 15:53 - Adrian Cindea: K76 has only an advantage ... deploy experience
23/05/22, 15:54 - Milo Barozzi: unfortunately yes... that's the only one we can see 🤔🙄
23/05/22, 15:54 - Milo Barozzi: killed
23/05/22, 15:55 - Milo Barozzi: I'll wait a minute for a source to be free, checking source for the only remained order is released from SRM
23/05/22, 15:55 - Milo Barozzi: than I'll re-activate the pick station
23/05/22, 15:55 - Milo Barozzi: and post-pick all the orders I killed
23/05/22, 15:55 - Razvan Voicu: Yes
23/05/22, 15:59 - Milo Barozzi: set pick station again to "picking GtP", currently no other orders assigned to that pick station... waiting
23/05/22, 16:00 - Razvan Voicu: I triggered the station assignment worker
23/05/22, 16:00 - Razvan Voicu: Orders have arrived
23/05/22, 16:00 - Milo Barozzi: yep
23/05/22, 16:00 - Milo Barozzi: all fine
23/05/22, 16:01 - Milo Barozzi: I think was just a matter of waiting a little more...
23/05/22, 16:01 - Razvan Voicu: I believe the timeout is 5 minutes
23/05/22, 16:01 - Razvan Voicu: Ok, all good now
23/05/22, 16:01 - Milo Barozzi: btw we did the workaround somehow
23/05/22, 16:03 - Razvan Voicu: 👍
23/05/22, 20:27 - Razvan Voicu: Hi @Company Employee 18
In 4 minutes I will set agvDisable = true
23/05/22, 20:48 - Company Employee 18: Ok Raizan
23/05/22, 20:48 - Company Employee 18: I am ready
23/05/22, 20:48 - Company Employee 18: We wait the agv are stopped
23/05/22, 20:50 - Razvan Voicu: AGVs still moving
23/05/22, 20:51 - Razvan Voicu: IMG-20220523-WA0016.jpg (file allegato)
23/05/22, 20:52 - Company Employee 18: Yes! Im waiting for everyone to stop!
After that I say you start ok?
23/05/22, 20:53 - Razvan Voicu: Ok, I wait, let me know when I can close WAMAS
23/05/22, 20:53 - Razvan Voicu: But I see the agv in manual mode, it won't move by itself
23/05/22, 20:54 - Company Employee 18: Is the last we have unlock now
23/05/22, 20:55 - Company Employee 18: Raizan start!
23/05/22, 20:55 - Razvan Voicu: Ok
23/05/22, 20:57 - Company Employee 18: Estimated time? 😞
23/05/22, 20:58 - Razvan Voicu: around 15 mins
23/05/22, 20:58 - Company Employee 18: Ok 👍
23/05/22, 21:11 - Company Employee 18: Finish raizan?
23/05/22, 21:11 - Matteo Gaibani ha abbandonato.
23/05/22, 21:12 - Company Employee 18: @Support Technician 21?
23/05/22, 21:12 - Razvan Voicu: Now yes
23/05/22, 21:12 - Razvan Voicu: Everything should be up
23/05/22, 21:14 - Company Employee 18: Perfect! well done 👍
23/05/22, 21:14 - Company Employee 18 ha aggiunto Giuseppe Romano, Personale.
23/05/22, 21:16 - Razvan Voicu: Mail sent, that's it for today, thank you!
23/05/22, 21:16 - Razvan Voicu: Have a nice evening
23/05/22, 21:17 - Company Employee 18: I have already restart the pc 👍
23/05/22, 21:17 - Company Employee 18: Thx
23/05/22, 21:18 - Milo Barozzi: Good evening and thanks to everybody
23/05/22, 21:18 - Razvan Voicu: Inventory threshold for pStation PLAs set from 0->2
23/05/22, 21:19 - Milo Barozzi: Super! thanks

25/05/22, 08:15 - Nicola Bernardi: IMG-20220525-WA0000.jpg (file allegato)
Can you help us?
25/05/22, 08:21 - Support Technician 25: Did it sefl resolve?
25/05/22, 08:25 - Milo Barozzi: Yes, it did. thanks
30/05/22, 09:22 - Milo Barozzi: IMG-20220530-WA0000.jpg (file allegato)
@Support Technician 12 @Support Technician 11 @Support Technician 21 Houston...
I think we have a big problem... there are not recorded data in CC015 from 6 AM
today on
30/05/22, 09:24 - Milo Barozzi: last record is this one:

30.05.2022 06:01:40 32316441 WH1 59220566 WH1 TRI-003-1 S32 01-
01-01 Movimentata pl3 ConfirmTransportDepositionHandlerImpl-R
30/05/22, 09:24 - Milo Barozzi: from 06:01:40
30/05/22, 09:24 - Milo Barozzi: opening a ticket, pls check ASAP since we're
blind on the system now
30/05/22, 09:27 - Razvan Voicu: ok
30/05/22, 09:27 - Razvan Voicu: check
30/05/22, 09:28 - Milo Barozzi: I checked SM003 and it's recording data
30/05/22, 09:28 - Milo Barozzi: I guess is something related to dimension of
CC015 table, but please DO NOT CUT IT, we cannot lose old data
30/05/22, 10:14 - Milo Barozzi: second big problem of the day... all the
following OBDs are reporting missing items, while material is present and not
reserved by other orders:

ADBATLATL000058455	OBD0000414823

30/05/22, 10:15 - Milo Barozzi: IMG-20220530-WA0001.jpg (file allegato)
one example in detail, OBD*416379:
30/05/22, 10:15 - Milo Barozzi: IMG-20220530-WA0002.jpg (file allegato)
30/05/22, 10:16 - Milo Barozzi: could you have messed something when enlarging
table sizes a while ago?
30/05/22, 10:21 - Milo Barozzi: @Support Technician 12 @Support Technician 21
@Support Technician 11
we investigated a while and
1) I don't think it's related to enlarging table size
2) it seems related to "supermarket" kind of orders
3) it seems WAMAS reserves WholeLUs, but it's not creating picking activities
30/05/22, 10:21 - Milo Barozzi: do you want me to open a ticket for this? pls,
let me know how to proceed
30/05/22, 10:25 - Razvan Voicu: Sure, open a ticket and we ll check
30/05/22, 10:26 - Razvan Voicu: I dont see how enlarging could have caused this
30/05/22, 10:26 - Milo Barozzi: don't know, maybe if you ran some scripts...
30/05/22, 10:26 - Milo Barozzi: I'll open a ticket
30/05/22, 10:26 - Milo Barozzi: you'll find a mail soon
30/05/22, 12:00 - Milo Barozzi: If you see a lot of red spots on lighthouse
don't care about it..
It's cleaning time
02/06/22, 06:56 - Razvan Voicu: Hello. At 7:15 IT time we will start
02/06/22, 07:00 - Razvan Voicu: @Company Employee 15
02/06/22, 07:01 - Stefano Dall'Asta, Lavoro: Ok i tell everyone
02/06/22, 07:15 - Razvan Voicu: @Company Employee 15 do you want me to wait for
signal or I start?
02/06/22, 07:15 - Stefano Dall'Asta, Lavoro: You can start
02/06/22, 07:16 - Stefano Dall'Asta, Lavoro: Please tell me when we can log back
in.thank you
02/06/22, 07:53 - Razvan Voicu: Deploy is done
02/06/22, 07:54 - Stefano Dall'Asta, Lavoro: Ok i tell everyone
02/06/22, 07:54 - Stefano Dall'Asta, Lavoro: Thanks
02/06/22, 07:56 - Razvan Voicu: Thanks aswell
02/06/22, 08:58 - Stefano Dall'Asta, Lavoro: Hi, Andrea Is working on picking
stations 3 and 4. Please do not use them or send pallet there. Thank you
02/06/22, 09:32 - Mihai Soceanu: I will use 1 and 2
02/06/22, 09:45 - Mihai Soceanu: IMG-20220602-WA0000.jpg (file allegato)
02/06/22, 09:45 - Mihai Soceanu: can i fix it
02/06/22, 09:45 - Mihai Soceanu: ?
02/06/22, 09:45 - Mihai Soceanu: if there is a phisical pallet there
02/06/22, 09:45 - Mihai Soceanu: :)
02/06/22, 09:45 - Stefano Dall'Asta, Lavoro: I ask
02/06/22, 09:45 - Mihai Soceanu: ok thx
02/06/22, 09:46 - Stefano Dall'Asta, Lavoro: Yes you can fix It
02/06/22, 09:46 - Stefano Dall'Asta, Lavoro: Thanks Mihai
02/06/22, 09:47 - Mihai Soceanu: ok np
02/06/22, 10:03 - Mihai Soceanu: guys
02/06/22, 10:03 - Mihai Soceanu: i need to do a MFS restart in 10 min
02/06/22, 10:03 - Mihai Soceanu: so please stop inserting pallets
02/06/22, 10:05 - Stefano Dall'Asta, Lavoro: Ok i tell them
02/06/22, 10:45 - Mihai Soceanu: i will restart MFS
07/06/22, 12:24 - Milo Barozzi: Dear All, in about 5 to 10 minutes I'll put
AgvDisable to true. I'll let you know when done
07/06/22, 12:30 - Milo Barozzi: there are only a few missions in Cway, that's
why I can get closer to 12:40 with agvDisable=true
07/06/22, 12:30 - Mihai Soceanu: Ok thx
07/06/22, 12:30 - Milo Barozzi: @Support Technician 12 @Support Technician 6
@Support Technician 21 @Support Technician 11 set
com.wamas.mfs.core.common.agvDisable = true
07/06/22, 12:30 - Milo Barozzi: I'll let you know when all missions in Cway are
consumed
07/06/22, 12:31 - Mihai Soceanu: Can we do it now ?

07/06/22, 12:31 - Milo Barozzi: please, wait for AGV to finish their missions
07/06/22, 12:33 - Milo Barozzi: 6 missions missing
07/06/22, 12:35 - Mihai Soceanu: Super
07/06/22, 12:36 - Milo Barozzi: 3 are missing now
07/06/22, 12:38 - Milo Barozzi: one needs manual intervention, maintenance is fixing
07/06/22, 12:38 - Mihai Soceanu: ok
07/06/22, 12:38 - Milo Barozzi: 2 missing....
07/06/22, 12:39 - Milo Barozzi: I would say we'll be perfectly on time
07/06/22, 12:39 - Milo Barozzi: 23 and 13 need to deposit two pallets in S47 then we're done
07/06/22, 12:41 - Milo Barozzi: last one is depositing
07/06/22, 12:42 - Milo Barozzi: GO GO GO
07/06/22, 12:42 - Mihai Soceanu: i will also restart Hive
07/06/22, 12:42 - Milo Barozzi: @Support Technician 6 @Support Technician 12 @Support Technician 11 @Support Technician 21 please proceed with deploy
07/06/22, 12:43 - Milo Barozzi: when done, please set to false
com.wamas.mfs.core.common.agvDisable 🙏
07/06/22, 12:44 - Mihai Soceanu: Hive is restarted
07/06/22, 12:44 - Milo Barozzi: 👍
07/06/22, 12:44 - Milo Barozzi: now it's WAMAS turn, right?
07/06/22, 12:45 - Mihai Soceanu: yes
07/06/22, 12:45 - Milo Barozzi: 👍 perfect
07/06/22, 13:04 - Milo Barozzi: I heard the "beeeeeep" of MFS reset...
07/06/22, 13:04 - Mihai Soceanu: :)
07/06/22, 13:04 - Milo Barozzi: Can we consider deploy finished? Shall I tell people to re-enter?
07/06/22, 13:05 - Mihai Soceanu: 2 min pls and we start
07/06/22, 13:05 - Mihai Soceanu: AGVs
07/06/22, 13:05 - Milo Barozzi: ok, manual area can start?
07/06/22, 13:08 - Milo Barozzi: AGVs moving
07/06/22, 13:08 - Milo Barozzi: Can I trigger start in manual area and for desktop users?
07/06/22, 13:08 - Mihai Soceanu: all is finished
07/06/22, 13:09 - Mihai Soceanu: please proceed
07/06/22, 13:09 - Mihai Soceanu: :)
07/06/22, 13:09 - Milo Barozzi: 🤔🤔
07/06/22, 13:18 - Milo Barozzi: @Support Technician 6 @Support Technician 12 @Support Technician 21 @Support Technician 11 it seems we have an issue:
07/06/22, 13:18 - Milo Barozzi: IMG-20220607-WA0006.jpg (file allegato)
07/06/22, 13:18 - Milo Barozzi: IG511 -> selecting one entry --> go into detail > trying to identify the pallet > saying ok in the dialog opening > getting this error
07/06/22, 13:18 - Milo Barozzi: "StoCompAssemblage couldn't be created"
07/06/22, 13:19 - Milo Barozzi: shall you kindly check it now, it could be a show stopper
07/06/22, 13:20 - Mihai Soceanu: we check now
07/06/22, 13:20 - Milo Barozzi: thanks
07/06/22, 13:25 - Mihai Soceanu: pls try again
07/06/22, 13:25 - Milo Barozzi: ok
07/06/22, 13:26 - Milo Barozzi: document #1735 working, trying another one with different user
07/06/22, 13:26 - Mihai Soceanu: ok
07/06/22, 13:27 - Milo Barozzi: #1736 worked too
07/06/22, 13:27 - Milo Barozzi: is it possible that while you were fixing these they met some issues in releasing OG buffer of other deliveries?
07/06/22, 13:29 - Mihai Soceanu: problem should be fixed now
07/06/22, 13:29 - Milo Barozzi: with IG511 is working and with an OBD they reported to me was not possible to release, I released it now
07/06/22, 13:29 - Milo Barozzi: was a DB misalignment?
07/06/22, 13:30 - Mihai Soceanu: some counters in WAMAS where not updated properly
07/06/22, 13:31 - Mihai Soceanu: was a "user" mistake on our side
07/06/22, 13:31 - Mihai Soceanu: srry

07/06/22, 13:31 - Milo Barozzi: no problem, good we recognized it immediately and fixed immediately 🛠️

07/06/22, 13:33 - Milo Barozzi: IMG-20220607-WA0007.jpg (file allegato)

07/06/22, 13:34 - Milo Barozzi: pick station #9 in unpicking mode, when they scan LU in BP09 S03 they got that message and they cannot continue

07/06/22, 13:34 - Mihai Soceanu: stop/start application pls

07/06/22, 13:34 - Mihai Soceanu: i think is side effect of what we said above

07/06/22, 13:34 - Milo Barozzi: we already reboot all PCs at pick stations

07/06/22, 13:35 - Milo Barozzi: aaaaah ok

07/06/22, 13:35 - Milo Barozzi: need to close WAMAS or just the dialog?

07/06/22, 13:35 - Mihai Soceanu: pls WAMAS

07/06/22, 13:35 - Mihai Soceanu: to be sure

07/06/22, 13:35 - Milo Barozzi: doing now

07/06/22, 13:35 - Mihai Soceanu: ok thx

07/06/22, 13:36 - Milo Barozzi: a little bit of patience more please... hamsters are running...

07/06/22, 13:39 - Milo Barozzi: you were right! Rebooting worked. Pick station #9 back on track

07/06/22, 13:39 - Milo Barozzi: all others are working

07/06/22, 13:39 - Mihai Soceanu: ok thank you

07/06/22, 13:39 - Adrian Cindea: It was my fault related to counter increased (manually action)

07/06/22, 13:39 - Milo Barozzi: you're welcome. thanks for prompt supporting/solution

07/06/22, 13:40 - Milo Barozzi: no worries, it had really small side effects

07/06/22, 13:40 - Milo Barozzi: @Support Technician12 one more point to be added in the checklist? 🙋

07/06/22, 13:42 - Milo Barozzi: @Support Technician 12 only patches for CR43 were inside this deploy, right?

07/06/22, 13:42 - Mihai Soceanu: Yes

07/06/22, 13:42 - Milo Barozzi: 👍👍

07/06/22, 13:42 - Milo Barozzi: Everything seems running smooth/as usual now

07/06/22, 13:42 - Milo Barozzi: I take a 45 minutes break to eat something, than we start testing CR43 again

07/06/22, 13:42 - Milo Barozzi: thank you so far

07/06/22, 13:43 - Mihai Soceanu: Super 😊

07/06/22, 13:43 - Mihai Soceanu: Thx the same

07/06/22, 13:44 - Milo Barozzi: you're welcome!

09/06/22, 11:08 - Milo Barozzi ha aggiunto Tai Pham.

09/06/22, 12:50 - Tai Pham: Hello, now I will prevent allocation for all AGVs for the system update. Will notice when it's ready. Thank you!

09/06/22, 12:51 - Benedetta Zini: Hi! Okay perfect, thank you!

09/06/22, 13:09 - Tai Pham: The system now is up again.

09/06/22, 20:29 - Razvan Voicu: Hello.

AgvDisable set to true

09/06/22, 20:40 - Company Employee 18: Ok Raizan we check the agv are empty

09/06/22, 20:41 - Company Employee 18: After that I will tell you start

09/06/22, 20:44 - Company Employee 18: Raizan start 🚀🚀

09/06/22, 20:44 - Razvan Voicu: I need to wait until 21:50

09/06/22, 20:44 - Razvan Voicu: 20:50*

09/06/22, 20:45 - Company Employee 18: Ok we are here

09/06/22, 20:50 - Razvan Voicu: Logging out users

09/06/22, 21:03 - Razvan Voicu: Services up and running, checking some more stuff and sending mail

09/06/22, 21:09 - Milo Barozzi: 👍👍

09/06/22, 21:09 - Milo Barozzi: Pls confirm everything is fine when checks are finished

09/06/22, 21:11 - Razvan Voicu: Mail sent, everything is green. Have a nice evening!

09/06/22, 21:16 - Milo Barozzi: Thanks so much

09/06/22, 21:16 - Milo Barozzi: You too

09/06/22, 21:17 - Milo Barozzi: @Company Employee 12 tutto ok? Lavorano al pick?

09/06/22, 21:20 - Andrea Brunetti: Si stanno lavorando 👍

09/06/22, 21:33 - Milo Barozzi: Ottimo, grazie Andre

10/06/22, 12:46 - Tai Pham: Hello, now I will prevent allocation for all AGVs for the system update. Will notice when it's ready. Thank you!

10/06/22, 13:03 - Tai Pham: The system is now up running again!

17/06/22, 06:21 - Razvan Voicu: Hello I check and see no problems

17/06/22, 06:21 - Razvan Voicu: I understand problem solved

17/06/22, 07:24 - Company Employee 18: Yes Raizan

17/06/22, 07:25 - Company Employee 18: While we were waiting for your help, we tried to solve it

24/06/22, 14:34 - Milo Barozzi: @Support Technician 21 @Support Technician 12 @Support Technician 11 access to WAMAS DB via SQL is not working for anyone here. Shall you kindly make a check, please? thank you

24/06/22, 14:35 - Adrian Cindea: I am connected on database

24/06/22, 14:35 - Milo Barozzi: and this deny us to connect?

24/06/22, 14:36 - Adrian Cindea: No

24/06/22, 14:36 - Adrian Cindea: From my computer database is accesible using a different user

24/06/22, 14:37 - Adrian Cindea: It is clear

24/06/22, 14:37 - Milo Barozzi: with atlas_prod_cust?

24/06/22, 14:37 - Adrian Cindea: IMG-20220624-WA0008.jpg (file allegato)

24/06/22, 14:37 - Adrian Cindea: There are to many sessions

24/06/22, 14:38 - Adrian Cindea: Close them or it is needed to close them from db side

24/06/22, 14:38 - Milo Barozzi: I don't undestand how it's possible since are always the same users from us accessing DB

24/06/22, 14:38 - Milo Barozzi: shall you kindly kill them all please?

24/06/22, 14:39 - Adrian Cindea: I will try

24/06/22, 14:39 - Milo Barozzi: now it's working for me

24/06/22, 14:40 - Milo Barozzi: I don't know why....

24/06/22, 14:40 - Adrian Cindea: Session was closed

24/06/22, 14:40 - Adrian Cindea: The same user but from a lot of computers

24/06/22, 14:40 - Milo Barozzi: sessions limit is 10?

24/06/22, 14:41 - Adrian Cindea: A connection = a session

24/06/22, 14:41 - Milo Barozzi: clear clear

24/06/22, 14:41 - Milo Barozzi: limit for atlas_prod_cust is 10 connections?

24/06/22, 14:42 - Adrian Cindea: IMG-20220624-WA0009.jpg (file allegato)

24/06/22, 14:42 - Adrian Cindea: Yeap

24/06/22, 14:42 - Milo Barozzi: that's the point....

24/06/22, 14:43 - Adrian Cindea: I know

24/06/22, 14:43 - Milo Barozzi: when everybody of us using it is connected, we're move than 10...

24/06/22, 14:43 - Adrian Cindea: 😊

24/06/22, 14:43 - Milo Barozzi: will be a big deal give 5 more sessions?

24/06/22, 14:43 - Adrian Cindea: If you dont send us email about slowness no

24/06/22, 14:44 - Adrian Cindea: I dont understand it

24/06/22, 14:44 - Adrian Cindea: Copy data on another side and both that side as you wish

24/06/22, 14:45 - Adrian Cindea: Every hour day copy data.

24/06/22, 14:45 - Milo Barozzi: It's yet to come...

24/06/22, 14:45 - Adrian Cindea: Instead all people to query prod db

24/06/22, 14:45 - Adrian Cindea: All = 10

24/06/22, 14:46 - Adrian Cindea: And archive data... not productive data

24/06/22, 14:47 - Milo Barozzi: that could be a chance for some applications, but not for some others. for instance, if I need to know at 2PM how much is the picking performance in automated area, I need to access prod DB

24/06/22, 14:47 - Milo Barozzi: instead, if I need to make an analysis on the last 4 months, I have no problems in querying archived data DB (if it exists)

24/06/22, 14:49 - Adrian Cindea: 4 sessions right now

24/06/22, 14:50 - Milo Barozzi: another example is the following: we have a monitor with 7 traffic lights showing how many stack of empties we have in the HBW and updating every 30 minutes to know how much time we have for replenishing them. This is based on prod db and must be based on it, because otherwise we cannot know the current number of empty stacks in HBW1

24/06/22, 14:50 - Milo Barozzi: it's possible that some sessions were kept opened "hanged up"?

24/06/22, 14:51 - Adrian Cindea: It is possible though oracle kill them after a while
 24/06/22, 14:52 - Milo Barozzi: this could be an idea..
 24/06/22, 14:52 - Milo Barozzi: maybe every day at 23:59:59
 24/06/22, 14:52 - Adrian Cindea: The idea is to keep archiving small ... 1 day and all others in history server
 24/06/22, 14:53 - Milo Barozzi: this is the idea for the "keeping years of movements" right?
 24/06/22, 14:53 - Adrian Cindea: Yeap ... out of production
 24/06/22, 14:53 - Adrian Cindea: Mounts of data
 24/06/22, 14:53 - Milo Barozzi: it can work, but WAMAS should be "clever" enough to understand that has to "fish" data from today from a DB and data from yesterday back until x months from another DB
 24/06/22, 14:53 - Adrian Cindea: Maybe some of them are only garbage ...
 24/06/22, 14:54 - Adrian Cindea: Should is the word
 24/06/22, 14:54 - Milo Barozzi: I mean, if I make a search from CC015 on an LU, I want to see at least 3-4 months ago history of that LU, today movements included
 24/06/22, 14:55 - Milo Barozzi: or, we can review your sentence and say...

The idea is to keep archiving small ... *4 months* and all others in history server

24/06/22, 14:55 - Milo Barozzi: this will solve the topic in a single shot
 24/06/22, 14:56 - Adrian Cindea: 100 days is default ... but activity protocol is not needed so long
 24/06/22, 14:56 - Adrian Cindea: It is logging data not history data
 24/06/22, 14:56 - Milo Barozzi: sometimes it's helpful to understand some processes
 24/06/22, 14:56 - Milo Barozzi: in "debugging" strange behaviours for instance
 24/06/22, 14:57 - Adrian Cindea: Application logs is 1 months and some logs in db are longer ... no logs enough to fix only assumptions
 24/06/22, 14:57 - Milo Barozzi: one example: I have a colleague in charge for returns of defective material. usually this process takes 2-3 months, so it's good for him to check CC015, OG070, SM003 and similars to understand who moved/touched that material and understand if the return causal is fine or not, if it's Atlas' fault or Customer's fault
 24/06/22, 14:58 - Adrian Cindea: It depends how long is the live of obd
 24/06/22, 14:59 - Adrian Cindea: Normally it is some days 1 week .. a few more not months
 24/06/22, 14:59 - Milo Barozzi: Until Spring 2022 we worked with a retention time of 130 days and it was fine for everyday activities.
 According to that, I think we should think a system that runs every night and every night is moving older-than-130-days from productive DB to history DB
 24/06/22, 15:00 - Milo Barozzi: should a solution like this fine for you?
 24/06/22, 15:01 - Adrian Cindea: It is a possible solution ... as i written in email
 24/06/22, 15:02 - Adrian Cindea: I am waiting product feedback a lilte before to take decision
 24/06/22, 15:02 - Milo Barozzi: My suggestion is to organize a VC between me, you and the others you think are important to be there, to discuss this solution and, maybe, decide it's fine for both sides 😊
 24/06/22, 15:03 - Milo Barozzi: when you're ready for it, i'll find the time for sure! 😊
 24/06/22, 15:04 - Milo Barozzi: @Support Technician 12 sorry to ask, but... how many sessions are linked now? I cannot access anymore again.....
 24/06/22, 21:37 - Adrian Cindea: Sorry i was in a meeting
 27/06/22, 09:13 - Milo Barozzi: @Support Technician 12 @Support Technician 21 @Support Technician 6 @Support Technician 11 there's something strange happening at MFS level now... there are a lot of TPOs in WAMAS that should be in Cway, but Cway it's empty and all AGVs are not moving. Furthermore, we have a lot of conveyors with "transport order without occupation" and there are ghosts at foiling lines infeeds
 27/06/22, 09:13 - Milo Barozzi: shall you kindly check it now? we're blocked
 27/06/22, 09:14 - Razvan Voicu: ok

27/06/22, 09:14 - Razvan Voicu: But we will need a ticket for this please, not right now, when you can
27/06/22, 09:15 - Milo Barozzi: if you can check immediately, meanwhile I'll write the e-mail to CSS, ok?
27/06/22, 09:15 - Razvan Voicu: I check now
27/06/22, 09:15 - Milo Barozzi: thank you
27/06/22, 09:15 - Milo Barozzi: gonna writing the mail to CSS
27/06/22, 09:18 - Milo Barozzi: IMG-20220627-WA0001.jpg (file allegato)
27/06/22, 09:18 - Milo Barozzi: IMG-20220627-WA0007.jpg (file allegato)
@Support Technician 21 if it can help, physically on CUs 375-379-384-388 there are no pallets at the moment, while in Lhouse is shown like this:
27/06/22, 09:19 - Razvan Voicu: should be ok now
27/06/22, 09:19 - Milo Barozzi: @Support Technician 21 seems back on track now
27/06/22, 09:19 - Milo Barozzi: yes, confirm
27/06/22, 09:20 - Company Employee 18: Ok we run to confirm
27/06/22, 09:20 - Milo Barozzi: @Support Technician 21 just for curiosity... what was the issue? 😞
27/06/22, 09:21 - Razvan Voicu: at the moment I have just the error, need to investigate
27/06/22, 09:21 - Razvan Voicu: it was a stack of AF
27/06/22, 09:21 - Milo Barozzi: 👍 ok, important is that now we can run..
27/06/22, 09:22 - Razvan Voicu: that arrived in S46A11X018Y01Z2, but the message had a problem that blocked the queue
27/06/22, 09:22 - Milo Barozzi: aaaah, I see
27/06/22, 09:28 - Milo Barozzi: @Support Technician 21 mail to CSS sent. Its title is: "TOTAL BLOCK in automated area | No AGV moving + ghost pallets on foiling infeeds + TPO without occupation where there's no pallet"
27/06/22, 09:30 - Razvan Voicu: thanks
27/06/22, 09:30 - Milo Barozzi: you're welcome
27/06/22, 09:58 - Milo Barozzi: IMG-20220627-WA0005.jpg (file allegato)
@Support Technician 12 @Support Technician 21 @Support Technician 11 please, check this ASAP. Thank you
27/06/22, 09:59 - Milo Barozzi: WAMASAPP - 10.32.0.5 Memory: Physical Memory (SNMP Memory) Warning (before: Down) (4 % (Percent Available Memory) is below the warning limit of 4
27/06/22, 11:30 - Razvan Voicu: Closed a few things, now it's about 86% 👍
27/06/22, 11:32 - Milo Barozzi: IMG-20220627-WA0004.jpg (file allegato)
we had a step from 3,9% to 13,66% free
27/06/22, 11:32 - Razvan Voicu: yep, firefox with lighthouse took a lot 😊
27/06/22, 11:32 - Milo Barozzi: 👍 thanks for checking and fixing
28/06/22, 09:00 - Tai Pham ha abbandonato.
28/06/22, 17:17 - Milo Barozzi: Questo messaggio è stato eliminato.
30/06/22, 15:30 - Milo Barozzi: Dear All, issue Q11 which is "need to be checked live" is happening right now. Do somebody of you can do a check, please? thank you @Support Technician 21 @Support Technician 11
01/07/22, 08:00 - Milo Barozzi ha aggiunto Stefano Dall'Asta, Personale.
01/07/22, 12:42 - Alexandru Catarau: we are ready
01/07/22, 12:42 - Alexandru Catarau: Hi*
01/07/22, 12:44 - Milo Barozzi: Super, at 12.50 I'll put agvdisable = true
01/07/22, 12:44 - Milo Barozzi: I'll inform you live when done
01/07/22, 12:45 - Alexandru Catarau: at 13:20 we will not be ready
01/07/22, 12:45 - Milo Barozzi: Why? Adrian told 30mins was enough
01/07/22, 12:46 - Alexandru Catarau: 30 min from when agv's stopped
01/07/22, 12:46 - Alexandru Catarau: we are a little late for that :)
01/07/22, 12:46 - Milo Barozzi: Let's see
01/07/22, 12:47 - Milo Barozzi: I trust AGVs speed 😊
01/07/22, 12:47 - Milo Barozzi: com.wamas.mfs.core.common.agvDisable = true now
01/07/22, 12:48 - Milo Barozzi: AGVs start consuming missions
01/07/22, 12:52 - Milo Barozzi: 10 missions left (already 5 of them pallets are on AGVs)
01/07/22, 12:53 - Milo Barozzi: 6 (3 of them on AGVs)
01/07/22, 12:54 - Milo Barozzi: 5
01/07/22, 12:54 - Milo Barozzi: 4
01/07/22, 12:54 - Milo Barozzi: 2

01/07/22, 12:55 - Milo Barozzi: 1 mission left, AGV is depositing...
01/07/22, 12:55 - Milo Barozzi: @Support Technician 11 you can proceed!
01/07/22, 12:55 - Milo Barozzi: GO GO GO GO!
01/07/22, 12:56 - Alexandru Catarau: in progress
01/07/22, 12:56 - Alexandru Catarau: we'll write when all done
01/07/22, 12:56 - Milo Barozzi: "ignition, lift up"...🚀
01/07/22, 12:56 - Milo Barozzi: sure! Awaiting your next contact 😊
01/07/22, 13:20 - Milo Barozzi: @Support Technician 11 shall we go?
01/07/22, 13:24 - Alexandru Catarau: done
01/07/22, 13:24 - Alexandru Catarau: pls check and give usa prompt feedback
01/07/22, 13:25 - Milo Barozzi: advising all users they can log in again
01/07/22, 13:25 - Milo Barozzi: My client is still "writing objects"... 😊
01/07/22, 13:25 - Milo Barozzi: gimme 10-15 minutes for a first report
01/07/22, 13:26 - Alexandru Catarau: we are monitoring the system
01/07/22, 13:26 - Milo Barozzi: 👍
01/07/22, 13:27 - Milo Barozzi: IMG-20220701-WA0004.jpg (file allegato)
WAMAS > AS400 communication seems fine
01/07/22, 13:28 - Alexandru Catarau: yes, we checked the procesing immediatelly after restart
01/07/22, 13:28 - Milo Barozzi: IMG-20220701-WA0005.jpg (file allegato)
AS400 > WAMAS comm also fine
01/07/22, 13:28 - Milo Barozzi: 👍👍
01/07/22, 13:28 - Alexandru Catarau: parmeters are also set as they should be
01/07/22, 13:49 - Milo Barozzi: @Support Technician 11 everything's seems running smooth
01/07/22, 13:49 - Milo Barozzi: I have no bad notice from people onsite
01/07/22, 13:49 - Milo Barozzi: until which time are you available today? In case we recognize something is bad (i.e. with the new introduced patches)..
01/07/22, 13:59 - Alexandru Catarau: until 2pm your time (myself)
01/07/22, 14:00 - Alexandru Catarau: but write here if you seesomwthing wrong
01/07/22, 14:00 - Alexandru Catarau: guys will react promptly
01/07/22, 14:00 - Milo Barozzi: ok thank you
01/07/22, 14:09 - Alexandru Catarau: have a nice weekend everyone!
01/07/22, 14:10 - Milo Barozzi: thank you, the same!
01/07/22, 14:14 - Milo Barozzi: @Support Technician 11 @Support Technician 23 @Support Technician 21 seems TPOs are not working in manual area. When delivering a shipLU from Shipping buffer to S80 CA-TET locations, users are kicked out from RF terminl
01/07/22, 14:14 - Milo Barozzi: *terminal
01/07/22, 14:14 - Milo Barozzi: IMG-20220701-WA0006.jpg (file allegato)
01/07/22, 14:14 - Milo Barozzi: IMG-20220701-WA0007.jpg (file allegato)
01/07/22, 14:14 - Milo Barozzi: IMG-20220701-WA0008.jpg (file allegato)
01/07/22, 14:14 - Milo Barozzi: IMG-20220701-WA0009.jpg (file allegato)
01/07/22, 14:16 - Support Technician 23: we'll check
01/07/22, 14:16 - Milo Barozzi: 👍 ok, thank you. I'm trying to collect more pieces of info meanwhile
01/07/22, 14:17 - Milo Barozzi: colleague from manual area are reporting similar issue also with spontaenous TPO
01/07/22, 14:19 - Milo Barozzi: @Support Technician 23 sometimes it reports "LU-ID xxx has not a planned TPO"
01/07/22, 14:19 - Milo Barozzi: while it has
01/07/22, 14:19 - Support Technician 23: please request to try one of those again
01/07/22, 14:20 - Support Technician 23: I'm checking the log files now
01/07/22, 14:20 - Milo Barozzi: I'll do it immediately
01/07/22, 14:26 - Milo Barozzi: <Media omessi>
01/07/22, 14:26 - Milo Barozzi: @Support Technician 23 *NOT* WORKING unfortunately
01/07/22, 14:26 - Support Technician 23: please provide the mobile user
01/07/22, 14:30 - Milo Barozzi: dcosta1
01/07/22, 14:30 - Milo Barozzi: @Support Technician 23 it's dcosta1
01/07/22, 14:31 - Milo Barozzi: <Media omessi>
01/07/22, 14:31 - Milo Barozzi: @Support Technician 23 you can also see that when trying to enter in "Auto-Allocation" menu from mobile terminal it reports

there are no TPOs, while there are 🙌

01/07/22, 14:43 - Milo Barozzi: @Support Technician 23 do you have some piece of news please? all manual activities are in standby since 1 hour right now 😞

01/07/22, 14:43 - Milo Barozzi: manual activities related to TPOs = preparing orders, loading trucks, storing from production

01/07/22, 14:44 - Support Technician 23: we found something and we actively working to find the cause and fix it ASAP

01/07/22, 14:44 - Milo Barozzi: if you need to escalate to have more support, please do it since situation is quite critical

01/07/22, 14:45 - Milo Barozzi: awaiting for news. thank you so far

01/07/22, 14:45 - Support Technician 23: we all work on this

01/07/22, 14:47 - Milo Barozzi: 🙌🙌 thanks

01/07/22, 14:53 - Milo Barozzi: IMG-20220701-WA0011.jpg (file allegato)

@Support Technician 23 just wanted to let you know that after deploy CPU LOAD for WAMASDB machine spiked incredibly:

01/07/22, 14:53 - Milo Barozzi: seems there's a process consuming a lot of CPU

01/07/22, 14:54 - Milo Barozzi: hope this helps

01/07/22, 14:56 - Milo Barozzi: due to this, also desktop users have a slow down of "finish manually" TPO

01/07/22, 15:08 - Milo Barozzi: @Support Technician 23 I'm sorry to stress, but if you think the issue is related to some patches put in the new deploy (SF#01236989 - A123? F #01232052 - H59?) I think it's time to evaluate a rollback, since situation here is not sustainable

01/07/22, 15:09 - Razvan Voicu: it worked ok until 14:19

01/07/22, 15:09 - Milo Barozzi: if, otherwise it's a deploy process related issue, I kindly ask you how's your deepenings

01/07/22, 15:09 - Razvan Voicu: so no patches put

01/07/22, 15:10 - Milo Barozzi: on one hand side it's a good piece of news, on the other hand side... it's not

01/07/22, 15:11 - Razvan Voicu: try now

01/07/22, 15:12 - Milo Barozzi: immediately

01/07/22, 15:13 - Milo Barozzi: unfortunately same LUs from before are not available anymore. We'll try with a different one

01/07/22, 15:14 - Milo Barozzi: (I'm waiting for a reply from loading places, meanwhile I need to inform you that CPU Load is still over 90% so I'm not so optimistic)

01/07/22, 15:14 - Milo Barozzi: IMG-20220701-WA0012.jpg (file allegato)

01/07/22, 15:15 - Support Technician 23: it should decrease, please give it a few minutes

01/07/22, 15:15 - Milo Barozzi: @dair

01/07/22, 15:15 - Milo Barozzi: @Support Technician 21 @Support Technician 21 we still have the same issue unfortunately

01/07/22, 15:16 - Razvan Voicu: can you give me a pallet ID

01/07/22, 15:16 - Milo Barozzi: user gscalzi1

01/07/22, 15:16 - Milo Barozzi: sure, gimme 1 sec please

01/07/22, 15:20 - Milo Barozzi: 51345802

01/07/22, 15:20 - Milo Barozzi: just scanned now by gscalzi1 and kicked out to login page

01/07/22, 15:21 - Razvan Voicu: it's high db load

01/07/22, 15:22 - Milo Barozzi: something is jamming DB load

01/07/22, 15:22 - Milo Barozzi: it's full of things to do and there a topper not allowing orders to be processed

01/07/22, 15:22 - Milo Barozzi: what you can do to reduce the load? Rebooting?

01/07/22, 15:22 - Milo Barozzi: if you don't find the "topper" a reboot will fix it?

01/07/22, 15:24 - Milo Barozzi: IMG-20220701-WA0013.jpg (file allegato)

DB load is still high and not reducing unfortunately

01/07/22, 15:34 - Razvan Voicu: can wyou try agian?

01/07/22, 15:34 - Milo Barozzi: DB load decreased

01/07/22, 15:34 - Razvan Voicu: or give us another example not working?

01/07/22, 15:34 - Milo Barozzi: yes, we'll try again

01/07/22, 15:34 - Milo Barozzi: different LU only or different LU-user?

01/07/22, 15:34 - Razvan Voicu: different lu

01/07/22, 15:35 - Milo Barozzi: ok, we'll do it

01/07/22, 15:38 - Milo Barozzi: 59646719 working!!!
01/07/22, 15:38 - Milo Barozzi: 59646767 working!
01/07/22, 15:38 - Milo Barozzi: shall we try to start with "mass start"??
01/07/22, 15:39 - Razvan Voicu: yeah
01/07/22, 15:39 - Milo Barozzi: ok, gimme 2 mins to alert all people
01/07/22, 15:39 - Milo Barozzi: one user more is working imariani1 succedeed
01/07/22, 15:40 - Milo Barozzi: sbenedetti1 working
01/07/22, 15:42 - Milo Barozzi: user at truck load seems are working with no troubles, I'm waiting for a feedback from people doing "OG TPOs" and "storing from production"
01/07/22, 15:42 - Milo Barozzi: max 5-10 minutes I'll be back to you
01/07/22, 15:42 - Milo Barozzi: @Support Technician 21 what was the "damn" root cause? 🤔🤔🤔🤔🔧🔧🔧🔧
01/07/22, 15:44 - Milo Barozzi: IMG-20220701-WA0015.jpg (file allegato)
@Support Technician 21 @Support Technician 23 by the way, it seems DB workload is rising up again
01/07/22, 15:44 - Razvan Voicu: there was a zombie 🧟 session that wasnt killed from the previous instance. After killing it, everything started working properly 🙌
01/07/22, 15:46 - Milo Barozzi: related to that, I noticed that users at pick stations (mmop*) that were kicked out were still logged on pick stations. I had to "disconnect" them to let next shift users to log (lp* ones). Was it related to that?
01/07/22, 15:46 - Razvan Voicu: no 🚫
01/07/22, 15:47 - Milo Barozzi: ah ok. And... sorry for stupid question: why now workload is, on average, on a level much higher than usual.. it's close to 80%
01/07/22, 15:48 - Razvan Voicu: Probably because it has a lot to process now until it comes back to normal activity
01/07/22, 15:48 - Razvan Voicu: let's wait and see
01/07/22, 15:49 - Milo Barozzi: I kindly ask you to keep watching the system for at min 30-60mins please
01/07/22, 15:50 - Razvan Voicu: Yes we 🧑🏻 are on it right now 👁👁 .
01/07/22, 15:50 - Milo Barozzi: thanks so much
01/07/22, 15:50 - Razvan Voicu: Let us know if more problems arise. Hopefully not 🍀
01/07/22, 15:50 - Milo Barozzi: sorry for saying, but I'm not so confident.. it's over 90% again now
01/07/22, 15:50 - Milo Barozzi: 🙌
01/07/22, 16:40 - Milo Barozzi: @Support Technician 21 @Support Technician 23 issue at pick stations. Tpos to send back sources are created but stay in status new and it's not possible to send pallets back to monorail
01/07/22, 16:42 - Milo Barozzi: Cpu load is still over 90%
01/07/22, 16:48 - Milo Barozzi: @Support Technician 21 any news??
01/07/22, 16:48 - Support Technician 23: we check now
01/07/22, 16:50 - Support Technician 23: are the pallets moving now ?
01/07/22, 16:50 - Milo Barozzi: After some minutes tpos went to active. It seems a matter of time, i.e. cpu load. Sorry to push again on this button, but cpu workload is not fine
01/07/22, 16:50 - Milo Barozzi: And it's not a matter of backlog
01/07/22, 16:51 - Milo Barozzi: The one I was watching moved before you wrote me
01/07/22, 16:52 - Support Technician 23: please check now
01/07/22, 16:53 - Milo Barozzi: 95%... very very high
01/07/22, 17:02 - Support Technician 23: now there are spikes to 90+ but the average is below 90
01/07/22, 17:03 - Milo Barozzi: IMG-20220701-WA0017.jpg (file allegato)
I see, but before deploy average was 30%, now it's 80-90%.... surely something is now working properly:
01/07/22, 17:04 - Milo Barozzi: there's something blocking the river... you should remove the block from the "dam"
01/07/22, 17:05 - Support Technician 23: we can do an instance restart based on the reason for the previous blocking situation
01/07/22, 17:05 - Milo Barozzi: ok, but instance restart will kick out all of us, right?
01/07/22, 17:05 - Milo Barozzi: how much time it'll take?

01/07/22, 17:06 - Support Technician 23: yes, around 15 minutes
01/07/22, 17:06 - Milo Barozzi: we cannot do it now.. we need to recover the backlog from before...
01/07/22, 17:06 - Milo Barozzi: I can be more precise in 30-45 minutes on when to do it, ok?
01/07/22, 17:13 - Support Technician 23: I see the load is keeping to decrease, please let us know if there are any situation and we'll decide at that time if it's the case for a restart
01/07/22, 17:13 - Milo Barozzi: still having the same issue at picking stations.. sometimes it's really slower
01/07/22, 17:14 - Milo Barozzi: it takes time from confirming picking to being capable to send sources away
01/07/22, 17:15 - Milo Barozzi: I tried to organize and emergency meeting to decide when you can perform a restart
01/07/22, 17:27 - Milo Barozzi: @Support Technician 23 from my ok, how much time do you need for start the restart process?
01/07/22, 17:27 - Support Technician 23: depends when you give me the ok
01/07/22, 17:28 - Support Technician 23: if it's now, I can start right away
01/07/22, 17:28 - Milo Barozzi: I think we can do in 5 minutes from now
01/07/22, 17:28 - Support Technician 23: ok
01/07/22, 17:28 - Support Technician 23: I will prepare
01/07/22, 17:28 - Milo Barozzi: I need just the time to advise all involved parties
01/07/22, 17:28 - Support Technician 23: and wait for your ok
01/07/22, 17:28 - Milo Barozzi: okok good
01/07/22, 17:35 - Milo Barozzi: @Support Technician 23 tell me when ready please
01/07/22, 17:36 - Support Technician 23: I can proceed
01/07/22, 17:36 - Support Technician 23: if it's fine by you
01/07/22, 17:36 - Milo Barozzi: all users will be automatically disconnected right?
01/07/22, 17:36 - Support Technician 23: we need to set the parameters for ags as well
01/07/22, 17:36 - Support Technician 23: yes
01/07/22, 17:36 - Support Technician 23: it's the same process as for a deploy
01/07/22, 17:37 - Milo Barozzi: uuuuuuuuh, but we need to stop AGVs first so
01/07/22, 17:37 - Support Technician 23: yes
01/07/22, 17:37 - Support Technician 23: sorry for not being fully precise
01/07/22, 17:37 - Milo Barozzi: com.wamas.mfs.core.common.agvDisable set to true
01/07/22, 17:38 - Milo Barozzi: we need to wait, because we have more or less 10-12 missions for AGVs to be finished
01/07/22, 17:40 - Support Technician 23: ok, I'm waiting
01/07/22, 17:41 - Milo Barozzi: 7 missions left
01/07/22, 17:48 - Milo Barozzi: 1 left
01/07/22, 17:48 - Support Technician 23: I see
01/07/22, 17:48 - Milo Barozzi: IMG-20220701-WA0018.jpg (file allegato)
@Support Technician 23 @Support Technician 6 I noticed also memory of WAMASAPP usage is higher than usual
01/07/22, 17:48 - Milo Barozzi: Maybe it can help
01/07/22, 17:50 - Milo Barozzi: @Support Technician 23 GO GO GO GO
01/07/22, 17:50 - Support Technician 23: ok
01/07/22, 18:03 - Milo Barozzi: how is it going?
01/07/22, 18:03 - Support Technician 23: restarting in progress
01/07/22, 18:04 - Support Technician 23: mfs is loading
01/07/22, 18:06 - Support Technician 23: up an running
01/07/22, 18:08 - Milo Barozzi: Checking CPU load...
01/07/22, 18:08 - Milo Barozzi: IMG-20220701-WA0019.jpg (file allegato)
don't want to say to loud, but it seems a little bit better
01/07/22, 18:09 - Mihai Soceanu: lets see
01/07/22, 18:10 - Milo Barozzi: AGVs are now getting missions...
01/07/22, 18:10 - Milo Barozzi: CPU had a spike to 70% (probably due to AGV start)
01/07/22, 18:11 - Support Technician 23: I think that's pretty normal as we just restart
01/07/22, 18:12 - Milo Barozzi: I agree.. spike should be "adsorbed" by the

system in 5-10 mins IMHO
01/07/22, 18:17 - Milo Barozzi: IMG-20220701-WA0020.jpg (file allegato)
live update..
01/07/22, 19:06 - Milo Barozzi: IMG-20220701-WA0021.jpg (file allegato)
@Support Technician 21 @Support Technician 23 @Support Technician 6 what's your feeling on the system?
01/07/22, 19:17 - Milo Barozzi: Guys, I'm sorry to say... but WAMASDB CPU is still high... there's something is not fine yet. @Support Technician 6 @Support Technician 11 @Support Technician 21 @Support Technician 23. I think you should evaluate a weekend rollback to see if, after rollback, it still the same issue.
01/07/22, 19:52 - Milo Barozzi: @Support Technician 11 mail sent
01/07/22, 20:01 - Support Technician 23: is it ok to start the rollback now ?
01/07/22, 20:03 - Milo Barozzi: Sure
01/07/22, 20:03 - Milo Barozzi: Go go go
01/07/22, 20:03 - Alexandru Catarau: AGV param dont forget
01/07/22, 20:04 - Support Technician 23: yes, we'll do it step by step
01/07/22, 20:04 - Support Technician 23: parameters set
01/07/22, 20:05 - Support Technician 23: waiting for agv s now
01/07/22, 20:05 - Milo Barozzi: 👍 I cannot support so everything is in your hands
01/07/22, 20:49 - Support Technician 23: deploy done
01/07/22, 20:49 - Milo Barozzi: Up and running?
01/07/22, 20:49 - Support Technician 23: we check everything and we'll send and email
01/07/22, 20:49 - Support Technician 23: yes
01/07/22, 20:49 - Mihai Soceanu: IMG-20220701-WA0024.jpg (file allegato)
01/07/22, 20:49 - Mihai Soceanu: DB CPU
01/07/22, 20:49 - Mihai Soceanu: yes is up and running
01/07/22, 20:50 - Support Technician 23: AGVs are red on LH
01/07/22, 20:50 - Support Technician 23: on our side the AGVs are connected
01/07/22, 20:53 - Support Technician 23: IMG-20220701-WA0025.jpg (file allegato)
01/07/22, 20:56 - Support Technician 23: communication with AS400 looks good
01/07/22, 20:56 - Support Technician 23: except for the AGVs being in error, everything looks fine until now
01/07/22, 20:56 - Mihai Soceanu: CPU is still ok
01/07/22, 20:57 - Mihai Soceanu: IMG-20220701-WA0026.jpg (file allegato)
01/07/22, 20:57 - Mihai Soceanu: we really need someone pls to start AGVs
01/07/22, 20:57 - Mihai Soceanu: @Company Employee 16
01/07/22, 21:02 - Support Technician 23: please let me know if there is someone on site that I can contact
01/07/22, 21:02 - Support Technician 23: regarding the AGVs
01/07/22, 21:05 - Milo Barozzi: @Company Employee 1 puoi attivare qualche AGV
01/07/22, 21:05 - Milo Barozzi: Per provare se vanno
01/07/22, 21:06 - Milo Barozzi: If Manual part is fine send mail pls
01/07/22, 21:06 - Support Technician 23: can we please have someone test ?
01/07/22, 21:07 - Support Technician 23: from our perspective everything looks fine
01/07/22, 21:07 - Giuseppe Romano, Personale: Si provvedo subito
01/07/22, 21:08 - Milo Barozzi: Giuseppe is activating some AGVs
01/07/22, 21:08 - Milo Barozzi: Grazie
01/07/22, 21:09 - Milo Barozzi: We have to stop them because tomorrow we have civil works in the automated area
01/07/22, 21:09 - Milo Barozzi: So we can test just some of them
01/07/22, 21:09 - Mihai Soceanu: ok
01/07/22, 21:10 - Mihai Soceanu: just leave them run for some minutes pls
01/07/22, 21:10 - Mihai Soceanu: then we can put back the AGV disable
01/07/22, 21:10 - Mihai Soceanu: and they will go parking again
01/07/22, 21:10 - Milo Barozzi: Sure sure
01/07/22, 21:10 - Milo Barozzi: Coordinate it with @Company Employee 1 please
01/07/22, 21:11 - Mihai Soceanu: manual area is working ?
01/07/22, 21:11 - Mihai Soceanu: this night ?
01/07/22, 21:12 - Giuseppe Romano, Personale: Some agv have left, I wait for the ok to be able to put them back in prevent allocation
01/07/22, 21:12 - Mihai Soceanu: we will put back the AGV disabled

01/07/22, 21:12 - Mihai Soceanu: then we wait for all of them in parking
 01/07/22, 21:12 - Mihai Soceanu: then you can disable them
 01/07/22, 21:15 - Giuseppe Romano, Personale: Ok
 01/07/22, 21:21 - Milo Barozzi: Think Yes @Company Employee 21 can you confirm pls?
 01/07/22, 21:21 - Stefano Dall'Asta, Personale: I ask
 01/07/22, 21:21 - Milo Barozzi: Thx
 01/07/22, 21:27 - Milo Barozzi: Is cpu load still fine?
 01/07/22, 21:27 - Mihai Soceanu: IMG-20220701-WA0027.jpg (file allegato)
 01/07/22, 21:27 - Mihai Soceanu: yes
 01/07/22, 21:27 - Mihai Soceanu: look ok so far
 01/07/22, 21:28 - Mihai Soceanu: but we are not sure if anything is happning in the system
 01/07/22, 21:28 - Mihai Soceanu: is someone is working or not
 01/07/22, 21:32 - Mihai Soceanu: all AGV missions are finished
 01/07/22, 21:32 - Mihai Soceanu: after all of them have prevent allocation bit on
 01/07/22, 21:32 - Mihai Soceanu: i will put agvDisable to false
 01/07/22, 21:33 - Mihai Soceanu: pls inform me when all of AGV have prevention active
 01/07/22, 21:35 - Giuseppe Romano, Personale: Prevention active
 01/07/22, 21:35 - Mihai Soceanu: ok
 01/07/22, 21:35 - Mihai Soceanu: thx
 01/07/22, 21:36 - Mihai Soceanu: flag reset
 01/07/22, 21:36 - Giuseppe Romano, Personale: Of nothing, thanks to you
 01/07/22, 21:37 - Mihai Soceanu: missions where send to hive all is ok and back on track
 01/07/22, 21:37 - Stefano Dall'Asta, Personale: Everything is fine
 01/07/22, 21:37 - Mihai Soceanu: whenever you have piece of info related to manual area pls let us know
 01/07/22, 21:37 - Mihai Soceanu: thx and srry for inconvenience from today...
 01/07/22, 21:38 - Milo Barozzi: Yes please
 01/07/22, 21:38 - Mihai Soceanu: all done from my side
 01/07/22, 21:39 - Milo Barozzi: Thanks to everybody
 01/07/22, 21:40 - Stefano Dall'Asta, Personale: Manual ok
 01/07/22, 21:40 - Mihai Soceanu: super
 01/07/22, 21:40 - Mihai Soceanu: IMG-20220701-WA0028.jpg (file allegato)
 01/07/22, 21:40 - Mihai Soceanu: DB seem ok
 01/07/22, 21:40 - Alexandru Catarau: looks good
 01/07/22, 21:40 - Mihai Soceanu: yes
 04/07/22, 09:20 - Chiara Lodesani, Lavoro: Questo messaggio è stato eliminato.
 04/07/22, 09:26 - Chiara Lodesani, Lavoro: Hi All, i don't know if the patch for which you have done the rollback is that about the problem to infeed lines (H59), but I think that we have the problem H59 now on SLF01C0071. Can you check please?
 04/07/22, 09:47 - Razvan Voicu: Hi Chiara
 04/07/22, 09:47 - Razvan Voicu: What is wrong?
 04/07/22, 09:52 - Chiara Lodesani, Lavoro: There is a LU on SLF01C0071 with TO is in state active that doesn't move. There is also a TEMP* on the infeed line. I think we need to do suspend-resume to move it..
 04/07/22, 09:52 - Chiara Lodesani, Lavoro: IMG-20220704-WA0000.jpg (file allegato)
 04/07/22, 09:58 - Razvan Voicu: I check
 04/07/22, 09:58 - Chiara Lodesani, Lavoro: thanks
 04/07/22, 10:02 - Razvan Voicu: IMG-20220704-WA0001.jpg (file allegato)
 04/07/22, 10:03 - Razvan Voicu: It has errors
 04/07/22, 10:04 - Chiara Lodesani, Lavoro: ah ok, sorry I didn't check it
 04/07/22, 10:07 - Chiara Lodesani, Lavoro: It doesn't move.. I tried with suspend-resume and refresh-reset..
 04/07/22, 10:08 - Razvan Voicu: it is waiting for plc announce
 04/07/22, 10:08 - Chiara Lodesani, Lavoro: I see..
 04/07/22, 10:08 - Razvan Voicu: it wasn't announced by the forklift driver
 04/07/22, 10:09 - Razvan Voicu: also when you can, please send a ticket for this
 04/07/22, 10:13 - Chiara Lodesani, Lavoro: Ok

04/07/22, 10:14 - Chiara Lodesani, Lavoro: Have you done something? It has moved..

04/07/22, 10:22 - Razvan Voicu: Canceled TU request so WAMAS can recreate it, because the manual interventions messed it a bit

04/07/22, 11:20 - Chiara Lodesani, Lavoro: So can we close It without ticket?

04/07/22, 11:26 - Razvan Voicu: no

04/07/22, 11:26 - Razvan Voicu: please create a ticket so I can time-track my effort

04/07/22, 11:36 - Chiara Lodesani, Lavoro: ok

19/07/22, 15:45 - Milo Barozzi: @Support Technician 12 @Support Technician 11 @Support Technician 21 @Support Technician 23 I don't know if it can be a show stopper or not, but later this morning I sent a ticket request for low available RAM (<4%) in WAMAS machine. It's still like that. Please, check it soon if it can drive us to a stop. Thank you.

20/07/22, 20:59 - Milo Barozzi: @Support Technician 12 @Support Technician 11 @Support Technician 21 @Support Technician 23 wamasdb cpu over 96%!!!!

21/07/22, 10:15 - Milo Barozzi: @Support Technician 12 @Support Technician 11 @Support Technician 21 @Support Technician 23 Lighthouse is not working. We're blind on the plant status. Shall you kindly check?

21/07/22, 10:16 - Razvan Voicu: I will check, meanwhile create a ticket for it please

21/07/22, 10:16 - Razvan Voicu: or when you can :D

21/07/22, 10:16 - Milo Barozzi: consider it done

21/07/22, 10:16 - Alexandru Catarau: check now

21/07/22, 10:17 - Milo Barozzi: working, confirmed

21/07/22, 10:17 - Milo Barozzi: still need the ticket? what was the issue?

21/07/22, 10:18 - Alexandru Catarau: no

22/07/22, 15:42 - Milo Barozzi: IMG-20220722-WA0002.jpg (file allegato)

@Support Technician 12 WAMASDB CPU LOAD

22/07/22, 15:43 - Milo Barozzi: it's over 95% since 15:30 (13 minutes)

22/07/22, 15:44 - Milo Barozzi: @Support Technician 11 @Support Technician 12 @Support Technician 21 @Support Technician 23 👉

22/07/22, 16:12 - Razvan Voicu: hi milo

22/07/22, 16:12 - Milo Barozzi: Hi!

22/07/22, 16:12 - Razvan Voicu: if you wish we can restart all in one

22/07/22, 16:13 - Milo Barozzi: 🤔

22/07/22, 16:13 - Milo Barozzi: restart means people stop working. It's the last savage anchor....

22/07/22, 16:13 - Milo Barozzi: IMG-20220722-WA0003.jpg (file allegato)

now CPU level is like this:

22/07/22, 16:13 - Razvan Voicu: well it's the same for the last weeks. it goes up and down

22/07/22, 16:14 - Milo Barozzi: uhm.... actually not at those levels. We reached 99% with working limitations this time

22/07/22, 16:17 - Razvan Voicu: Not much we can do on the spot

22/07/22, 16:17 - Razvan Voicu: if it's unsuable -> restart allinone

22/07/22, 16:18 - Milo Barozzi: I'm talking on the phone with Alexandru, just a second pls

22/07/22, 16:21 - Milo Barozzi: me and Alexandru agree to: DON'T restart the system, keep an eye on the system from now for the next 2 hours. If system performances are affected by this --> We'll contact you again and decide if restart worths or not. on the other hand... we'll wish each other a very nice weekend and next week from Monday SSI will put more resources to understand what happened and to analyze the system

22/07/22, 16:21 - Milo Barozzi: @Support Technician 21 ok?

22/07/22, 16:22 - Razvan Voicu: ok 👍

22/07/22, 16:22 - Milo Barozzi: surely something strange happened, because it went over 90% and kept over 90% (reaching also 99%) for 40-45 minutes. This is not the usual up and down of CPU usage

22/07/22, 16:23 - Milo Barozzi: but... now is 60% so... 🤖

22/07/22, 16:30 - Razvan Voicu: Great

22/07/22, 16:30 - Razvan Voicu: Have a nice day

22/07/22, 16:45 - Milo Barozzi: @Support Technician 21 some more pieces of news: colleagues reported that in the manual and automated area everything is fine,

but planner who're releasing for picking orders and/or post picking orders are reporting that WAMAS is thinking on the process they launched from minutes and minutes. There's something you can do for checking if the releasing/post picking process is stuck somewhere?

22/07/22, 17:15 - Milo Barozzi: @Support Technician 21 WAMAS on desktops is not working
22/07/22, 17:15 - Milo Barozzi: please, reboot ASAP
22/07/22, 17:19 - Razvan Voicu: ok
22/07/22, 17:20 - Milo Barozzi: please, tell me when you're doing and when done
22/07/22, 17:20 - Razvan Voicu: wamas not working for picking relesears?
22/07/22, 17:21 - Milo Barozzi: at the beginning yes, then all desktop users not able to work, than manual part and automated part blocked
22/07/22, 17:21 - Milo Barozzi: now everything's blocked
22/07/22, 17:27 - Milo Barozzi: @Support Technician 21 what's current status?
22/07/22, 17:29 - Razvan Voicu: i am checking
22/07/22, 17:29 - Milo Barozzi: ok
22/07/22, 17:40 - Milo Barozzi: @Support Technician 21 did you find something worse? It's taking more than supposed...
22/07/22, 17:41 - Milo Barozzi: and I see CPU going up & down like a rollercoaster..
22/07/22, 17:41 - Milo Barozzi: IMG-20220722-WA0004.jpg (file allegato)
22/07/22, 17:57 - Milo Barozzi: @Support Technician 21 @Support Technician 11 any news? we're stopped since 40mins 😞
22/07/22, 18:14 - Milo Barozzi: @Support Technician 21 @Support Technician 11 do you have some news?
22/07/22, 18:15 - Razvan Voicu: we try to restart stuff
22/07/22, 18:15 - Milo Barozzi: hope you'll succeed 🙏🙏🙏
22/07/22, 18:42 - Milo Barozzi: @Support Technician 12 @Support Technician 21 @Support Technician 6 WAMASDB VM machine rebooted and now back on track
22/07/22, 18:42 - Razvan Voicu: can we login on .36 ?
22/07/22, 18:42 - Milo Barozzi: yes yes, sure
22/07/22, 18:52 - Milo Barozzi: @Support Technician 21 @Support Technician 11 can we enter WAMAS now?
22/07/22, 18:53 - Razvan Voicu: yes,
22/07/22, 18:54 - Milo Barozzi: ok, thank you. We cannot access Lighthouse. It says "login failed"
22/07/22, 18:59 - Razvan Voicu: try now
22/07/22, 18:59 - Razvan Voicu: Everything should be fine
22/07/22, 19:00 - Milo Barozzi: working!
22/07/22, 19:00 - Alexandru Catarau: 🙌
22/07/22, 19:01 - Milo Barozzi: dekstop users working, automated area working, lighthouse working. I'm still waiting from a feedback from manual area from rf terminals
22/07/22, 19:01 - Milo Barozzi: @Support Technician 11 I'll call you in 5 mins
22/07/22, 19:01 - Alexandru Catarau: ok
22/07/22, 19:01 - Razvan Voicu: Ok great. I'm out then, if there are more problems, please @ me
22/07/22, 19:02 - Milo Barozzi: wait wait
22/07/22, 19:02 - Razvan Voicu: what's wrong
22/07/22, 19:03 - Milo Barozzi: I think there are mismatching between real and logic in automated area
22/07/22, 19:03 - Milo Barozzi: @Company Employee 18 informed me that there are monorail trolleys trying to retrieve pallet were there are no pallets
22/07/22, 19:03 - Milo Barozzi: and AGV trying to deposit something there's not
22/07/22, 19:04 - Mihai Soceanu: do you have locations/barcodes ?
22/07/22, 19:04 - Mihai Soceanu: AGVs ?
22/07/22, 19:04 - Milo Barozzi: trolley #8 (monorail)
22/07/22, 19:05 - Milo Barozzi: BPF01C0591, 60991388 is not there physically
22/07/22, 19:05 - Mihai Soceanu: 60991388
22/07/22, 19:05 - Mihai Soceanu: is it instation already ?
22/07/22, 19:06 - Milo Barozzi: no, we have no idea where is it
22/07/22, 19:06 - Milo Barozzi: on BP01 S04 we have 59924998 while for WAMAS/Lighthouse on PPF01C0611 (CU before BP01 S03)
22/07/22, 19:06 - Razvan Voicu: We believe 60991388 should be on bp01 s01

22/07/22, 19:07 - Milo Barozzi: 60160384 is on CU#63
 22/07/22, 19:08 - Milo Barozzi: I think we have plenty of pallets all mismatching physical and logical positions
 22/07/22, 19:08 - Mihai Soceanu: nono
 22/07/22, 19:09 - Milo Barozzi: 60991388 is on CU#61
 22/07/22, 19:09 - Mihai Soceanu: 60160384 is on PPF01C0631
 22/07/22, 19:09 - Milo Barozzi: physically
 22/07/22, 19:09 - Milo Barozzi: physically yes
 22/07/22, 19:09 - Mihai Soceanu: also logically that one is ok
 22/07/22, 19:09 - Mihai Soceanu: 60991388 is not ok
 22/07/22, 19:09 - Milo Barozzi: no it's not
 22/07/22, 19:10 - Milo Barozzi: 60991388 is physically on PPF01C0611
 22/07/22, 19:10 - Mihai Soceanu: and logically we have 59924998
 22/07/22, 19:11 - Mihai Soceanu: and 60991388 is on buffer
 22/07/22, 19:11 - Mihai Soceanu: 59924998 do you see it somewhere
 22/07/22, 19:11 - Mihai Soceanu: ?
 22/07/22, 19:11 - Milo Barozzi: which phisycally is on BP01 S04
 22/07/22, 19:11 - Mihai Soceanu: ah
 22/07/22, 19:11 - Mihai Soceanu: so 59924998 is on PPF01C0630 and 60991388 is on PPF01C0631
 22/07/22, 19:12 - Milo Barozzi: nonono
 22/07/22, 19:12 - Milo Barozzi: 60991388 is physically on PPF01C0611
 22/07/22, 19:12 - Milo Barozzi: 60160384 is on PPF01C0631
 22/07/22, 19:12 - Mihai Soceanu: ok
 22/07/22, 19:12 - Mihai Soceanu: okok
 22/07/22, 19:12 - Mihai Soceanu: 59924998 = PPF01C0630
 22/07/22, 19:12 - Milo Barozzi: BPF01C0591 (buffer) is empty
 22/07/22, 19:12 - Mihai Soceanu: 60991388 = PPF01C0611
 22/07/22, 19:13 - Mihai Soceanu: Questo messaggio è stato eliminato.
 22/07/22, 19:13 - Milo Barozzi: BP01 S04 = PPF01C0602
 22/07/22, 19:13 - Mihai Soceanu: 60160384 = PPF01C0631
 22/07/22, 19:13 - Milo Barozzi: correct
 22/07/22, 19:13 - Mihai Soceanu: we rebook
 22/07/22, 19:13 - Milo Barozzi: correct
 22/07/22, 19:16 - Milo Barozzi: after this I think we have a similar issue at Wuzzi exit
 22/07/22, 19:19 - Milo Barozzi: probably Chiara fixed on her own at Wuzzi
 22/07/22, 19:21 - Mihai Soceanu: super
 22/07/22, 19:22 - Milo Barozzi: wait a minute pls, we're checking all pick stations
 22/07/22, 19:22 - Mihai Soceanu: ok
 22/07/22, 19:22 - Milo Barozzi: thx
 22/07/22, 19:23 - Milo Barozzi: Wuzzi seems fine
 22/07/22, 19:23 - Milo Barozzi: I'm checking pick station #4
 22/07/22, 19:27 - Milo Barozzi: still checking sorry
 22/07/22, 19:27 - Milo Barozzi: it requires a little time
 22/07/22, 19:27 - Razvan Voicu: It's no problem
 22/07/22, 19:29 - Milo Barozzi: ghost pallet on SLF*2851 now
 22/07/22, 19:30 - Milo Barozzi: and also on SLF*071
 22/07/22, 19:30 - Razvan Voicu: i check
 22/07/22, 19:30 - Milo Barozzi: on SLF*2851 it's fine now
 22/07/22, 19:32 - Razvan Voicu: 071 also
 22/07/22, 19:32 - Milo Barozzi: fixed
 22/07/22, 19:33 - Milo Barozzi: not yet, sorry... a second pls
 22/07/22, 19:36 - Milo Barozzi: @Support Technician 21 can you help us with SLF*071?
 22/07/22, 19:36 - Milo Barozzi: IMG-20220722-WA0005.jpg (file allegato) situation is like this
 22/07/22, 19:36 - Milo Barozzi: pallet 65830909 is physically on SLF*071
 22/07/22, 19:37 - Milo Barozzi: Status = broken (65830909)
 22/07/22, 19:38 - Razvan Voicu: i will bring it
 22/07/22, 19:38 - Razvan Voicu: back to life
 22/07/22, 19:38 - Milo Barozzi: please....
 22/07/22, 19:40 - Milo Barozzi: Questo messaggio è stato eliminato.

22/07/22, 19:41 - Razvan Voicu: 👍
22/07/22, 19:41 - Milo Barozzi: STARTED!
22/07/22, 19:41 - Milo Barozzi: 🤖
22/07/22, 19:42 - Razvan Voicu: any other TUs?
22/07/22, 19:42 - Milo Barozzi: no, plant is working
22/07/22, 19:42 - Milo Barozzi: 100%
22/07/22, 19:42 - Razvan Voicu: great
22/07/22, 19:42 - Milo Barozzi: thanks everybody
22/07/22, 19:42 - Razvan Voicu: Thanks aswell
22/07/22, 19:43 - Razvan Voicu: Have a nice weekend
22/07/22, 19:43 - Milo Barozzi: you too!
22/07/22, 19:43 - Razvan Voicu: I will keep an eye a couple of minutes then I'm out
22/07/22, 19:44 - Milo Barozzi: Thank you
22/07/22, 19:44 - Milo Barozzi: Good idea
25/07/22, 08:42 - Milo Barozzi: @Support Technician 11 @Support Technician 6
@Support Technician 21 Dear All, I'm reading alert.log from oracle DB on WAMASDB machine and I found this one...

Fatal NI connect error 12170.

25/07/22, 08:43 - Mihai Soceanu: From friday i would say so
25/07/22, 08:43 - Mihai Soceanu: Or it started again ?
25/07/22, 08:44 - Milo Barozzi: no, it seems not. Now seems looking fine
25/07/22, 08:44 - Mihai Soceanu: We have seen the same on friday this is why we
suggested a restart
25/07/22, 08:44 - Alexandru Catarau: no , this is friday only
25/07/22, 08:44 - Milo Barozzi: Do you need this file?
C:\ORACLE\diag\rdbms\atlas\atlas\trace\atlas_ora_10608.trc
25/07/22, 08:44 - Mihai Soceanu: Of the entire VM
25/07/22, 08:44 - Alexandru Catarau: today looks ok
25/07/22, 08:44 - Milo Barozzi: for analysis?
25/07/22, 08:44 - Alexandru Catarau: yes pls
25/07/22, 08:44 - Milo Barozzi: gimme 2 mins...
25/07/22, 08:45 - Milo Barozzi: I'll send to you, Mihai, Adrian and Razvan by
mail in a while. ok?
25/07/22, 08:45 - Mihai Soceanu: Ok thx
25/07/22, 08:45 - Alexandru Catarau: i'll have to check some oracle params as it
seems related to that
25/07/22, 08:47 - Milo Barozzi: so, for now, no check / intervention from our IT
is needed, right?
25/07/22, 08:51 - Alexandru Catarau: might need, first have to check oracle
setup
25/07/22, 08:52 - Alexandru Catarau: i'll contact you later today
25/07/22, 08:52 - Milo Barozzi: ok... on oracle folder there's also
atlas_ora_10608_i922667.trc file, which is incident detail, but it's 7GB. Do you
need it or I can skip it for the moment?
25/07/22, 08:54 - Alexandru Catarau: i can connect remotelly and see it from
there :)
25/07/22, 08:54 - Alexandru Catarau: no need to send
25/07/22, 08:55 - Milo Barozzi: 👍👍
25/07/22, 08:56 - Milo Barozzi: @Support Technician 11 perfect. I'll wait for
your further pieces of news after lunch break, therefore. Thanks so far.
08/08/22, 15:14 - Milo Barozzi: @Support Technician 11 @Support Technician 12
@Support Technician 21 @Support Technician 23 Hello everybody, @Company Employee
11 in sending an e-mail, but from today at 11:06:48 CC015 is not recording any
movement. We kindly ask you to investigate/fix with urgency, please. Thanks in
advance for your reply.
08/08/22, 15:18 - Benedetta Zini: IMG-20220808-WA0005.jpg (file allegato)
08/08/22, 15:34 - Stefano Dall'Asta, Personale ha abbandonato.
08/08/22, 15:51 - Milo Barozzi: 🤖🤖@Support Technician 11 @Support Technician
12 @Support Technician 21 @Support Technician 23 is somebody online?
08/08/22, 15:56 - Milo Barozzi: IMG-20220808-WA0006.jpg (file allegato)

please, note CPU Load of WAMASAPP machine did a step up .. maybe it's due to that

08/08/22, 16:46 - Milo Barozzi: HELP HELP HELP! Some functions are not working and now both in OG025 and OG525 and OG039 records are not archived... this is slowing the system. I think we're getting closer and closer to a total block

08/08/22, 16:58 - Adrian Cindea: There is a problem with our vpn in austria

08/08/22, 16:59 - Adrian Cindea: No connection to site

08/08/22, 17:02 - Milo Barozzi: it seems strange, on our side everything's fine. Already checked with our IT

08/08/22, 17:03 - Milo Barozzi: Your problem could be possible to be about failover procedure agreed with our IT

08/08/22, 17:04 - Milo Barozzi: I mean: we have two main links with two different provider (one is Vodafone, another one I don't remember). Main provider is Vodafone and if it fails, you need to arrange something on your side to access. Now main connection is fine, but last week it had problems.

08/08/22, 17:04 - Milo Barozzi: Maybe you switched to secondary connection and never switched back again?

08/08/22, 17:05 - Milo Barozzi: IMG-20220808-WA0009.jpg (file allegato)
all MAVSPIAxx machines are running and linked on our side

08/08/22, 17:08 - Support Technician 23: The problem it's on our side and it's with all customers for which we use the VPN through Austria

08/08/22, 17:08 - Milo Barozzi: OMG

08/08/22, 17:09 - Milo Barozzi: we can do either way: Videoconference and I'll be your hands

08/08/22, 17:09 - Milo Barozzi: you: eyes and brain, me: hands

08/08/22, 17:09 - Milo Barozzi: ok?

08/08/22, 17:14 - Adrian Cindea: I don't know what solution to use

08/08/22, 17:14 - Adrian Cindea: Talk to SSI Italy

08/08/22, 17:15 - Milo Barozzi: me or you?

08/08/22, 17:16 - Adrian Cindea: We informed ssi italy about issue

08/08/22, 17:16 - Milo Barozzi: I know, and they phoned me and I told them what I told also to you

08/08/22, 17:17 - Milo Barozzi: But until now, it's just speaking about the problema and not solving 😊

08/08/22, 17:17 - Milo Barozzi: my suggestion is: I'll create a zoom videoconference with somebody from you and you'll tell what to do in manner you can check what needed to solve the issue

08/08/22, 17:18 - Milo Barozzi: I did it similarly one time with Rocla when they had no chance to connect to our side due to their bad connection

08/08/22, 17:18 - Milo Barozzi: let me know to whom I need to send Zoom invitation pls

08/08/22, 17:26 - Adrian Cindea: Zoo

08/08/22, 17:26 - Adrian Cindea: M

08/08/22, 17:26 - Adrian Cindea: We need a way to reach database

08/08/22, 17:27 - Adrian Cindea: Server to add 1 datafile

08/08/22, 17:29 - Milo Barozzi: sending you zoom invitation in a while

08/08/22, 17:29 - Adrian Cindea: Email is down

08/08/22, 17:29 - Milo Barozzi: I'll write it here no problem

08/08/22, 17:29 - Adrian Cindea: K

08/08/22, 17:30 - Milo Barozzi: <https://atlasconcorde.zoom.us/j/84847334221>

08/08/22, 18:17 - Milo Barozzi: Issue solved. Thanks to @Support Technician 12 for helping. Have a nice evening everybody!

29/08/22, 11:19 - Razvan Voicu: Hi @Company Employee 16 .

Regarding today's deploy at 12:40 Italy time, we follow the same procedure? We wait your signal when you switch agvDisable flag, you tell us when missions are over and we start deploy?

29/08/22, 11:36 - Milo Barozzi: Hi! yes, at 12:30 I'll put flag true and tell you when possible to start with deploy

29/08/22, 11:37 - Milo Barozzi: I'll write on this channel at that time 😊

29/08/22, 11:37 - Milo Barozzi: let's touch base later 😊

29/08/22, 11:40 - Razvan Voicu: Ok

29/08/22, 12:28 - Milo Barozzi: Dear All, I'll set

com.wamas.mfs.core.common.agvDisable = true in a couple of minutes from now

29/08/22, 12:30 - Milo Barozzi: com.wamas.mfs.core.common.agvDisable = *true*

29/08/22, 12:30 - Milo Barozzi: let's wait for AGVs finishing their missions
29/08/22, 12:31 - Razvan Voicu: Ok
29/08/22, 12:36 - Milo Barozzi: 9 missions left
29/08/22, 12:36 - Milo Barozzi: 7
29/08/22, 12:37 - Milo Barozzi: 4....
29/08/22, 12:37 - Razvan Voicu: <Media omessi>
29/08/22, 12:38 - Milo Barozzi: not yet please 🙄
29/08/22, 12:40 - Milo Barozzi: 1....
29/08/22, 12:41 - Milo Barozzi: GO GO GO
29/08/22, 12:41 - Milo Barozzi: please proceed with deploy
29/08/22, 12:42 - Razvan Voicu: starting
29/08/22, 13:05 - Milo Barozzi: @Support Technician 21 on the way to restart?
29/08/22, 13:05 - Razvan Voicu: yes, small bump
29/08/22, 13:05 - Milo Barozzi: no problem, we're in time
29/08/22, 13:42 - Alexandru Catarau: pls inform users to start work
29/08/22, 13:42 - Milo Barozzi: we did it
29/08/22, 13:42 - Alexandru Catarau: mfs and wms is up and running
29/08/22, 13:42 - Milo Barozzi: AGV parameter set to false and AGV started moving
29/08/22, 13:43 - Razvan Voicu: Are you planning on using the new GCs today?
29/08/22, 13:44 - Milo Barozzi: depends how the system is going in the next 30 mins. I mean, if everything's fine, I'll make at least a try for sure
29/08/22, 13:44 - Milo Barozzi: right now I have no items configured with new Goods categories. I want being sure everything's working with no troubles, then looking at new features 😊
29/08/22, 13:45 - Razvan Voicu: Ok, if you have any problems let me know
29/08/22, 13:45 - Milo Barozzi: yes, sure. Thank you so far.
29/08/22, 13:50 - Milo Barozzi: @Support Technician 21 CPU parameters seem fine
29/08/22, 13:54 - Milo Barozzi: IMG-20220829-WA0002.jpg (file allegato)
@Support Technician 21 WAMASAPP memory has a pretty high consumption. It's around 50% while usually is around 14%
29/08/22, 13:54 - Milo Barozzi: did you change something which can affect this?
29/08/22, 13:54 - Razvan Voicu: no
29/08/22, 13:55 - Razvan Voicu: probably just more power needed for starting the app
29/08/22, 13:55 - Razvan Voicu: every cog firing up
29/08/22, 13:55 - Milo Barozzi: could be related to restart? it's a long wave from restart?
29/08/22, 13:55 - Razvan Voicu: let's wait a bit and see if it calms down
29/08/22, 13:55 - Razvan Voicu: should go down in 15-20 mins
29/08/22, 13:56 - Milo Barozzi: yes, let's keep both a close eye on it, please.
29/08/22, 14:18 - Milo Barozzi: @Support Technician 21 after approx 20 mins, it's 37%, far from usual 14% but less than 50% we had before. What to do?
29/08/22, 14:28 - Razvan Voicu: Not much
29/08/22, 14:29 - Razvan Voicu: Lets wait a bit more 😊
29/08/22, 14:29 - Milo Barozzi: Ok... do you think a patch you put could affect this? The one on the core for instance?
29/08/22, 14:29 - Milo Barozzi: The new cr?
29/08/22, 14:30 - Alexandru Catarau: core changes were removed
29/08/22, 14:30 - Alexandru Catarau: we did a repack
29/08/22, 14:33 - Milo Barozzi: so the new CR or... ?
16/09/22, 12:19 - Milo Barozzi: IMG-20220916-WA0004.jpg (file allegato)
@Support Technician 12 @Support Technician 11 @Support Technician 21 @Support Technician 23 we're having 100% CPU LOAD on WAMASDB machine. WAMAS is becoming not-usable to users. I think we're close to a total block. Shall you kindly put an eye on it?
16/09/22, 12:19 - Razvan Voicu: I check
16/09/22, 12:20 - Milo Barozzi: thank you
16/09/22, 12:34 - Milo Barozzi: @Support Technician 21 do you have some nice piece of news for us? 🙏
16/09/22, 12:36 - Razvan Voicu: we are checking seession taking space
16/09/22, 12:36 - Milo Barozzi: 👍
16/09/22, 12:47 - Milo Barozzi: a hint from our side: if we create a TPO specifying the location, it's immediate. If we ask WAMAS to decide based on FOG

or strategic area, it takes centuries. Should it be something related to location search and/or a certain/crucial location blocked/stucked?

16/09/22, 12:48 - Razvan Voicu: it's just slow loading queries on DB because it's 100%

16/09/22, 12:48 - Razvan Voicu: It would be good to restart the instance+db

16/09/22, 12:48 - Razvan Voicu: we stop the instance, stop and start oracle

16/09/22, 12:48 - Milo Barozzi: Means people kicked out and automated area stopped?

16/09/22, 12:49 - Milo Barozzi: I mean now it's the best moment to do it: shift change at automated area and few trucks, lunch break in some offices. *Please, proceed ASAP*

16/09/22, 12:55 - Razvan Voicu: ok, starting the restart procedure now

16/09/22, 12:56 - Razvan Voicu: Questo messaggio è stato eliminato.

16/09/22, 12:56 - Razvan Voicu: I am switching agvparameter

16/09/22, 12:56 - Milo Barozzi: 👍

16/09/22, 12:57 - Stefano Dall'Asta, Lavoro: Ok

16/09/22, 12:58 - Razvan Voicu: let me know when agv stop

16/09/22, 13:00 - Milo Barozzi ha aggiunto Tommaso Guizzardi, Personale.

16/09/22, 13:00 - Milo Barozzi: @Company Employee 20 will tell you

16/09/22, 13:05 - Tommaso Guizzardi, Personale: agv are all stopped

16/09/22, 13:05 - Razvan Voicu: ok

16/09/22, 13:15 - Milo Barozzi: @Support Technician 21 some troubles in restarting?

16/09/22, 13:16 - Razvan Voicu: No, takes a bit to shutdown oracle

16/09/22, 13:16 - Milo Barozzi: 👍👍👍👍

16/09/22, 13:16 - Razvan Voicu: Just waiting to load

16/09/22, 13:23 - Milo Barozzi: Still loading?

16/09/22, 13:23 - Razvan Voicu: yes

16/09/22, 13:24 - Milo Barozzi: 😞

16/09/22, 13:24 - Milo Barozzi: Questo messaggio è stato eliminato.

16/09/22, 13:24 - Milo Barozzi: Ok

16/09/22, 13:28 - Milo Barozzi: Engines on?

16/09/22, 13:29 - Razvan Voicu: starting

16/09/22, 13:29 - Razvan Voicu: heating up :)

16/09/22, 13:35 - Stefano Dall'Asta, Lavoro: Can we log in?

16/09/22, 13:35 - Razvan Voicu: yes you can, but MFS is still loading so we need to wait for it

16/09/22, 13:35 - Razvan Voicu: only manual is usable now

16/09/22, 13:36 - Milo Barozzi: Biggest problem is that cpu is still close to 100%

16/09/22, 13:44 - Razvan Voicu: just curious, do you have any connection to the DB from a web browser?

16/09/22, 13:50 - Milo Barozzi: No...only monitoring

16/09/22, 13:51 - Milo Barozzi: Sorry to say guys, but restart didn't produce any benefit.

In 25 mins from now.... I'll have president's son visiting hbw....any idea to get back on track, restore the system and save us pls?

16/09/22, 13:56 - Milo Barozzi: Please, escalate to anyone you want, Bill Gates or Clark Kent, but make in manner everything will be back on track within 20 mins 🙏😞

16/09/22, 14:23 - Milo Barozzi: @Support Technician 21 @Support Technician 12 @Support Technician 11 both manual and automated part working now ✅ DB CPU Load still over usual values (around 75% now), but system seems stable. Probably a little bit of backlog? 🙏

16/09/22, 14:23 - Alexandru Catarau: it should come down

16/09/22, 14:23 - Milo Barozzi: I'll keep an eye on it. Btw visit by President's son has been saved. 😞

16/09/22, 14:24 - Alexandru Catarau: but we will monitor for a little longer

16/09/22, 14:24 - Alexandru Catarau: :)

16/09/22, 14:24 - Alexandru Catarau: thanks Razvan for being prompt :)

16/09/22, 14:24 - Milo Barozzi: yes, please. now it's bumping between 80% and 90%

16/09/22, 14:25 - Milo Barozzi: Thanks everybody for prompt help so far 🙏

16/09/22, 14:25 - Razvan Voicu: thanks aswell

16/09/22, 14:25 - Milo Barozzi: you're welcome
16/09/22, 15:43 - Stefano Dall'Asta, Lavoro: Hi everyone, we still have a lot of OBD in status realese in progress.. can you check It?
16/09/22, 15:57 - Stefano Dall'Asta, Lavoro: here some example;
16/09/22, 15:58 - Stefano Dall'Asta, Lavoro: OBD0000475696
OBD0000471642
OBD0000475589
16/09/22, 15:58 - Stefano Dall'Asta, Lavoro: OBD0000475589
OBD0000475892
16/09/22, 16:01 - Razvan Voicu: Hi stefano, I will check in a couple of minutes
16/09/22, 16:19 - Razvan Voicu: Can you also create a ticket for this please?
16/09/22, 16:23 - Milo Barozzi: I'll do it in max 1 hour, ok?
16/09/22, 16:23 - Razvan Voicu: sure
16/09/22, 16:23 - Milo Barozzi: 👍
16/09/22, 16:40 - Stefano Dall'Asta, Lavoro: Any news?
16/09/22, 16:43 - Razvan Voicu: might be related to the humongous amount of data we have in og002/og025
16/09/22, 16:43 - Razvan Voicu: due to the high retention time
16/09/22, 16:44 - Stefano Dall'Asta, Lavoro: Ok, what can we do?
16/09/22, 16:45 - Razvan Voicu: If I say lower retention time, Milo might not like it 😊
16/09/22, 16:48 - Razvan Voicu: From what I see, there are a lot of OBDs/PPLUS to be released
16/09/22, 16:49 - Razvan Voicu: and some of them fail to release, could be due to slow db load
16/09/22, 16:53 - Razvan Voicu: can I call you stefano?
16/09/22, 16:55 - Milo Barozzi: no, please. Don't touch DB history data. We MUST keep data of whole 2022 otherwise Management will kill first me, then SSI 😞
16/09/22, 16:57 - Razvan Voicu: For OBD OBD0000475589 I checked some PPLUS, we have reservations for LUs 61022463;61022515 that are in S10
16/09/22, 16:57 - Razvan Voicu: In OG039 we have 43 POs active
16/09/22, 16:58 - Razvan Voicu: there is a limit of Picking orders that can be active at a certain time
16/09/22, 16:58 - Razvan Voicu: if I remember correctly 4/station
16/09/22, 16:59 - Razvan Voicu: so even though some OBDs may no be released in an instant, they are released in a couple of minutes, since we have so much of them
16/09/22, 17:06 - Stefano Dall'Asta, Lavoro: Razvan i don't think so. some OBD have bene in that status since this morning 😞
16/09/22, 17:18 - Milo Barozzi: IMG-20220916-WA0006.jpg (file allegato)
@Support Technician 21 it seems Stefano's doubts are founded because levels of WAMASDB CPU are yes, lower than 90%, but higher than usual average values. In my opinion, it means there's still a lot of backlog activities to be processed...
16/09/22, 17:19 - Milo Barozzi: ..and those activities, could be the OBD release Stefano is waiting for
16/09/22, 17:19 - Razvan Voicu: Can you give me a fresh example of obd to check?
16/09/22, 17:34 - Stefano Dall'Asta, Lavoro: Sure
16/09/22, 17:35 - Stefano Dall'Asta, Lavoro: OBD0000473633
16/09/22, 17:35 - Stefano Dall'Asta, Lavoro: OBD0000471642
16/09/22, 17:35 - Stefano Dall'Asta, Lavoro: OBD0000475589
16/09/22, 17:36 - Stefano Dall'Asta, Lavoro: OBD0000475696
16/09/22, 17:36 - Stefano Dall'Asta, Lavoro: OBD0000475892
16/09/22, 17:36 - Stefano Dall'Asta, Lavoro: OBD0000476789
16/09/22, 17:37 - Stefano Dall'Asta, Lavoro: these are the most urgent that have to be shipped monday
16/09/22, 17:41 - Razvan Voicu: One moment
16/09/22, 17:58 - Razvan Voicu: For OBD0000473633 we have a couple of PPLUS created. One of them is 2996567 which reserved LU 51577148 in S21 06-30-00
16/09/22, 17:58 - Razvan Voicu: If the user tries to start this PPLU, it doesnt work?
16/09/22, 18:03 - Stefano Dall'Asta, Lavoro: it is reserved but no T0s have been generated.. therefore we can't do anything
16/09/22, 18:04 - Razvan Voicu: isn't the T0 generated when the user goes in mobile -> PPLU dialog?

16/09/22, 18:05 - Stefano Dall'Asta, Lavoro: check 51577148 in mf014, no TO
16/09/22, 18:07 - Razvan Voicu: yes I understand this. But as far as I remember, maybe I'm wrong, when the user goes in mobile -> PPLU -> and select a PPLU, then the TO should be generated for the reserved LU of the selected PPLU. Isn't this the flow?
16/09/22, 18:16 - Milo Barozzi: Sorry for entering into the discussion, but I think they cannot do this..
16/09/22, 18:20 - Stefano Dall'Asta, Lavoro: no it's not . We us Auto-allocation for TOs in these cases. And anyway we have the problem with Picking OBD's too. Please find a way to help us, at least to get these OBDs approved for picking. and
16/09/22, 18:28 - Milo Barozzi: @Support Technician 21 ticket request for this issue (named U03) sent a couple of seconds ago
16/09/22, 18:33 - Razvan Voicu: Ok thanks
16/09/22, 18:34 - Razvan Voicu: checked the code, seems like you are right
16/09/22, 18:35 - Razvan Voicu: we take a couple of OBDs, for which we get the pplus for each OBD and try to create TOs for the PPLUS
16/09/22, 18:36 - Razvan Voicu: but some of this releases fail
16/09/22, 18:36 - Razvan Voicu: I am pretty sure this is because of slow load on DB and big OBDs
16/09/22, 18:37 - Razvan Voicu: and in the middle of the release there's an optimistic lock and the whole process fails
16/09/22, 18:37 - Razvan Voicu: Unfortunately there's no quick workaround for this, probably after everyone will finish shift, load will decrease and everything will run fater
16/09/22, 18:37 - Razvan Voicu: faster*
16/09/22, 18:39 - Milo Barozzi: what's "optimistic lock"? But.. system will try again to process them? When?
16/09/22, 18:41 - Razvan Voicu: it is a concurrency failsafe in the db
16/09/22, 18:42 - Razvan Voicu: This protects us from having a record in the database being simultaneously edited by two different processes
16/09/22, 18:42 - Milo Barozzi: ah ok, I see
16/09/22, 18:42 - Razvan Voicu: I would say because of the slow load, we process too slow the records and there s too much time between the start and the end of the process
16/09/22, 18:43 - Razvan Voicu: and in between our process, another one tries to change it
16/09/22, 18:46 - Razvan Voicu: So we will have to check next week solutions for how to improve DB load
16/09/22, 18:50 - Milo Barozzi: I trust you, but we already experienced in the past situations in which load was high, we waited and, in the end, we reached a total block. Therefore, if possible, I kindly ask you to keep a close eye on in during next hours/tomorrow and if CPU Load is not dropping down, taking maybe some countermeasures. Monday morning I'll be out of office without any chance to help. It'll be better having system fully operative on Monday morning.
16/09/22, 18:52 - Milo Barozzi: Yes, but first also checking which is the root cause of this sudden spike of CPU Load, becuae usually we consume from 25% to 30%, if we drop to 99% (three times the usual consumption) even increasing DB computational power will not be the solution, it'll be just postponing the block (unfortunately) 😞
16/09/22, 18:54 - Razvan Voicu: Ok
16/09/22, 18:55 - Milo Barozzi: Thank you!
19/09/22, 16:24 - Milo Barozzi ha aggiunto Stefano Dall'Asta, Personale.
23/09/22, 12:19 - Milo Barozzi: Dear All, already set to true AGVDisable flag since there were more than 40 missions already to be executed
23/09/22, 12:19 - Milo Barozzi: I'll let you know when all missions are finished
23/09/22, 12:20 - Milo Barozzi: not sure we'll finish before 12:40, depends on AGV speed 😊 let's see
23/09/22, 12:25 - Support Technician 23: Hi Milo
Thanks
23/09/22, 12:38 - Milo Barozzi: 12 missions to the end, but all for ARTs and we've only 3 ARTs running at the moment (due to malfunctions and low battery)
23/09/22, 12:41 - Milo Barozzi: 10...
23/09/22, 12:46 - Milo Barozzi: 6...

23/09/22, 12:51 - Milo Barozzi: 3....
23/09/22, 12:53 - Milo Barozzi: 2
23/09/22, 12:55 - Milo Barozzi: @Support Technician 23 @Support Technician 21 go
go go go
23/09/22, 12:56 - Support Technician 23: on it
23/09/22, 13:12 - Milo Barozzi: everything going smooth for the moment?
23/09/22, 13:13 - Razvan Voicu: yes
23/09/22, 13:14 - Milo Barozzi: thanks for feedback
23/09/22, 13:38 - Milo Barozzi: @Support Technician 23 @Support Technician 21
how is it going? estimated time to return on track?
23/09/22, 13:39 - Razvan Voicu: 5-10 mins
23/09/22, 13:40 - Milo Barozzi: very good
23/09/22, 13:49 - Milo Barozzi: @Support Technician 21 shall we start the
countdown? 🕒
23/09/22, 13:49 - Razvan Voicu: now we encountered a bit of MFS problem
23/09/22, 13:49 - Milo Barozzi: oh..... manual part and desktop user can start?
23/09/22, 13:50 - Milo Barozzi: it'll be a big point for us starting manual area
and desktop users, but only if possible and no-risk
23/09/22, 13:51 - Razvan Voicu: one sec
23/09/22, 13:51 - Milo Barozzi: sure
23/09/22, 13:57 - Milo Barozzi: please, tell me we're close to start....
23/09/22, 14:04 - Milo Barozzi: @Support Technician 21 @Support Technician 23
what's the situation, please?
23/09/22, 14:05 - Support Technician 23: we had a situation
23/09/22, 14:05 - Support Technician 23: back on track
23/09/22, 14:05 - Milo Barozzi: back on track = we can start WAMAS?
23/09/22, 14:05 - Support Technician 23: mfs is loading
23/09/22, 14:05 - Milo Barozzi: manual part can start?
23/09/22, 14:06 - Support Technician 23: yes please
23/09/22, 14:07 - Milo Barozzi: thanks
23/09/22, 14:09 - Milo Barozzi: @Support Technician 23 heard MFS reset...
Automated part started
23/09/22, 14:09 - Support Technician 23: thanks
23/09/22, 14:10 - Milo Barozzi: CPU load on WAMASDB seems fine.. 30%
23/09/22, 14:11 - Milo Barozzi: com.wamas.mfs.core.common.agvDisable set to
false
23/09/22, 14:12 - Milo Barozzi: AGV running
23/09/22, 14:17 - Milo Barozzi: @Support Technician 23 @Support Technician 21 I
can't see flag for activating/deactivating CR04 "oblige pickers" in FW028...
different name or CR not inside deploy?
23/09/22, 14:21 - Razvan Voicu: CR inside deploy but no parameter. I checked the
CR and no parameter is asked for
23/09/22, 14:21 - Milo Barozzi: WHAT??!?!
23/09/22, 14:21 - Milo Barozzi: we discussed them together on 22.06!
23/09/22, 14:23 - Milo Barozzi: on/off parameter named
"SendBackSourcesOneByOne.Switch" should be included
23/09/22, 14:23 - Razvan Voicu: Yes, sorry, I just checked now and I followed an
old specification
23/09/22, 14:23 - Milo Barozzi: 😞😞😞😞😞😞😞😞😞
23/09/22, 14:23 - Milo Barozzi: means people are now obliged to send sources one
by one without any chance to switch it off and/or to configure 0, 1 or 2????
23/09/22, 14:24 - Milo Barozzi: Oh my God...
23/09/22, 14:24 - Razvan Voicu: yes
23/09/22, 14:25 - Milo Barozzi: WTF!!!!!!!!!!
23/09/22, 14:26 - Milo Barozzi: Oh my God, oh my God.... we'll check in the next
hour if everything's goes smooth or not at picking. I'll let you know ASAP, but
please consider to patch it ASAP
23/09/22, 14:35 - Razvan Voicu: So for the parameter part, we can patch it so
you can switch from using old logic or new logic
23/09/22, 14:35 - Razvan Voicu: I will try to do now and create a new pack and
ready to deploy the parameter
23/09/22, 14:35 - Milo Barozzi: Wait wait
23/09/22, 14:36 - Razvan Voicu: We will not deploy it, just get it ready in case
you need it

23/09/22, 14:36 - Milo Barozzi: We're checking if it's working. If it's working with no troubles, parameter is a low priority

23/09/22, 14:36 - Milo Barozzi: Ah ok

23/09/22, 14:48 - Milo Barozzi: @Support Technician 21 @Support Technician 23 shall you kindly enable us to see SM525... it's the new F109 feature, but even with profile "Direttore Tecnico" I can't see that dialogue/authorize other roles to see it

23/09/22, 14:51 - Milo Barozzi: IMG-20220923-WA0003.jpg (file allegato)

23/09/22, 14:54 - Razvan Voicu: So if you go in SM022 and press right click on a lets say stock in S30*

23/09/22, 14:54 - Razvan Voicu: "move mulitple stock objects"

23/09/22, 14:54 - Razvan Voicu: it doesnt work

23/09/22, 14:55 - Milo Barozzi: it's says our rights are not enough to open dialog SM525

23/09/22, 14:55 - Razvan Voicu: Try again with dirretore tehcnico

23/09/22, 14:55 - Razvan Voicu: if it doesnt work, restart the desktop and try again

23/09/22, 14:55 - Milo Barozzi: one sec please

23/09/22, 14:55 - Razvan Voicu: Please let us know what other roles need this permission

23/09/22, 14:56 - Milo Barozzi: I can access it now, and also give rights to other users

23/09/22, 14:56 - Milo Barozzi: I'll give rights to see it also to superuser and controllo qualità, then try with the "controllo qualità" responsible

23/09/22, 14:56 - Milo Barozzi: thank you so far

23/09/22, 14:57 - Razvan Voicu: IMG-20220923-WA0005.jpg (file allegato)

Ok. It should be in desktop access -> search SM525 -> full access

23/09/22, 14:57 - Razvan Voicu: Let me know if it works

23/09/22, 14:58 - Milo Barozzi: yep yep, I did it 😊

23/09/22, 14:58 - Milo Barozzi: going to controllo qualità office for testing now

23/09/22, 15:08 - Milo Barozzi: @Support Technician 21 it's a little bit annoying, because you have to type "WH1" any time, but it's working

23/09/22, 15:09 - Milo Barozzi: let's say "big target reached", but I'll ask you officially to make in manner "WH1" is prefilled or it's not needed to be inserted

23/09/22, 15:11 - Razvan Voicu: Can you please send a mail including adrian/alex about this, so they are aware

23/09/22, 15:12 - Milo Barozzi: sure sure, but I'll do calmly later when I'm sure picking is fine and the rest is fine...

23/09/22, 15:13 - Milo Barozzi: at a first glance, CR04 is not creating troubles. It's working but it has to be improved because picker can "kid" the system... I'll send and official mail later also for this..

23/09/22, 15:15 - Milo Barozzi: @Support Technician 21 another issue... when running query on table/view "loadaid" oracle returns "table or view is not existing". Shall u kindly check please

23/09/22, 15:15 - Milo Barozzi: ?

23/09/22, 15:17 - Razvan Voicu: was this a query you usually ran?

23/09/22, 15:18 - Milo Barozzi: yes, it's in a periodic report running every 2 hours... but also if you run `"select * from loadiad"` it returns that error

23/09/22, 15:32 - Adrian Cindea: 5 minutes

23/09/22, 15:32 - Adrian Cindea: And it will work again

23/09/22, 15:32 - Milo Barozzi: yes, sure

23/09/22, 15:32 - Milo Barozzi: perfect!

23/09/22, 15:36 - Adrian Cindea: Done

23/09/22, 15:37 - Milo Barozzi: trying

23/09/22, 15:41 - Milo Barozzi: It works

23/09/22, 15:41 - Milo Barozzi: Thank you

23/09/22, 15:46 - Milo Barozzi: @Support Technician 12 please check if other tables can be affected by the same issue...

23/09/22, 15:48 - Adrian Cindea: I did it for all 943

23/09/22, 15:49 - Adrian Cindea: It is related with db migration of deploy

23/09/22, 15:49 - Adrian Cindea: Now all works as before deploy

23/09/22, 15:57 - Milo Barozzi: 👍super ,thank u

29/09/22, 20:02 - Support Technician 23: Hi Milo
 29/09/22, 20:03 - Support Technician 23: regarding your last email URGENT - POTENTIAL TOTAL BLOCK, do you still have issues with TPOs ? the CPU seems pretty stable excepted some sporadic spikes up to 60-70
 29/09/22, 20:28 - Milo Barozzi: Hi Darius, I'm sorry but I'm at home now and I can't access wamas for checking. Does cpu load decreased to usual 30-35% now? Did you find something that was blocking and/or slowing replenishment tpo creation?
 29/09/22, 20:29 - Support Technician 23: IMG-20220929-WA0002.jpg (file allegato)
 29/09/22, 20:29 - Support Technician 23: the load was stable when I connected
 29/09/22, 20:30 - Support Technician 23: I requested feedback from colleagues from CC
 29/09/22, 20:30 - Support Technician 23: is there any way for you to check with on site people about the TPOs ?
 29/09/22, 20:32 - Stefano Dall'Asta, Personale: I have asked
 29/09/22, 20:33 - Support Technician 23: thank you
 29/09/22, 21:00 - Support Technician 23: any news ?
 29/09/22, 21:00 - Stefano Dall'Asta, Personale: Not yet
 29/09/22, 21:19 - Stefano Dall'Asta, Personale: It seems ok now
 29/09/22, 21:22 - Support Technician 23: Ok, thank you
 29/09/22, 21:26 - Milo Barozzi: Thanks @Company Employee 15 and @Support Technician 23
 19/10/22, 19:05 - Razvan Voicu: Hello. I see lighthouse is like a christmas tree
 19/10/22, 19:05 - Razvan Voicu: Are there any physical issues in the warehouse?
 19/10/22, 19:05 - Milo Barozzi: IMG-20221019-WA0008.jpg (file allegato)
 @Support Technician 6 @Support Technician 12 @Support Technician 23 @Support Technician 21 @Support Technician 11 is anyone from you online? Your colleague from PLC department did a mess and we're in this situation and not able to reset. Plant is stopped. please help if possible
 19/10/22, 19:06 - Milo Barozzi: I'll call you now
 19/10/22, 19:06 - Razvan Voicu: Ok sure
 19/10/22, 19:22 - Mihai Soceanu: please confrim errors on TPSs
 19/10/22, 19:23 - Milo Barozzi: hi Mihai, from where sorry?
 19/10/22, 19:26 - Mihai Soceanu: normal ack for conveyour
 19/10/22, 19:26 - Milo Barozzi: sorry, but I don't understand. From which dialog?
 19/10/22, 19:26 - Mihai Soceanu: phisically
 19/10/22, 19:26 - Mihai Soceanu: no dialog
 19/10/22, 19:26 - Mihai Soceanu: :)
 19/10/22, 19:27 - Milo Barozzi: sorry
 19/10/22, 19:27 - Milo Barozzi: give us 2 minutes to make the trip of all pults
 19/10/22, 19:27 - Milo Barozzi: we did it for pult between pick stations 1 and 2 but the red dots re-appear
 19/10/22, 19:29 - Milo Barozzi: @Support Technician 6 tried to reset HBW1 SRMs pult (blue button) but nothing happens
 19/10/22, 19:30 - Mihai Soceanu: :(
 19/10/22, 19:32 - Milo Barozzi: I think the PLC technician from SSI austria stopped the plant or F01 not in a controlled way, because there are some stacker cranes from HBW1 that have forks that are in the middle
 19/10/22, 19:32 - Milo Barozzi: like somebody removed power supply while they were moving
 19/10/22, 19:32 - Milo Barozzi: I don't know if this can help you understanding the way to solve it
 19/10/22, 19:32 - Mihai Soceanu: pls check srm 2
 19/10/22, 19:32 - Milo Barozzi: I'm in front of it
 19/10/22, 19:33 - Milo Barozzi: reset (blue button) from pult and it started working
 19/10/22, 19:33 - Milo Barozzi: if you did something, you found the right treatment
 19/10/22, 19:34 - Mihai Soceanu: not sure yet
 19/10/22, 19:34 - Mihai Soceanu: ...
 19/10/22, 19:34 - Mihai Soceanu: i think so
 19/10/22, 19:34 - Mihai Soceanu: for srm 1 it did not work
 19/10/22, 19:34 - Milo Barozzi: If I can do something, consider me as your

"hands" onsite

19/10/22, 19:35 - Milo Barozzi: SRM1 has physically an LU on board
19/10/22, 19:35 - Milo Barozzi: a big pallet (slaved)
19/10/22, 19:36 - Milo Barozzi: and other 2 LUs are exactly on the infeed line, where the two red spots are
19/10/22, 19:37 - Milo Barozzi: pallets in the "exit" line from SRM1 are moving
19/10/22, 19:37 - Milo Barozzi: SRM2 works, but its exit line is blocked
19/10/22, 19:37 - Milo Barozzi: due to "red bubbles"
19/10/22, 19:40 - Milo Barozzi: for SRM2 exit lines we're putting the physical presence via CTOP and it seems to work
19/10/22, 19:41 - Mihai Soceanu: ok
19/10/22, 19:41 - Milo Barozzi: it worked
19/10/22, 19:41 - Milo Barozzi: we're doing the same with infeed line of SRM1
19/10/22, 19:42 - Milo Barozzi: @Support Technician 6 BUT... pallets are not going ahead...
19/10/22, 19:42 - Milo Barozzi: they're not delivered to EMS
19/10/22, 19:45 - Mihai Soceanu: order is not in yet
19/10/22, 19:45 - Mihai Soceanu: ...
19/10/22, 19:46 - Milo Barozzi: did you do something on infeed line of SRM01? or it was me solving it? 😊
19/10/22, 19:46 - Milo Barozzi: SRM 01 now is moving
19/10/22, 19:47 - Milo Barozzi: SRM01,02,03 are working now
19/10/22, 19:48 - Milo Barozzi: it was a lie... infeed line of SRM3 is not working
19/10/22, 19:48 - Milo Barozzi: no sorry, exit lane of SRM2
19/10/22, 19:49 - Mihai Soceanu: i am also doing stuff
19/10/22, 19:49 - Mihai Soceanu: ...
19/10/22, 19:53 - Milo Barozzi: we're working on SRM02 exit lane
19/10/22, 19:53 - Milo Barozzi: now we try cancelling from MF266
19/10/22, 19:53 - Milo Barozzi: blocking conveyor behing in manner pallet is not going ahead
19/10/22, 19:54 - Mihai Soceanu: ok
19/10/22, 19:54 - Mihai Soceanu: :)
19/10/22, 19:55 - Mihai Soceanu: pallet on 206 does not have space in pick station
19/10/22, 19:56 - Mihai Soceanu: please ack srm 4
19/10/22, 19:57 - Milo Barozzi: but there's space on BP06 D*
19/10/22, 19:57 - Milo Barozzi: done
19/10/22, 19:57 - Milo Barozzi: pallet on 206 says
"ERROR_SOURCE_TEMPORARILY_NOT_AVAILABLE"
19/10/22, 19:57 - Mihai Soceanu: i will check
19/10/22, 19:57 - Milo Barozzi: thanks
19/10/22, 19:58 - Milo Barozzi: IMG-20221019-WA0009.jpg (file allegato)
PICK 6 TARGET is like so
19/10/22, 19:59 - Mihai Soceanu: i do not know why the cranes are able to pick up the pallets
19/10/22, 20:00 - Milo Barozzi: what do you mean?
19/10/22, 20:01 - Mihai Soceanu: we get storage signal missing
19/10/22, 20:01 - Mihai Soceanu: meaning the handshake between srm and PLC can not be done
19/10/22, 20:01 - Milo Barozzi: but they store pallets actually
19/10/22, 20:02 - Milo Barozzi: do you think pallet are going to HBW1 but not stored logically? 😞
19/10/22, 20:03 - Milo Barozzi: logically on WAMAS they move...
19/10/22, 20:03 - Mihai Soceanu: nono nonono
19/10/22, 20:03 - Mihai Soceanu: :)
19/10/22, 20:03 - Mihai Soceanu: IMG-20221019-WA0010.jpg (file allegato)
19/10/22, 20:04 - Mihai Soceanu: are not stored
19/10/22, 20:04 - Mihai Soceanu: because of handshake
19/10/22, 20:04 - Milo Barozzi: ah ok
19/10/22, 20:04 - Mihai Soceanu: same for all cranes
19/10/22, 20:04 - Mihai Soceanu: maybe you can ack crane 8
19/10/22, 20:04 - Mihai Soceanu: 7
19/10/22, 20:04 - Mihai Soceanu: 6

19/10/22, 20:04 - Mihai Soceanu: 5
19/10/22, 20:04 - Milo Barozzi: doing in 3 seconds...
19/10/22, 20:04 - Company Employee 18: Ok
19/10/22, 20:04 - Milo Barozzi: Giacomo did it
19/10/22, 20:05 - Milo Barozzi: curious thing is that SRM01 and SRM02 are working
19/10/22, 20:05 - Milo Barozzi: before, with SRM01, it started working because pallet that was on the middle of conveyor lane went ahead...
19/10/22, 20:06 - Milo Barozzi: I did it just refresh+reset and reset from pult
19/10/22, 20:06 - Milo Barozzi: 5 is moving
19/10/22, 20:09 - Milo Barozzi: SRM04 is moving, but physically it has no space to deliver
19/10/22, 20:11 - Milo Barozzi: @Support Technician 6 you know what? pick station 6 doesn't need LU on CU 206!!!
19/10/22, 20:12 - Milo Barozzi: why don't we cancel it's TPO and recreate it for a different stacker crane? for instance SRM01?
19/10/22, 20:14 - Mihai Soceanu: ok
19/10/22, 20:14 - Mihai Soceanu: please do so
19/10/22, 20:15 - Milo Barozzi: consider it done in 1 min
19/10/22, 20:16 - Milo Barozzi: done
19/10/22, 20:17 - Milo Barozzi: now monorail is blocked, but I think that when it comes back to life, it'll work
19/10/22, 20:17 - Milo Barozzi: i'm going to pult for resetting the error
19/10/22, 20:18 - Mihai Soceanu: ok
19/10/22, 20:18 - Milo Barozzi: no... damn it... it's still not appearing in Lhouse
19/10/22, 20:19 - Milo Barozzi: now we got it
19/10/22, 20:19 - Milo Barozzi: 🤔🤔🤔🤔
19/10/22, 20:20 - Milo Barozzi: monorail vehicle took it
19/10/22, 20:20 - Milo Barozzi: yeeeeeeeeeeeah
19/10/22, 20:20 - Milo Barozzi: SRMs of HBW1 seems fine now
19/10/22, 20:20 - Milo Barozzi: we're missing "just" Wuzzi
19/10/22, 20:21 - Mihai Soceanu: and cranes are not doing storage
19/10/22, 20:21 - Mihai Soceanu: ...
19/10/22, 20:21 - Mihai Soceanu: ah 7 did it
19/10/22, 20:21 - Milo Barozzi: ah... really?
19/10/22, 20:21 - Mihai Soceanu: yes
19/10/22, 20:21 - Milo Barozzi: Probably was a dream but I saw one doing a storage
19/10/22, 20:22 - Mihai Soceanu: 3,4,5,6
19/10/22, 20:22 - Mihai Soceanu: are not working
19/10/22, 20:22 - Mihai Soceanu: IMG-20221019-WA0017.jpg (file allegato)
19/10/22, 20:25 - Mihai Soceanu: maybe you need to ask PLC
19/10/22, 20:25 - Mihai Soceanu: to do the correct handshale
19/10/22, 20:26 - Mihai Soceanu: the rest seem to start to be back on track
19/10/22, 20:26 - Mihai Soceanu: with this we can not help by MFS
19/10/22, 20:28 - Milo Barozzi: PLC guy left site
19/10/22, 20:30 - Mihai Soceanu: maybe support
19/10/22, 20:30 - Mihai Soceanu: :-??
19/10/22, 20:33 - Milo Barozzi: Benedetta is calling
19/10/22, 20:33 - Milo Barozzi: me and Jack trying to fix exit SMR08
19/10/22, 20:34 - Milo Barozzi: IMG-20221019-WA0018.jpg (file allegato)
@Support Technician 6 shall you kindly have a look at this pls?
19/10/22, 20:38 - Razvan Voicu: do you know his name?
19/10/22, 20:38 - Milo Barozzi: Herman Ebner
19/10/22, 20:45 - Benedetta Zini: @Support Technician 6 could you please fix F-stack buffer and B-stack buffer?
19/10/22, 20:48 - Mihai Soceanu: wil be fixed by itself
19/10/22, 20:48 - Mihai Soceanu: when TPO is needed
19/10/22, 20:48 - Benedetta Zini: okay i trust you
19/10/22, 20:50 - Mihai Soceanu: we can try to send back to HBW
19/10/22, 20:51 - Mihai Soceanu: i send back to HBW
19/10/22, 20:52 - Milo Barozzi: let's see if they're taken from EMS
19/10/22, 20:52 - Milo Barozzi: yes, they gone
19/10/22, 20:53 - Milo Barozzi: @Support Technician 6 out of storage, I think

that also exit lanes to EMS for that stacker cranes are not working
19/10/22, 20:55 - Mihai Soceanu: seems so
19/10/22, 20:58 - Mihai Soceanu: i see only srm2 exit not ok
19/10/22, 20:58 - Mihai Soceanu: because the desk is in manual
19/10/22, 21:00 - Mihai Soceanu: we try again to store
19/10/22, 21:00 - Mihai Soceanu: :)
19/10/22, 21:00 - Mihai Soceanu: 6 worjs
19/10/22, 21:00 - Mihai Soceanu: works
19/10/22, 21:01 - Mihai Soceanu: there is a timeout in PLC as far as i remember
19/10/22, 21:01 - Mihai Soceanu: 5 works
19/10/22, 21:04 - Milo Barozzi: Great!
19/10/22, 21:04 - Mihai Soceanu: SRM3 we can not fix at the moment
19/10/22, 21:04 - Milo Barozzi: SRM03 is missing (I think)
19/10/22, 21:04 - Mihai Soceanu: yes\
19/10/22, 21:04 - Mihai Soceanu: ...
19/10/22, 21:04 - Mihai Soceanu: IMG-20221019-WA0020.jpg (file allegato)
19/10/22, 21:05 - Mihai Soceanu: we do not know what is here
19/10/22, 21:05 - Milo Barozzi: gimme 2 minutes, I'll go there
19/10/22, 21:08 - Milo Barozzi: Plugging ctop...
19/10/22, 21:08 - Milo Barozzi: Auto mode on
19/10/22, 21:08 - Milo Barozzi: @Support Technician 6 srm02 exit lane is fine
now
19/10/22, 21:09 - Milo Barozzi: What do you think we can do with srm03?
19/10/22, 21:09 - Milo Barozzi: It retrieves, but doesn't stores. I'm in front
of it 🙄
19/10/22, 21:09 - Mihai Soceanu: from our side i do not think so
19/10/22, 21:09 - Mihai Soceanu: ooor
19/10/22, 21:09 - Milo Barozzi: 🤖
19/10/22, 21:09 - Mihai Soceanu: maybe someone can move pallets from TPS to TPR
19/10/22, 21:10 - Mihai Soceanu: manually
19/10/22, 21:10 - Mihai Soceanu: and then should be ok
19/10/22, 21:10 - Razvan Voicu: i am talking now with plc
19/10/22, 21:10 - Mihai Soceanu: i thinl
19/10/22, 21:10 - Mihai Soceanu: think*
19/10/22, 21:10 - Razvan Voicu: give me 5 minutes to talk to plc guy please
19/10/22, 21:11 - Milo Barozzi: Do you mean use srm03 as a bridge?
19/10/22, 21:11 - Mihai Soceanu: yes\
19/10/22, 21:11 - Mihai Soceanu: but mr @Support Technician 21 says to wait :)
19/10/22, 21:11 - Mihai Soceanu: 5 minutes on clock
19/10/22, 21:11 - Milo Barozzi: I hope you're not speaking with the one that was
onsite this afternoon. Honestly speaking... he did only bullshits...sorry for
explicit language
19/10/22, 21:12 - Milo Barozzi: Let's wait for @Support Technician 21
response 😊
19/10/22, 21:12 - Razvan Voicu: no no
19/10/22, 21:12 - Razvan Voicu: not the onsite guy
19/10/22, 21:13 - Milo Barozzi: He fucked the plant in a way nobody ever
did...what the hell!
19/10/22, 21:13 - Milo Barozzi: Ah ok, I'm optimistic now 😊
19/10/22, 21:14 - Mihai Soceanu: sometimes i did almost the same □□□□□
19/10/22, 21:15 - Support Technician 25: Who was it from PLC Austria team?
Greetings from Croatia btw, I'm currently on vacation 😊
19/10/22, 21:15 - Mihai Soceanu: x-mas tree □
19/10/22, 21:15 - Benedetta Zini: Hermann Ebner
19/10/22, 21:15 - Mihai Soceanu: nice nice :)
19/10/22, 21:17 - Mihai Soceanu: please move pallets with SRM03
19/10/22, 21:20 - Milo Barozzi: Give us a couple of minutes ... I need a
maintenance guy for that
19/10/22, 21:21 - Milo Barozzi: Matthias.... you're teammate did a big
mess...I'm happy he left site before we fixed everything..in this was I can
sleep before speaking with him
19/10/22, 21:24 - Support Technician 25: 🚫 should not happen.
Next week I'm back in office, I'll have a look
19/10/22, 21:26 - Milo Barozzi: @Support Technician 6 Andrea is going to drive

SRM03 in a minute

19/10/22, 21:26 - Mihai Soceanu: ok
19/10/22, 21:26 - Mihai Soceanu: thx
19/10/22, 21:26 - Milo Barozzi: we'll put both LUs from CU209 and 210 to 211 and 212
19/10/22, 21:26 - Mihai Soceanu: ok
19/10/22, 21:26 - Milo Barozzi: shall you kindly move them logically?
19/10/22, 21:26 - Mihai Soceanu: ok
19/10/22, 21:26 - Milo Barozzi: my laptop battery is claiming for recharging...
19/10/22, 21:27 - Milo Barozzi: CU behind 209 and 210 are working
19/10/22, 21:28 - Milo Barozzi: there's probably another issue with pallet on CU 210
19/10/22, 21:28 - Milo Barozzi: Andrea is checking
19/10/22, 21:28 - Milo Barozzi: give us 2 mins
19/10/22, 21:28 - Milo Barozzi: more
19/10/22, 21:31 - Milo Barozzi: He's moving it in fully manual mode because in automated and semi-auto was not working
19/10/22, 21:32 - Milo Barozzi: ok now 51553373 is on 211 and 85430567 is on 212
19/10/22, 21:34 - Mihai Soceanu: done
19/10/22, 21:34 - Milo Barozzi: I think SRM03 took 85430567 logically but physically another one
19/10/22, 21:34 - Mihai Soceanu: ups
19/10/22, 21:34 - Mihai Soceanu: shirt
19/10/22, 21:35 - Mihai Soceanu: mixed them
19/10/22, 21:35 - Mihai Soceanu: we will retrieve them out
19/10/22, 21:35 - Mihai Soceanu: ...
19/10/22, 21:35 - Milo Barozzi: wait wait
19/10/22, 21:35 - Milo Barozzi: probably not...
19/10/22, 21:36 - Milo Barozzi: @Support Technician 6 yes, it's a shit
19/10/22, 21:36 - Razvan Voicu: you said 373 was behind 567
we put 373 in front of 567
19/10/22, 21:36 - Razvan Voicu: but we send it to RPF01C0321 to get out and you can infeed them again
19/10/22, 21:36 - Milo Barozzi: 60933471 is logically on TPF01C2141 but physically it's not
19/10/22, 21:36 - Mihai Soceanu: we send them to retrieval
19/10/22, 21:37 - Milo Barozzi: let us check the real LU-ID of the one on TPF01C2141
19/10/22, 21:37 - Mihai Soceanu: IMG-20221019-WA0021.jpg (file allegato)
19/10/22, 21:37 - Milo Barozzi: 51553373
19/10/22, 21:37 - Milo Barozzi: exactly that
19/10/22, 21:37 - Mihai Soceanu: 3373 is out
19/10/22, 21:38 - Milo Barozzi: ok, let's send them out to RPF#321
19/10/22, 21:38 - Mihai Soceanu: ok real one 3471
19/10/22, 21:38 - Mihai Soceanu: already send them there
19/10/22, 21:38 - Milo Barozzi: but... don't we fuck picking order in this way?
19/10/22, 21:38 - Mihai Soceanu: srry for my mistake
19/10/22, 21:38 - Milo Barozzi: mistake was also from our side
19/10/22, 21:38 - Mihai Soceanu: no
19/10/22, 21:38 - Mihai Soceanu: was pallet for store
19/10/22, 21:39 - Milo Barozzi: we switched auto srm before you moved it logically
19/10/22, 21:39 - Mihai Soceanu: so no pick should be affected
19/10/22, 21:39 - Milo Barozzi: both of them?
19/10/22, 21:39 - Mihai Soceanu: yes
19/10/22, 21:39 - Milo Barozzi: I think it's all green light now
19/10/22, 21:39 - Mihai Soceanu: so back on track
19/10/22, 21:40 - Milo Barozzi: gentlemen @Support Technician 6 @Support Technician 21 we really thank you so much
19/10/22, 21:40 - Milo Barozzi: whenever you come to Fiorano, you'll be our hosts at Villa's Restaurant
19/10/22, 21:42 - Razvan Voicu: I want Ferrari's hotel :D
19/10/22, 21:43 - Milo Barozzi: 😂😂😂
19/10/22, 21:46 - Razvan Voicu: So everything fine?

19/10/22, 21:47 - Milo Barozzi: Yes, apart from 3,5 hours more spent onsite... and you got a bad evening...now it's fine.

19/10/22, 21:47 - Milo Barozzi: Again, thank you so much both of you guys

19/10/22, 21:47 - Mihai Soceanu: welcome

19/10/22, 21:48 - Razvan Voicu: Ok, have a nice evening

19/10/22, 21:54 - Milo Barozzi: You too thank you

28/10/22, 15:54 - Adrian Cindea: What is current situation?

28/10/22, 15:55 - Milo Barozzi: <Media omessi>

28/10/22, 15:55 - Milo Barozzi: The same as before, all pick stations are in "loading..." dialog. Another example is in the video from before.

28/10/22, 15:56 - Adrian Cindea: Close the dialog and open again

28/10/22, 15:57 - Milo Barozzi: we already did it, but it stays in the same state

28/10/22, 15:57 - Adrian Cindea: Please give me a station

28/10/22, 15:57 - Adrian Cindea: Only logout as user to try to open it from server side

28/10/22, 15:58 - Milo Barozzi: @Company Employee 24 puoi prestarmi una baia per un po' di tempo? qual è una baia da cui l'utente può sloggarsi e lasciar provare Adrian?

28/10/22, 15:59 - Daniele MMOperations: Baia 3 è libera

28/10/22, 15:59 - Adrian Cindea: K

28/10/22, 15:59 - Milo Barozzi: @Support Technician 12 HBW03

28/10/22, 15:59 - Milo Barozzi: grazie Daniele

28/10/22, 16:00 - Milo Barozzi: aspè Daniele, mi serve una baia che è nella schermata di blocco, non una che non è in blocco

28/10/22, 16:00 - Milo Barozzi: una che abbia "caricamento in corso"

28/10/22, 16:01 - Adrian Cindea: IMG-20221028-WA0005.jpg (file allegato)

28/10/22, 16:02 - Adrian Cindea: It works through vpn

28/10/22, 16:02 - Adrian Cindea: I close it lectry

28/10/22, 16:02 - Milo Barozzi: gimme a second... they don't understand your request probably. let me call them

28/10/22, 16:02 - Daniele MMOperations: Hbw07

28/10/22, 16:03 - Adrian Cindea: I am on hbw03

28/10/22, 16:03 - Milo Barozzi: @Support Technician 12 try out with HBW07 please

28/10/22, 16:03 - Milo Barozzi: forget HBW03 for a while, was not a good example

28/10/22, 16:07 - Adrian Cindea: IMG-20221028-WA0006.jpg (file allegato)

28/10/22, 16:08 - Adrian Cindea: I am on it and make refresh

28/10/22, 16:09 - Adrian Cindea: IMG-20221028-WA0007.jpg (file allegato)

28/10/22, 16:09 - Adrian Cindea: I am through vpn

28/10/22, 16:09 - Milo Barozzi: Daniele told me now it's a quicker, but it still takes 20-30 seconds to exit from "loading..." dialog

28/10/22, 16:10 - Milo Barozzi: @Support Technician 12 what can be affecting this loading times? I checked resources on WAMASAPP and WAMASDB machines and noticed nothing strange

28/10/22, 16:10 - Adrian Cindea: It was when i logged on it

28/10/22, 16:10 - Adrian Cindea: But now both look fine

28/10/22, 16:11 - Adrian Cindea: IMG-20221028-WA0008.jpg (file allegato)

28/10/22, 16:11 - Milo Barozzi: was there a process "taking" a lot of resources? did you "killed" it?

28/10/22, 16:12 - Adrian Cindea: Msaccess ...

28/10/22, 16:12 - Adrian Cindea: IMG-20221028-WA0009.jpg (file allegato)

28/10/22, 16:12 - Adrian Cindea: IMG-20221028-WA0010.jpg (file allegato)

28/10/22, 16:12 - Milo Barozzi: 🤔🔴

28/10/22, 16:13 - Adrian Cindea: What is current status?

28/10/22, 16:13 - Milo Barozzi: Daniele told me now it's a quicker, but it still takes 20-30 seconds to exit from "loading..." dialog

28/10/22, 16:13 - Milo Barozzi: my suggestion is to leave things like they are for 20-30 minutes and then make another check

28/10/22, 16:14 - Milo Barozzi: @Support Technician 12 d'you agree?

28/10/22, 16:14 - Adrian Cindea: K

28/10/22, 16:16 - Milo Barozzi: 👍

28/10/22, 16:21 - Milo Barozzi: @Support Technician 12 Daniele tried pick station 2, 6 and 10 and loading time now seems "as usual" 😊

28/10/22, 16:23 - Adrian Cindea: Sounds good

28/10/22, 16:23 - Alexandru Catarau: 👍
28/10/22, 16:35 - Milo Barozzi: @Company Employee 24 are we still fine?
28/10/22, 16:37 - Daniele MMOperations: Everything seems fine now
28/10/22, 16:37 - Daniele MMOperations: If something happens, i'll let U know
28/10/22, 16:38 - Milo Barozzi: @Support Technician 12 I think we can close the ticket therefore
28/10/22, 16:38 - Alexandru Catarau: IMG-20221028-WA0011.jpg (file allegato)
28/10/22, 16:39 - Alexandru Catarau: for the past 10 min it calmed down :)
28/10/22, 16:39 - Alexandru Catarau: i will close the incident
28/10/22, 16:39 - Alexandru Catarau: will monitor for 15 min more
28/10/22, 16:39 - Milo Barozzi: I agree
28/10/22, 16:45 - Adrian Cindea: Have an easy rest of the day.
28/10/22, 16:46 - Alexandru Catarau: same
09/11/22, 15:16 - Razvan Voicu: checking system now
09/11/22, 15:17 - Benedetta Zini: Hi Razvan! Okay Thank you
09/11/22, 15:18 - Razvan Voicu: was there some manual intervention?
09/11/22, 15:18 - Benedetta Zini: no
09/11/22, 15:19 - Milo Barozzi: at least from us no... we don't know if somebody (from SSI) from remote did something...
09/11/22, 15:20 - Razvan Voicu: ok
Frequency inverter 164M01 fault
seems like PLC, we will forward to them
09/11/22, 15:21 - Razvan Voicu: IMG-20221109-WA0002.jpg (file allegato)
09/11/22, 15:22 - Razvan Voicu: This it at 2:17, first error
09/11/22, 15:22 - Benedetta Zini: Yes I sent it on email
09/11/22, 15:22 - Razvan Voicu: so someone pressed on emergency stop?
09/11/22, 15:25 - Razvan Voicu: is it only me, or errors at HBW seem to be gone?
09/11/22, 15:25 - Razvan Voicu: IMG-20221109-WA0003.jpg (file allegato)
09/11/22, 15:27 - Benedetta Zini: Also our maintenance is working onsite in order to find the problem
09/11/22, 15:31 - Benedetta Zini: Are PLC office working on it?
09/11/22, 15:37 - Razvan Voicu: Yes
09/11/22, 15:37 - Benedetta Zini: okay thanks
11/11/22, 08:15 - Adrian Cindea: Morning
11/11/22, 08:15 - Adrian Cindea: Please check ping from pick station hbw01 to server 172.29.26.37
11/11/22, 08:28 - Milo Barozzi: Good morning Adrian... which server is 172.29.26.37? WAMASDB? WAMASAPP? Sorry but we have different IP addresses! 😊
11/11/22, 08:32 - Alexandru Catarau: wamassapp
11/11/22, 08:32 - Alexandru Catarau: wamasdb is 36
11/11/22, 08:33 - Milo Barozzi: ok, give us 10 minutes to go there physically and launch ping command
11/11/22, 08:38 - Chiara Lodesani, Lavoro: IMG-20221111-WA0001.jpg (file allegato)
11/11/22, 08:38 - Milo Barozzi: thanks @Company Employee 9
@Support Technician 11 @Support Technician 12 seems all fine
11/11/22, 09:11 - Adrian Cindea: What is slow?
11/11/22, 09:12 - Milo Barozzi: IMG-20221111-WA0002.jpg (file allegato)
system is not slow... the issue is that only a few of picking orders are assigned to pick stations (in OG039) even OG025 is full of orders (more than 1.500 pick orders there)
11/11/22, 09:13 - Milo Barozzi: @Support Technician 12 some orders in OG025 (as usual) cannot be assigned to pick stations because there's no stock inside HBW1, but the majority of them can go there, but are not going there
11/11/22, 09:13 - Milo Barozzi: it's a recurrent issue and we never found the root cause, sometimes happens, but we don't know why
11/11/22, 09:13 - Milo Barozzi: explicitly speaking.... it's a real pain in the ass because we don't know when it can happen and when it happens it slows incredibly down picking performances (and we get in troubles with pick orders for next day)
11/11/22, 09:14 - Adrian Cindea: Thx
11/11/22, 09:19 - Milo Barozzi: you're welcome... another hint: often it's happening when there are quite a good number of the most priority pick orders in OG025 that cannot be fullfilled due to lack of stock. It seems like

stationWorker is not looking further after a certain number of orders (on the other hand, with a similar effect) that due to the lack of stock of the top-priority orders it takes too long and after a certain "timeout" Worker is not able to reach an "assignable" order. Can it be this the reason? Does the worker take a long time to skip from one order to another when stock is not enough to assign it to a station?

11/11/22, 09:28 - Adrian Cindea: Archiving was locked for 24 days for some tables

11/11/22, 09:28 - Milo Barozzi: 🤔 we observed that some OBDs that should be archived were not being archived

11/11/22, 09:28 - Adrian Cindea: Archiving protokol had 5.9 milions roes

11/11/22, 09:29 - Milo Barozzi: WHAT THE FUCK! 😡

11/11/22, 09:29 - Razvan Voicu: not related to OBDs, just protocol entities

11/11/22, 09:29 - Adrian Cindea: It affectes the system perf

11/11/22, 09:29 - Adrian Cindea: It is only logs normally

11/11/22, 09:29 - Milo Barozzi: I can imagine.... strange that CPU Load or Memory Load was not increased due to that

11/11/22, 09:29 - Adrian Cindea: Logs not used or only used for investigation

11/11/22, 09:30 - Milo Barozzi: and now you unlocked the archiving protocol?

11/11/22, 09:30 - Adrian Cindea: Worker to assign po to stations is affected

11/11/22, 09:30 - Adrian Cindea: Razvan

11/11/22, 09:31 - Adrian Cindea: I saw to many rows and i checked retention and razvan job status being lockef

11/11/22, 09:31 - Milo Barozzi: I see

11/11/22, 09:32 - Adrian Cindea: Activity protocol is not movef yet ... there are others tables before it

11/11/22, 09:33 - Adrian Cindea: For examplu if a pplu can not turn in po ... activity protocol increased for nothing ... to log data

11/11/22, 09:33 - Milo Barozzi: ok, infact OG039 is still in the same situation

11/11/22, 09:34 - Adrian Cindea: No

11/11/22, 09:34 - Adrian Cindea: It has 28 rowd

11/11/22, 09:34 - Adrian Cindea: Because there are different jobs

11/11/22, 09:35 - Milo Barozzi: ?

11/11/22, 09:35 - Adrian Cindea: Stock history is archived

11/11/22, 09:35 - Milo Barozzi: IMG-20221111-WA0003.jpg (file allegato)

they're 16...

11/11/22, 09:35 - Adrian Cindea: Archiving used more jobs

11/11/22, 09:36 - Adrian Cindea: Remove auto area 😊

11/11/22, 09:36 - Milo Barozzi: IMG-20221111-WA0004.jpg (file allegato)

20...

11/11/22, 09:36 - Milo Barozzi: but issue is related to pStations only, not to other areas (I guess)

11/11/22, 09:37 - Adrian Cindea: I dont talk about issue, archiving was done for picking orders

11/11/22, 09:37 - Adrian Cindea: Locked archiving job affected some tables

11/11/22, 09:38 - Adrian Cindea: Stock history is archiving now ...

11/11/22, 09:39 - Adrian Cindea: 56 k rows to be archived

11/11/22, 09:39 - Adrian Cindea: And later on, archiving protokol will be done with 5.9 mil

11/11/22, 09:40 - Milo Barozzi: after that 5.9Million are archived, OG039 should be "as usual". Did I understand well?

11/11/22, 09:40 - Adrian Cindea: Yes

11/11/22, 09:40 - Milo Barozzi: 👍

11/11/22, 09:41 - Milo Barozzi: let's pump archiving therefore!

11/11/22, 09:41 - Adrian Cindea: Worker to assign POs is slower than normal due to amount of records of activity protokol

11/11/22, 09:42 - Adrian Cindea: I can clean it in 2 seconds but data from it is lost

11/11/22, 09:43 - Adrian Cindea: When its cleaning will start i will make an estimation for its cleaning

11/11/22, 09:46 - Milo Barozzi: DON'T DO IT, please

11/11/22, 09:46 - Adrian Cindea: At least 3 hours to move activity protocol with 500 rows /second

11/11/22, 09:47 - Adrian Cindea: I will wait the moment to tell us please do it

to much garbage

11/11/22, 09:53 - Adrian Cindea: I hope to archive faster than increasing .. due to huge number of rows and system usage

11/11/22, 10:01 - Milo Barozzi: I spoke with @Support Technician 11 at the phone and he asked me to check when and why we use activityprotocol table in our stats. We use it for tracking container loadings, therefore we CANNOT cut any record from there unfortunately. It's crucial for our stats.

11/11/22, 10:02 - Milo Barozzi: What we can do, when history server will be in place, is to make in manner that we'll have only (I don't know) 15 days of activity protocol in PROD server, but YEARS of it the history server

11/11/22, 10:02 - Milo Barozzi: according to that, please DO NOT CANCEL ANY DATA from activityprotocol!

11/11/22, 10:08 - Adrian Cindea: We will wait your approval to do it

11/11/22, 10:09 - Adrian Cindea: You used 1% from that data because it is not for stats, it is for logging

11/11/22, 10:09 - Adrian Cindea: Solution is to separate data for stats vs data for logging

11/11/22, 10:12 - Adrian Cindea: A query in 75.3 mil rows to extract stats data ... how it will affect the system

11/11/22, 10:14 - Milo Barozzi: I agree, but we cannot do it now I guess... we need to check it in detail, what we use and what not

11/11/22, 10:14 - Adrian Cindea: Normally in this situation performance of system is out of our responsibility .. production is affected by this volume of data as perf not as usage (production works without them)

11/11/22, 10:15 - Milo Barozzi: I'm looking first to a solution for pickorder not to be assigned now, than I agree with you that we should select what we really need and what not instead of archiving everything in a "blind way". But we cannot decide now, in a hurry, what to cancel and what to keep. If we do a mistake... bye bye data from an entire year and somebody will cut my head 😊

11/11/22, 10:16 - Milo Barozzi: yes and no... we're speaking about history server from ancient times to avoid that.... I would not discuss about this now honestly

11/11/22, 10:16 - Adrian Cindea: We will do what you say until the moment when we must keep the system alive

11/11/22, 10:16 - Adrian Cindea: There is no history server in our product

11/11/22, 10:16 - Adrian Cindea: It is a bi server

11/11/22, 10:17 - Milo Barozzi: I see and I thank you, but right now... what is your estimation about picking orders to return in a normal behaviour?

11/11/22, 10:17 - Adrian Cindea: The history server as solution is a project specific feature

11/11/22, 10:17 - Adrian Cindea: Activity protocol is not starting to be moved

11/11/22, 10:18 - Milo Barozzi: I see, but if we would have it already in place, we would not be discussing about this issue now probably 😊 by the way, I suggest to focus on current issue

11/11/22, 10:18 - Adrian Cindea: Others protocols are before Stores blockage protocol

11/11/22, 10:18 - Milo Barozzi: Please, correct me if I'm wrong:

1 - activity protocol archiving is affecting station assignment, right?

11/11/22, 10:18 - Adrian Cindea: Auto trace line ... change for objects can be before ... i did not checked exactly thevoreer

11/11/22, 10:19 - Adrian Cindea: Yes

11/11/22, 10:20 - Adrian Cindea: IMG-20221111-WA0005.jpg (file allegato)

11/11/22, 10:20 - Milo Barozzi: good!

2 - activity protocol will not be archived until other tables are archived. How many they are? How many records they have? If we decide, now, that some data in some tables are not needed, or that their retention period can be reduced, will we have some advantages ?

11/11/22, 10:21 - Adrian Cindea: I will check

11/11/22, 10:22 - Adrian Cindea: Stores blockage has 1.2 mil

11/11/22, 10:22 - Milo Barozzi: please, tell me if I got properly. Issue is that "archiving protocol" has a finite time (e.g. 10 minutes) to run and in that 10 minutes it's not able to archive all data from all tables, right?

11/11/22, 10:23 - Milo Barozzi: during days, weeks, months data to be archived have accumulate and now archiving protocol cannot recover to archive all of

them. Did I get properly?

11/11/22, 10:30 - Razvan Voicu: No. It archives 200 rows every ~2 seconds

11/11/22, 10:30 - Razvan Voicu: It will just take time until it will catch up with all the data

11/11/22, 10:31 - Razvan Voicu: We have 5mil rows in activityprotocol, 1mil stores block etc

11/11/22, 10:32 - Milo Barozzi: it'll take 50.000 seconds for activityprotocol, i.e. 14 hours

11/11/22, 10:32 - Milo Barozzi: but my question is... if it's not a problem of accumulation of data from days, weeks, months... why are we now getting into troubles with archiving time? it should be only a problem of archiving space, shouldn't it?

11/11/22, 10:34 - Razvan Voicu: Bigger tables -> slower queries

11/11/22, 10:35 - Milo Barozzi: slower archiving queries?

11/11/22, 10:35 - Razvan Voicu: In one instance a query timed out when querying the activityprotocol

11/11/22, 10:36 - Razvan Voicu: And this query was related to station assignment

11/11/22, 10:36 - Milo Barozzi: aaaaaaaaaaaaaaaaaaaaaaaaaaaaaah now I got it!

11/11/22, 10:36 - Milo Barozzi: Station assignment worker queries the activityprotocol table, right?

11/11/22, 10:36 - Razvan Voicu: Yes

11/11/22, 10:37 - Razvan Voicu: <Media omessi>

11/11/22, 10:37 - Razvan Voicu: You know the subtitles 😊

11/11/22, 10:38 - Milo Barozzi: i.e. if we reduce activityprotocol size --> assignment worker is faster

11/11/22, 10:38 - Milo Barozzi: yes yes 🤔 Sorry, but you were giving for done something that was not known by me

11/11/22, 10:38 - Razvan Voicu: Then we get rid of the problem in the first line. If there's more behind, that's to be seen

11/11/22, 10:38 - Razvan Voicu: But this is a issue we saw

11/11/22, 10:39 - Milo Barozzi: if we reduce activityprotocol size --> assignment worker is faster *this is fair* BUT..... now... I cannot understand relation between archivingprotocol 5million rows to be archived and assignment worker

11/11/22, 10:41 - Adrian Cindea: We checked it and worker is related to this table

11/11/22, 10:42 - Adrian Cindea: I put a screen from external tool and worker query is on that table

11/11/22, 10:43 - Milo Barozzi: in order to don't wait 14 hours and since we cannot delete data from activityprotocol table... what we can do for now? Shall you make a "copy-paste" of activityprotocol table somewhere, in manner we can save data somewhere for the future historyserver? if you can do so, we can think to reduce retention time in prod for activity protocol from 350 days to 120 days for instance

11/11/22, 10:44 - Adrian Cindea: Only with app stop to not lose data or lost some seconds of data from it

11/11/22, 10:44 - Milo Barozzi: 🙄

11/11/22, 10:45 - Milo Barozzi: app stop for how much time more or less?

11/11/22, 10:45 - Adrian Cindea: But this procedure is not a standard solution

11/11/22, 10:45 - Adrian Cindea: We run a comand

11/11/22, 10:45 - Adrian Cindea: I can run it right now to see

11/11/22, 10:45 - Adrian Cindea: But ...

11/11/22, 10:45 - Adrian Cindea: 1. Check space on db

11/11/22, 10:46 - Adrian Cindea: 2'

11/11/22, 10:46 - Adrian Cindea: 2. Check space of table

11/11/22, 10:46 - Adrian Cindea: 3. Increase db space if any

11/11/22, 10:46 - Adrian Cindea: 4. Create a copy of table

11/11/22, 10:46 - Adrian Cindea: 5. Truncate it

11/11/22, 10:47 - Adrian Cindea: La 4. Is time duration

11/11/22, 10:47 - Adrian Cindea: Follow 4. Again and 5 for current activity protocol

11/11/22, 10:47 - Adrian Cindea: All are out of our job only to keep data for history

11/11/22, 10:48 - Adrian Cindea: And it can be repeat in 2 months

11/11/22, 10:49 - Adrian Cindea: Instead to clean data we work additional to save it and move to history
 11/11/22, 10:49 - Adrian Cindea: Data = logging protocol
 11/11/22, 10:49 - Adrian Cindea: Se010 category is protocol
 11/11/22, 10:49 - Milo Barozzi: I have a suggestion for you...
 11/11/22, 10:49 - Adrian Cindea: They are huge tables
 11/11/22, 10:50 - Milo Barozzi: We use activityprotocol only for the following query:
 11/11/22, 10:50 - Milo Barozzi: select
 AP.entityref_entityoid as NumCaricoWamasAP,
 to_number(substr(AP.entityref_entityoid,1,6)) as NumUnivocoCarico,
 AP.userid as Utente,
 AP.message as Messaggio,
 cast(from_tz(AP.time, 'UTC') at time zone 'Europe/Rome' as TIMESTAMP) as DataEstesa,
 trunc(cast(from_tz(AP.time, 'UTC') at time zone 'Europe/Rome' as TIMESTAMP)) as DataGG

FROM activityprotocol AP
 right outer join login2role LO on LO.loginid = AP.userid

WHERE
 AP.entityref_scopedname like '%Load'
 AND AP.message like '%Finished%'
 AND LO.roleid = 'Carrellista'
 AND LO.applicationid = 'MOBILE'

11/11/22, 10:51 - Milo Barozzi: what if:
 - from activityprotocol you clean all data older than 120 days not matching the data we use in this query
 - from activityprotocol you keep all data younger than 120 days, without any exclusion
 ?

11/11/22, 10:51 - Adrian Cindea: Thereisno feature for this
 11/11/22, 10:51 - Milo Barozzi: a script? 😊
 11/11/22, 10:52 - Adrian Cindea: No wamas script
 11/11/22, 10:52 - Milo Barozzi: than from next week we discuss together how to "split out" from activityprotocol data we use
 11/11/22, 10:52 - Adrian Cindea: It is needed a script to do it
 11/11/22, 10:52 - Milo Barozzi: @Support Technician 21 shall you trigger manually again StationAssignmentWorker, please? we're with a couple of orders only now 😊
 11/11/22, 10:53 - Adrian Cindea: To run some works and tocommit after 5k rows
 11/11/22, 10:53 - Milo Barozzi: ok... so I don't know how we can rid out of this "empasse"... 😊
 11/11/22, 10:53 - Adrian Cindea: Another issue
 11/11/22, 10:53 - Razvan Voicu: Wont help, it was just luck yesterday
 11/11/22, 10:53 - Adrian Cindea: Table is huge ... it is needed a compression after cleaning
 11/11/22, 10:53 - Adrian Cindea: Big house with one people
 11/11/22, 10:54 - Adrian Cindea: For one people is enough one room not an hotel with 500 rooms
 11/11/22, 10:54 - Milo Barozzi: I see
 11/11/22, 10:54 - Milo Barozzi: in very simple words... it'll not be a matter of some minutes. It'll take hours to do it
 11/11/22, 10:54 - Milo Barozzi: so, we cannot do it today
 11/11/22, 10:55 - Adrian Cindea: After cleaning it is needed a shrink or truncate (truncate make shrink and takes 1 min)
 11/11/22, 10:55 - Adrian Cindea: Truncate takes 2 seconds
 11/11/22, 10:55 - Adrian Cindea: And table will be empty
 11/11/22, 10:55 - Adrian Cindea: A solution is to copy it before truncate
 11/11/22, 10:56 - Milo Barozzi: correct me if I'm wrong. Best options we have are the following:
 1) put retention time 30 days in SE010 ::common::ActivityProtocol
 2) wait 14 hours to archiving job to archive everything

11/11/22, 10:56 - Adrian Cindea: And lost 2 seconds of data
11/11/22, 10:56 - Adrian Cindea: The issue is in prod table
11/11/22, 10:56 - Milo Barozzi: 2 seconds of only activityprotocol data or from all tables?
11/11/22, 10:56 - Adrian Cindea: Notin archiving table
11/11/22, 10:57 - Milo Barozzi: I mean, if we loose 2 seconds of data and prod can work with no issue and we cannot block the system..... we're speaking about no problem
11/11/22, 10:57 - Adrian Cindea: 1. Copy prod.activity protokol
11/11/22, 10:57 - Adrian Cindea: 2. Truncate
11/11/22, 10:57 - Adrian Cindea: It means data between 1 and 2 are lost
11/11/22, 10:57 - Milo Barozzi: how much time it'll take?
11/11/22, 10:58 - Milo Barozzi: data between finish of 1 and start of 2 or between start of 1 and finish of 2?
11/11/22, 10:59 - Adrian Cindea: Start 1 and start 2
11/11/22, 10:59 - Milo Barozzi: ok, and approx time for 1 to be finished is?
11/11/22, 11:00 - Adrian Cindea: Only if i try i can tell you
11/11/22, 11:01 - Milo Barozzi: and you need to stop the instance for copying it or you can try now without stopping anything?
11/11/22, 11:01 - Adrian Cindea: During running
11/11/22, 11:01 - Adrian Cindea: No stop
11/11/22, 11:01 - Milo Barozzi: so you can try also now without any drawbacks, right?
11/11/22, 11:02 - Milo Barozzi: BUT for truncating... you need to stop the system. Did I understand?
11/11/22, 11:02 - Adrian Cindea: I make a copy
11/11/22, 11:03 - Adrian Cindea: It is exactly as for a file
11/11/22, 11:03 - Adrian Cindea: Stop to not change it
11/11/22, 11:03 - Adrian Cindea: Stop must be done before copy
11/11/22, 11:03 - Adrian Cindea: Copy file, remove content
11/11/22, 11:04 - Adrian Cindea: No stop ... copy file and remove content -- lost what was write between copy and remove content
11/11/22, 11:05 - Milo Barozzi: Got it!
11/11/22, 11:05 - Milo Barozzi: Suggestion: let's make a copy and see how much time it'll take it
11/11/22, 11:06 - Milo Barozzi: if it's 2 seconds and if loosing data from protocol it's not an issue for you and stability for the system, no problem! let's loose them!
11/11/22, 11:06 - Milo Barozzi: if it's 30 minutes... let's see how to proceed 😊
11/11/22, 11:07 - Adrian Cindea: Running ...
11/11/22, 11:08 - Adrian Cindea: 43.462 seconds
11/11/22, 11:08 - Milo Barozzi: 43 seconds?
11/11/22, 11:08 - Adrian Cindea: 5969172 rows
11/11/22, 11:09 - Adrian Cindea: Yes, 44 sec
11/11/22, 11:09 - Milo Barozzi: In my humble opinion.. loosing 44 seconds of activityprotocol.... nobody will care it
11/11/22, 11:09 - Milo Barozzi: BUT can you ensure me it'll not affect or kill or block production?
11/11/22, 11:10 - Adrian Cindea: Truncate 0.439 seconds
11/11/22, 11:10 - Adrian Cindea: You lost 44 seconds of data
11/11/22, 11:10 - Adrian Cindea: 😊
11/11/22, 11:11 - Milo Barozzi: no problem
11/11/22, 11:11 - Milo Barozzi: good
11/11/22, 11:11 - Milo Barozzi: so now we should recover normal operation for stationassignment?
11/11/22, 11:13 - Adrian Cindea: I tested
11/11/22, 11:14 - Milo Barozzi: sorry, you're testing or did you already test it?
11/11/22, 11:16 - Adrian Cindea: I tested ... i made a copy ... ~44 sec and a truncate the copy
11/11/22, 11:16 - Adrian Cindea: In 0.43 sec
11/11/22, 11:17 - Milo Barozzi: that's good
11/11/22, 11:18 - Milo Barozzi: if you can assure me it'll not affect prod (i.e.

they can continue working and nothing will be blocked), you can proceed doing it in production

11/11/22, 11:22 - Razvan Voicu: I have a wild idea

11/11/22, 11:22 - Razvan Voicu: can we block the nok foiling station?

11/11/22, 11:22 - Milo Barozzi: why?

11/11/22, 11:22 - Razvan Voicu: I want to see if this affects somehow

11/11/22, 11:23 - Razvan Voicu: might increase the speed of assignment for the pick stations

11/11/22, 11:23 - Razvan Voicu: like I said, wild idea

11/11/22, 11:23 - Milo Barozzi: IMG-20221111-WA0007.jpg (file allegato)

you mean doing so:

11/11/22, 11:23 - Razvan Voicu: yes

11/11/22, 11:23 - Milo Barozzi: yes, sure you can do it

11/11/22, 11:24 - Razvan Voicu: this means the nok foiling wont work until is unblock

11/11/22, 11:24 - Milo Barozzi: sure sure

11/11/22, 11:24 - Milo Barozzi: do it

11/11/22, 11:24 - Razvan Voicu: did

11/11/22, 11:28 - Milo Barozzi: some benefitis?

11/11/22, 11:28 - Milo Barozzi: *benefits?

11/11/22, 11:32 - Milo Barozzi: @Support Technician 21 seems it worked, at least a little bit

11/11/22, 11:33 - Milo Barozzi: I mean, it gave an hand, but not solved completely... HBW02 is still without any order to pick

11/11/22, 11:34 - Razvan Voicu: 2022-11-11-11:32:07.635 | StationAssignmentWorkerTask | INFO | [HBW02-Ass (Picking)] A new PickingOrder(3602970;WAMAS) was sucessfully created for PickingPlanLu(1;3448222) - GtpPickingOrderCreator

11/11/22, 11:35 - Milo Barozzi: in other words? 😊

11/11/22, 11:35 - Razvan Voicu: for HBW02 PO 3602970 was created

11/11/22, 11:35 - Milo Barozzi: but only one... they should be 4...

11/11/22, 11:36 - Razvan Voicu: 2022-11-11-11:34:21.107 | StationAssignmentWorkerTask | INFO | [HBW02-Ass (Picking)] A new PickingOrder(3602972;WAMAS) was sucessfully created for PickingPlanLu(1;3448228) - GtpPickingOrderCreator

11/11/22, 11:36 - Razvan Voicu: we are getting there 😊

11/11/22, 11:37 - Milo Barozzi: you mean we're recovering pace?

11/11/22, 11:43 - Razvan Voicu: yes

11/11/22, 11:43 - Razvan Voicu: So how we choose the stations/PO

11/11/22, 11:45 - Razvan Voicu: We check each active process (pick unpick lucheck etc) and group the stations by process.

unpick and lucheck are simple

pick is more complex because we have different kinds (extra size/normal/express)

So from this group of stations with picking we sub-group them by their kind.

Then we check the station with least load and assign orders to it

11/11/22, 11:46 - Razvan Voicu: IMG-20221111-WA0009.jpg (file allegato)

11/11/22, 11:46 - Razvan Voicu: so in our case now we get the 3 stations with minimum load and try to assign to it

11/11/22, 11:48 - Razvan Voicu: after this is done, we do assignment again and again try to find the stations

11/11/22, 11:48 - Milo Barozzi: so each time StationAssignmentWorker you check which station is unpick, which is lucheck, which is pick extra, which pick std, which pick express std, etc... than you check their load

11/11/22, 11:48 - Razvan Voicu: tht's why now it takes a while to get to 4

11/11/22, 11:48 - Milo Barozzi: than you assign the first prio order of that specific kind to the station, than the second, etc

11/11/22, 11:48 - Razvan Voicu: + all the queries done now on DB with archiving which slow a bit the DB operations

11/11/22, 11:49 - Milo Barozzi: one question: each time the StationAssignmentWorker runs it assings 1 pick order or as many he can in a certain timeout?

11/11/22, 11:49 - Razvan Voicu: for example a PO was created at :38 minutes in log, but was actually created in wamas :41, so 3 minutes to be comitted

11/11/22, 11:49 - Razvan Voicu: it can assign more

11/11/22, 11:49 - Razvan Voicu: in our case above, it assigned 3 POs to normal + extrasize + express station
11/11/22, 11:50 - Milo Barozzi: is like "you have 5 minutes, assign all the ones you can assign in these 5 mins"?
11/11/22, 11:50 - Razvan Voicu: No
11/11/22, 11:50 - Razvan Voicu: Per one run, it will assign 1 PO for each station with minimum load with different kind (normal/extra/express)
11/11/22, 11:51 - Milo Barozzi: clear
11/11/22, 11:51 - Milo Barozzi: 1 unpick, 1 lucheck, 1 pick extra, 1 pick std, 1 pick extra express, 1 pick extra std...
11/11/22, 11:51 - Milo Barozzi: and it runs every....?
11/11/22, 11:52 - Razvan Voicu: 5 mins
11/11/22, 11:52 - Razvan Voicu: so this configuration is ok, nothing was changed
11/11/22, 11:52 - Razvan Voicu: it worked fine until now
11/11/22, 11:52 - Milo Barozzi: and there are more in workers in parallel running every 5 mins?
11/11/22, 11:52 - Milo Barozzi: yep yep
11/11/22, 11:52 - Milo Barozzi: sure
11/11/22, 11:52 - Razvan Voicu: there are a lot of workers yeah
11/11/22, 11:53 - Razvan Voicu: some every 30 sec, some every 1 hour
11/11/22, 11:53 - Razvan Voicu: 😊
11/11/22, 11:53 - Milo Barozzi: I mean StationAssignmentWorkers
11/11/22, 11:53 - Milo Barozzi: 😊
11/11/22, 11:53 - Razvan Voicu: oh, there's only 1 stationAssignmentWorker that runs once/5 mins
11/11/22, 11:54 - Milo Barozzi: ok... so if we have all pick stations kind picking-standard we will have only one pick order assigned to them every 5 mins? It's not like what's happening in production... I'm missing something...
11/11/22, 11:57 - Razvan Voicu: if all stations are in GtpPicking and all stations have the same kind (let's say normal), I would say that only one station would get a pick order assigned to it
11/11/22, 11:57 - Razvan Voicu: and then the next one with least load
11/11/22, 11:57 - Razvan Voicu: and then the next
11/11/22, 11:57 - Razvan Voicu: and so on
11/11/22, 11:58 - Milo Barozzi: but 1 order every 5 mins?
11/11/22, 12:11 - Milo Barozzi: by the way... what's the situation so far? Do you think we fixed for the moment and in the next 1-2-5-10 hours we'll fall again into the same issue or the weekend will cure everything ?
11/11/22, 12:12 - Razvan Voicu: I'm trying to check if it's right that we have only 1 order/station kind assigned
11/11/22, 12:12 - Razvan Voicu: at the moment I am monitoring if we remain behind again with picking orders
11/11/22, 12:12 - Razvan Voicu: I see that nok foiling user started working
11/11/22, 12:13 - Razvan Voicu: we also had NOK Gtp with LU check process active but no user active, this might have caused the slow aswell
11/11/22, 12:13 - Razvan Voicu: so maybe the slow is caused by the Lu Check process that queries the activity protocol tables
11/11/22, 12:14 - Milo Barozzi: so far, we can conclude what follows (pls correct me if I'm wrong):
1) no copy/trunc table is needed
2) system seems fine now
3) Razvan continue investigating/checking

?
11/11/22, 12:20 - Adrian Cindea: Yes
11/11/22, 12:21 - Milo Barozzi: Ok, I'll leave in 10 mins from now and I'll be back at 14:30 CET
11/11/22, 12:21 - Milo Barozzi: until what time are you at work?
11/11/22, 12:21 - Milo Barozzi: I'd like to agree with you on a solution before me/you are leaving office for the weekend
11/11/22, 12:24 - Adrian Cindea: 15 + your time
11/11/22, 12:25 - Milo Barozzi: 15:00 Timisoara time?
11/11/22, 12:34 - Milo Barozzi: by the way, despite time zone, I'll be back in 2 hours from now. Let's touch base at that time 😊

11/11/22, 12:34 - Milo Barozzi: Questo messaggio è stato eliminato.
11/11/22, 12:34 - Milo Barozzi: thanks so far
11/11/22, 12:35 - Razvan Voicu: thanks aswell
11/11/22, 14:22 - Milo Barozzi: @Support Technician 12 @Support Technician 21
what's your idea? How's system status from what you see?
11/11/22, 14:24 - Razvan Voicu: number of pickign orders seem to be high
11/11/22, 14:24 - Razvan Voicu: archiving firing on all cylinders
11/11/22, 14:25 - Milo Barozzi: 🤔🤔
11/11/22, 14:25 - Milo Barozzi: So your idea is to let weekend cure the status?
11/11/22, 14:25 - Razvan Voicu: yep
11/11/22, 14:26 - Milo Barozzi: 👍👍
11/11/22, 14:27 - Razvan Voicu: as long as picking order number is high, we are
ok
11/11/22, 14:28 - Razvan Voicu: if it starts dropping, we will intervene
11/11/22, 14:31 - Milo Barozzi: ok, we'll keep an eye on the system for the
whole afternoon
14/11/22, 08:23 - Milo Barozzi: @Support Technician 21 @Support Technician 12
good morning! did archiving job do its job during the weekend? Is the system
aligned now? Thank you!
14/11/22, 09:07 - Razvan Voicu: Hi Milo
14/11/22, 09:07 - Razvan Voicu: Yes, archiving caught up
14/11/22, 09:09 - Milo Barozzi: 👍very good. And system is running smoothly
14/11/22, 09:09 - Milo Barozzi: I wish you a nice day!
14/11/22, 09:12 - Razvan Voicu: thanks aswell
11/12/22, 18:51 - Milo Barozzi: Good evening everybody SSI team. Just for info,
are you going to say something / send an email after deploy is done? Thx
11/12/22, 19:22 - Razvan Voicu: Hello. Deploy is done, I already sent a mail
11/12/22, 19:36 - Milo Barozzi: Oh sorry, I missed it. Later (close to midnight
I guess) I'll try reactivating some AGVs to see if they're moving 😊
I wish you a good night meanwhile. Let's touch base tomorrow
11/12/22, 19:37 - Razvan Voicu: Ok the parameter is switchdd to its normal value
11/12/22, 20:23 - Milo Barozzi: Perfect
11/12/22, 23:34 - Milo Barozzi: From what I can see from remote, it seems all
ok. I did some tries with some pick stations and some AGVs from remote and they
moved so... let's keep our fingers crossed and let's touch base tomorrow morning.
Thank you so far. I wish you all a good night.
12/12/22, 05:47 - Adrian Cindea: So far so good
12/12/22, 05:48 - Nicola Bernardi: 🙌
